HELEN WONT PLAY

LONDON, June 19. (AP)—Miss Helen Wills will not play in the Wimbledon tournament opening next week. The American champion made this clear upon her arrival here from Paris today. She will attend the tournament only as a spectator, she said, setting at rest recurring reports that she had reconsidered her previous decision.

She had a smooth voyage over the channel but did not look in robust health, showing the effects of her recent operation in Paris.

Mary had a little lamb,
It drank some gasoline.
One day it wandered near the fire,
And since has not benzine.

"Let There Be Light"

The new and radical idea—the departure from the beaten paths—has always met with rebuffs from the world. This is the history of all new movements. We refer to the health science, CHIROPRACTIC. For 25 years this new science has successfully met all the persecution, yes, even persecution of those who desired for some selfish reason or other to overthrow its philosophy and principles, and it has emerged from the fight victorious and is now an established health science, counting as the greatest blessing to suffering humanity of any method up to the present age.

Any movement as radically different from established methods as Chiropractic is from all other health methods would naturally expect to have to fight for its existence, but suffering humanity may be thankful that this fight is about over and in the future the more persecution that is attempted the greater the number of its adherents.

TRUTH HAS WON as it always does and suffering humanity is benefited as a consequence. All the accusations, the inferences of fake, graft, criminal and other charges that have been made against Chiropractic have availed its persecutors naught and the time is here when anyone attempting any further persecution is trending on dangerous grounds, as the people of the world have arrived at the stage where they do their own thinking and insist on being allowed to choose their own health methods the same as their own religious and political views.

If you wish more information on this subject I will gladly give it to you by a personal call at my office.

If the car is equipped with a vacuum windshield wiper and the vacuum tank does not fill readily, especially when climbing hills, examine the rubber hose to the wiper. If it is cracked, the air will leak through. Disconnect the hose at the intake manifold, plugging the hole with a piece of wood until a new hose can be installed.

PARKERS TO SAIL ON LONG-WANTED TRIP TO ALASKA
Cool-calling Skagway and Sitka will be the destinations of Dr. and Mrs. Henry W. Parker when they leave Seattle by the inland water route for Alaska July 14.

It is to be purely a vacation trip, and one that the Methodist pastor and his wife have been planning for a number of years. They plan to leave La Grande shortly after the Fourth of July, motoring by easy stages to Seattle by way of Mt. Hood. Boarding "The Queen," they will sail with a sight of land for all but a brief span of their journey, wending waters horizoned by Pacific islands.

Morning services at the First Methodist church will continue as usual during the month's absence of the pastor and his wife. Dr. E. L. Mills, editor of the Pacific Christian Advocate, will preach the morning of July 11, and that evening will address a union service at the Presbyterian church. Men of the congregation will be in charge of the morning worship hour July 18, and the following Sunday, Dr. H. S. Hamilton, of Boise, district superintendent, will preside. If Dr. Parker is not home by Aug. 1, he will arrange for a substitute to occupy the pulpit.

Dr. and Mrs. Parker came to La Grande from the First church at Boise about eight months ago.

Coasting is one of the first rules of gasoline economy. The following is a way to save gas and to coast with safety: Press out the clutch or shift to neutral when it is evident that at the next crossing the car will be obliged to stop. When putting up to the curb at points where no maneuvering is required to park, disengage and switch off the engine. When driving into the private garage shift into neutral, switch off the engine and coast to a stop.

A NATION-WIDE INSTITUTION—
DEPARTMENT STORES
106 Depot St., La Grande, Ore.

Being An Economic Factor In the Community Served
The true function of this Store, as we see it, is that of serving as a purchasing and distributing agent for the people of the community and the outlying districts.

When the merchant enters business he assumes the responsibility of performing a public benefaction—that of providing commodities and services to his community in a way that will afford economy and convenience and of maintaining such environment as is necessary and desirable to the consumers who support him.

If he fails in this responsibility, he ceases to be an economic factor in the community which he essays to serve.

Since the first Store in this Nation-wide institution of department stores was opened in 1902, the outstanding ambition has been to serve all the outstanding and well. That we have succeeded is proved by our rapid growth. In less than a quarter of a century we have become the World's Largest Chain Department Store Organization.

320 acres of rich black loam and every acre can be plowed, anything that grows in a temperate zone will grow here. Clean water, with ditches running to all parts of the ranch. The ranch is now in alfalfa, grain and wheat. The buildings are of the best—there being a well-built six-room house and barn.
