## The Garden

BACK YARD VISTAS. Landscape architects always look for opportunity to form attractive vistas, which have been defined as natural pictures seen through a hole in the scenery. In other words, it is making the most of the best view possible from the grounds under design. The same theory applies in the small back yard. Lay it out with the best view from the window in mind and you will have your little back yard vista.

In a large number of suburban and country homes the dining room window looks out upon the back yard. Sometimes it is the living room or window. The layout of a small yard looks comparatively simple, but as a matter of fact it is more difficult for really satisfying results than a large estate which adapts itself much more readily to the landscape designer's plans.

The main idea of establishing the picturesque in a 50-foot back yard is to let the view from the commanding window look down a path the length of the garden space, bordered on either side by blooming plants or shrubs, the path terminating in a handsome specimen group of plants or in a garden seat, bird bath, or sun-dial. If a little pool can be conveniently placed, the view is that much more attractive. Plan your garden with the window outlook a prominent factor.

The plan accompanying this article gives one suggestion for the view-from-the-window idea. The longest path available makes the finest view and there is opportunity for color effect along its length to add interest and beauty. Annuals give the most plastic material for this work in the greatest variety of colors. They come into bloom quickly and give long seasons of color. It is usually found that blues at the end of the path enhance the idea of distance, while the strong reds and yellows are best close at hand.

## When VEGETABLES are best!

RIGHT out of the garden of Reeds! Decide right now while the urge of spring is in your system to utilize a part of your back yard or neighboring vacant lot for a "kitchen" garden. A space 25 feet square will produce wonderfully if the crops are planned right. And the seeds must be vigorous, clean and true to type so that every one does its full share. Northrup, King & Co.'s seeds have been popular with gardeners for forty-one years.

## Star Says Parisians Copy U. S. Film Styles

CULVER CITY, Cal., Mar. 11. (AP)—The sales ladies of Fifth Avenue still may prattle, "This is very smart; just from Paris." But in Paris the shopkeepers are saying, "Very chic; just what they are wearing in Hollywood."

So reports Beaulo Love, who has returned from Paris to the Metro-Goldwyn-Mayer studios to make her next picture, "Lovey Mary."

"In Paris, it is an open secret that the designers copy their gowns from the American films," said Miss Love. "Parisian women are quick to follow the fashions of the American screen stars and so the designers are compelled to copy them."

LIKE AMERICAN GIRLS. NEW YORK—What visiting British trade unionists think of American girls: "They're not only so very pretty, but they're so jolly too."
