GARAGE GOSSIP

Delivered Car to Enterprise—

Roy Healey delivered a new Studebaker phaeton to Enterprise the first of this week for M. J. Goss, local Studebaker dealer.

Standard Oil Man Here—

Don Sherwood, auditor for the Standard Oil company, of Walla Walla, Washington was in the city this week visiting the local branch

of the company. He went to Enterprise yesterday.

Back at Work—

Avery Harrison returned to his work at the Blue Mountain garage Friday morning, after a week's illness at home.

Here from Pendleton—

Stanley Sayer and Mr. Rice, from the Pendleton auto company, distribution point for the Chrysler company, in this part of the state, were in La Grande this week.

Garage Building Progressing—

A. R. Trachsel, Nash dealer here, reports that the new Nash garage being built at the corner of

Adams and Third street is progressing nicely. The pouring of the cement will be completed in a few days now, when the construction of the walls will start.

Will Receive Cars—

The La Grande Nash company will receive a carload of cars the first of the week. The car will be made up of two advanced five-passenger Nash sedans and one four-door five passenger Nash coupe.

Tourist Flock Increasing—

With the advancing of summer, the annual tourist caravans from blither and yon, are increasing in size each day. Filling stations and garages report an increase in transient business.

Received Carload of Chryslers—

L. W. Weeks, Chrysler dealer received a carload of Chrysler cars this week. There was one four-coach, one six-coach, one royal sedan and one sport model roadster in the car. The sport roadster is attracting considerable attention since it appeared in the show room, where twelve new Chrysler cars are now on display.

Sold Car to Mr. Berry—

L. W. Weeks, Chrysler salesman, reports the sale of one new car—a four cylinder sedan to William Berry of La Grande this week.

New Models Many Colored—

Spring apparently affects the automobile business in the same way it does women's styles, as far as colors are concerned. The newer models in almost every line are brighter than ever this year, the galaxy of color including almost every shade in the spectrum. It is said that the increasing number of women drivers have something to do with the general sprucing up.

Grudge

After slaying five women and a man, against whom he had a "grudge," John M. Goins (above) of Stockton, Calif., shot and killed himself just as policemen were overtaking the automobile in which he was trying to make his way to other fancied enemies. Goins some years ago placed his leg under a train and then tried unsuccessfully to collect heavy damages from the railroad company.

The fact that the course of true love and cheap flippers never runs smoothly doesn't prevent folks from continuing to invest heavily in both.

Radio

The cop who wanders about checking up over-parked cars is familiarly known as "The Man of the Hour."

It is not reckless driving that causes all the trouble. It's this modern "freedom of the see."

The horse is a trifle old fashioned but he is the creature that pulls the proud automobile out of a mud hole.

Auto drivers who watch the scenery instead of the road are liable to become a part of both.

PROFIT

"Caterpillar" Tractors save operating costs. They work continuously and successfully when other power equipment must remain idle—wet ground, cold or heat does not stop the "Caterpillar." And, always, "Caterpillars" do better work.

All of these things mean profit to the user. May we show you how "Caterpillars" will furnish these advantages on your job?

Power—beyond all comparison

NOTHING IN ITS PRICE or size class can compare with this Overland Standard Sedan for power and performance. Faster over the road, a better climber on the hills, it is smoother at all ranges of speed than anything you have ever known among light cars.

Carefully honed cylinder walls, generous valve areas, larger than in any other motor of its size, the superior Overland system of lubrication, highly developed carburetion, all give it an ability that is without equal.

There is a perfect balance between the motor power and the car weight—this gives an acceleration that is astonishing when you are driving in traffic or are caught in the jam on the highway.

In body dimensions and finish, this full five-passenger sedan affords the comfort of cars at double its price, the appearance value which has made it famous all over the country.

Try it out for yourself—learn what such a small amount of money can actually buy in motor car construction.
