Being An Economic Factor In the Community Served

The true function of this Store, as we see it, is that of serving as a purchasing and distributing agent for the people of the community and the outlying districts.

When the merchant enters business he assumes the responsibility of performing a public benefaction—that of providing commodities and services to his community in a way that will afford economy and convenience and of maintaining such environment as is necessary and desirable to the consumers who support him.

If he fails in this responsibility, he ceases to be an economic factor in the community which he essays to serve.

Since the first Store in this Nation-wide institution of department stores was opened in 1902, the outstanding ambition has been to serve all alike and well. That we have succeeded is proved by our rapid growth. In less than a quarter of a century we have become the World's Largest Chain Department Store Organization.
