 log center of the world.

Competition Necessary
 But if both cities intend to develop their natural resources and move irresistibly ahead, he declared, competition must be keen. "Competition does not tear us down—it lifts us up," he asserted. "We need it to bring out our best. Competition grinds the noses of the fools but sharpens the wits of the wise men," he emphasized.
 Joe Stoddard, of Baker, an uncle of the Stoddard brothers of La Grande, presided at the luncheon and ended upon the Rev. Mr. Polford to return thanks.
 Mrs. Paul Polman favored the group with a series of three songs and responded to hearty applause with an encore number.
Inspect Sewage Disposal Plant

WOMAN JOINS SCHOOL RACE

HILLSBORO, Ore. (Special).—Mrs. Emma Bryant, of this city, today announced her candidacy for the office of state superintendent of public instruction. She will enter the May Republican primaries.
 "One of the big problems before the people of Oregon today is to devise a more equitable tax division for school administration purposes, and, if elected, I will put forth all possible effort to meet this problem, and will do my utmost to further all the educational interests of the state," Mrs. Bryant declares in her announcement. "Another big problem which will occupy me will be the problem of equipping educational opportunities between the urban and rural child."
 Mrs. Bryant at present is president of the state association of county school superintendents, is 42 years of age, married and the mother of four children. She secured her education in the public schools.

DOGS, SLEDGES PLAY NO PART

DETROIT (AP).—The contention of Captain Donald MacMillan that "the dog still is king of the Arctic" is being disproved by the expedition of George H. Wilkins, aviator, explorer and photographer, expects to disprove when he takes off in Alaskan from Point Barrow, Alaska, on an aerial dash into the unexplored regions of the Arctic Basin.
 Confidence in his ability to "live off the ice" is responsible for Captain Wilkins' decision to make the expedition the lightest equipped that ever crossed a journey into the Arctic Basin. Where others have taken sledges, dogs, huge food supplies and other paraphernalia, the Wilkins party will carry gasoline, the latest navigation instruments, sun compass, rifles, ammunition, a supply of food and a "nigridi."
 The last named instrument is closely related to the food supply, for it is the means of retrieving and shot to replenish the Polar larder. Usually, it is a set of wheels on a sled, which "lives off the ice." In Captain Wilkins' estimation is a simple procedure, so simple, that his supply of concentrated food will be sufficient for less than a week.
 What he hopes to prove is the existence of land in the vast unexplored area from Siberia and Alaska toward the "top of the world."
 A point one mile distant in a straight line will be the first objective of this expedition, which the members in two, Parker, monopolists, hop off from Point Barrow. It is here, at 85.50 North and 160 degrees west, that science has established the location of the so-called ice pole, or Pole of Relative Inaccessibility.
 The second objective point in the flight will be the landing, 2,000 miles from the take-off at Point Barrow. This will take the expedition as its flight has been mapped, across the Geographical Pole.
 Should land be sighted on the dash from Point Barrow to the ice pole, Captain Wilkins proposes not to land, but to turn about and return to his Alaskan base there report his discovery and with a second plane hop back to the discovered land. Claiming it for the United States, Captain Wilkins and his party will explore and chart the new land and then proceed to Spitzbergen.
 Failure to sight land on the initial dash, Captain Wilkins will essay a 2,400 mile non-stop flight over the Geographical Pole to Spitzbergen.

LAPWAL ROAD IS CLOSED.
 LAPWAL, Idaho.—The Lapwal-Spalding link of the North and South highway, which has been open in an uncompleted state is closed until further notice, according to announcement January 18 of District Engineer P. E. Oakes, this action being made necessary by the water-soaked roadbed giving way under the traffic.
 Only about one-half of the sector is completed at the present time, the other half having only a single layer of base surfacing applied. With much water and frost in the ground this uncompleted sector is giving way and the new rock burying itself in the mud. Continued travel on it would result in the necessity of having to resurface the entire sector.
 Mr. Oakes was here January 13 with Federal Engineer E. H. Shawmaker and directed the building of the fence at the end of the highway which will shut off traffic.

Around the World on The Liner "Belgenland"

(Continued from Page One.)

board the ship. We had to proceed so slowly and it took so long to dock such a big ship that we were all glad to land. At three o'clock we were driven through Old Panama (founded in 1615), Balboa, Balboa Heights, Fort Amador, Exposition grounds, bull ring, markets, cathedrals, and so forth. We arrived at the Trivolt hotel, Ancon, for dinner at 6:30. This hotel is operated by the U. S. government. Then two hours for shopping. We arrived back at the ship with two newly purchased Panama hats and found nearly all the others had done likewise. There came an exchange of prices and many a good laugh was had at the expense of some poor "sucker" who had paid twice what his hat was worth.

Natives Watched Ship
 Hundreds of negroes and their children lined the wharf to see the big ship. A passenger brought out a sando and soon we had a couple of little negroes dancing and furnishing entertainment for the passengers until we were ready to leave. They were showered with small coins and one man brought a large bunch of bananas and had a barrel of rum passing them out. It was long after midnight when we steamed past the last light and entered the Pacific ocean.

Friday morning we awoke to find we were well out to sea steaming along the Republic of Panama with the coast line in view. Saturday we were passing the coast of Costa Rica.

Playing the Races
 In the afternoon the first race was held on the upper deck. It was very realistic. The 12 horses were tied in the paddock (to the ship's rail). The track was laid out on deck. There were two men to sweep the track, stable boys, track officials, pool sellers and others. First came a parade of the horse's around the track to the music of a jazz band. Then the pools opened and the betting began. Tickets were 25 cents. After playing horses No. 1 and No. 2 in all five races that lasted all the afternoon we quit winners of \$1.12. We were just as excited and as thoroughly tired as though we had been attending the real thing. At nine o'clock a masquerade ball was held on the promenade deck and a riot of fun was had by all.

Sunday morning found us steaming along the coast of Salvador and Guatemala. At eleven o'clock church services were held in the main lounge by Captain Bradshaw. The English prayer book of the Episcopal church was used and the captain read the service in a very dignified and impressive manner. In the evening a song service was held in the reception hall on Deck D.

Monday morning found us passing by Mexico's coast line. Deck tennis and shuffle board tournaments started on this boat deck. Bosh that there! work! bridge parties, trap shooting, deck golf, snooker, ping pong, leap games, croquet and many other amusements were going on all the time. It is surprising how many things are lost found on the ship each day—pens, wraps, bags, books, eye glasses, even shoes are

Room Over at Los Angeles
 Tuesday evening an illustrated lecture on Korea was given by Dr. Marble in a Lorean costume. A very funny affair to us. Friday we docked at San Pedro for our visit to Los Angeles. I shall not write of this as most of you have seen this wonder city. The boom is over here and looks very quiet, alongside of what we saw two years ago.
