

AMERICA BUYS MORE POLICIES

NEW YORK (AP)—Americans now are buying as much life insurance in seven weeks as they bought in a year a quarter century ago.

Chairman William A. Law, of Philadelphia, declared in opening the annual convention of the Association of Life Insurance Presidents here today.

As an index to the condition of the country, he called attention to \$15,400,000,000 of new insurance paid for this year—a new record. This represents a gain of \$2,200,000,000 over the previous high mark of 1924.

"American business expansion of the past quarter-century is amazing, and becomes more so as we project the picture backward to the beginning of this as yet comparatively young nation," he said.

"With our modern financial, commercial and manufacturing machinery, dare we use definite figures in attempting predictions for the next quarter-century.

The rapid growth of our urban population accompanying our commercial expansion, the organization of business on a large scale, the urgent demand for higher and higher living standards, and the rapidity of communication, all tend to emphasize the inter-dependence of our population, the extent of our future problems, and the need of broad-minded cooperation in their solution."

Robert W. Huntington, of Hartford, Conn., told the members that life insurance companies this year are making a further loan of \$1,000,000,000 to American people.

"This additional loan has been used to finance homes and farms, industry, transportation and commerce and makes an investment record for life insurance companies," he said.

County Loses Traffic Fines
HOOD RIVER, Ore.—The county court decided to retain two county traffic officers, but to limit their work or exclusively county roads.

A magazine writer has an article on what to do with worn out shoes. We know already. Wear them.

The Whole Church Is His Daddy

This four-month-old youngster has been adopted by the whole congregation of a United Brethren church at Toledo, O. He was found abandoned in an automobile in front of the church, and everybody wanted him. The church women have named him Arline, after the founder of the church, and are taking turns in caring for him.

HEALTH

TUBERCULOSIS

(By Dr. Frederick Stricker)
Is tuberculosis curable?
Yes, if good medical advice is obtained early and followed closely. Is it preventable?

Yes, by following the rules of hygiene and correct living. At what age is tuberculosis most likely to occur?
It may develop at any age when the physical resistance is low enough to allow infection. It is most likely to occur in late youth and early adult life, that is below the ages of fifteen and twenty-five. The prevention of the disease among children has only recently been appreciated.

How may physical resistance be built up?
Keep the body in the best possible condition by good, nourishing food, plenty of fresh air day and night, and abundance of sunshine.

What causes tuberculosis?
The tubercle bacilli discovered by Robert Koch in 1882.

What parts of the body do the bacilli attack?
The organism may attack any part of the body. Tuberculosis of the lungs is the most common type.

How is human tuberculosis spread?
By the infected person who is careless, by dust and by food products, the most important of which is milk.

What are the symptoms of tuberculosis?
Loss of weight and appetite, a daily afternoon rise of temperature, continued cough and general feeling of fatigue.

What should one do if he has the slightest reason to suspect tuberculosis?

Go to a physician at once for a complete examination. Is the infected person a menace to his family?
Yes, unless he observes the most careful precautions to prevent the spread of the germ.

What indication leads one to suspect tuberculosis in children?
Continued fatigue, loss of weight, irritability and a daily afternoon temperature above 38.6°.

How is tuberculosis in children treated?
By the same program of rest, fresh air, and good food that accomplishes results in adults.

Should one go to a sanitarium?
The program of rest, fresh air and good food can best be followed in a sanitarium.

What can the people of Oregon do to further the cure and prevention of tuberculosis in Oregon?
They can vote to establish a sufficient number of beds to accommodate all needy victims of tuberculosis.

Closing of Streams Considered
PENDLETON, Ore.—A special meeting of the Pendleton Rod and Gun club has been called for to ascertain the wishes of sportsmen relative to the proposal to close anglers some of the chief tributaries of the larger streams in Umatilla county.

The state game commission is considering closing some of the streams in order that they may be restocked, according to information received by the club.

The most dangerous activity on earth is jumping at conclusions.

Choice Meats

Juicy Steaks, Tender Roasts from Grain Fed Cattle

We are now offering our customers Juicy Steaks and Tender Roasts which we have carefully prepared and cured from a select lot of purebred grain-fed cattle.

You will appreciate the extra fine quality of this beef. A number of particular housewives who are regular Crescent customers say that it is the best that they have been able to buy at any market.

Try one of these choice cuts today. You can pick various cuts but you'll find all of them measure up to the standard of Crescent Quality.

Farm Pointers

The strawberry root louse, a relatively new insect pest in Oregon, is controlled by setting out uninfested strawberry plants, says the entomologist of the experiment station.

The violet saw-fly which attacks pansy plants in Oregon is controlled by destroying the winter homes of the insects, says the entomologist of the experiment station.

from flower beds and destroying it in the fall gives materially in the control.

It is necessary to keep crows out of the cold winds and rains during the winter to have them do well, say the dairy authorities at the Oregon experiment station.

Talk to Pretty Girls
One Way to Live Long
OXFORD, Eng. (AP)—Listen to music, look at beautiful things, chat with friends, wear your best clothes and talk all you can to pretty girls. If you wish to live for many years.

This is the advice given by Professor Frier Bacon, of Oxford, where the average age of the heads of all the colleges has reached seventy.

Among the educators a conclusion prevails, however, that longevity is an accident rather than an achievement.

Colds

By millions ended

Hill's stop millions of colds every winter—and in 24 hours. They end headache and fever, open the bowels, tone the whole system. Use nothing less reliable. Colds and Grippe call for prompt, efficient help. Be sure you get it.
