Surprise Party Honors Mrs. Howell

A social event of the week was a surprise party given Thursday for Mrs. Ren Howell, when Mrs. L. A. Howell and Mrs. Vernon Hull entertained in her honor, the occasion being her birthday anniversary.

Early in the afternoon friends gathered at the Howell residence on W avenue and from there together with the honor guest, were taken to the country home of Mrs. L. A. Howell, near Alice, where some time was spent with visiting and a program.

After the program the guests were conducted to the porch of the Howell home, where small tables had been arranged, decorated with wild flowers, the color being yellow. A two-course luncheon was served.

After luncheon the guests were returned to their homes in La Grande.

Mrs. Howell received many gifts with the best wishes of the 20 or more guests present.

Barth-Grant Nuptials Announced

Although solemnized 10 days ago, the marriage of Miss Carol Grant, daughter of Mr. and Mrs. Al Grant, of Baker, to Alfred Edward Bartholomy, better known by his baseball name, Al Barth, is just being announced to their friends.

The ceremony was performed at St. Rose church, at Monroe, Ore., Wednesday, June 23, by the Rev. E. J. Murano, a boyhood friend of the bridegroom.

Mr. and Mrs. Bartholomy visited with his parents at Portland and at the home of his brother in Eugene before they returned to Eastern Oregon. She is now at Baker with her parents. Mr. Bartholomy is in La Grande. He is associated in automobile business here with Harris French.

Announcement of the marriage recalls the meeting of the two young people at Baker a year ago when Al Barth, as catcher on the La Grande team of the Blue Mountain league, sustained a fractured skull in an accident on the diamond. During his long critical illness afterward, while for much of the time he was not expected to live, Mrs. Bartholomy was his devoted nurse.

Their plans for the future are still indefinite, but they probably will make their home in La Grande.

Plans Made for W. W. G. House Party

In anticipation of the house party for which the members of the World Wide Guild of the Baptist church in Oregon will gather at McMinnville, Ore., July 17, twenty La Grande girls held a pep meeting at the home of Miss Hazel Reuter last evening. An informal evening was concluded with refreshments. It was arranged to meet next Wednesday evening with Miss Bonnie Oliver.

Smile and the world smiles with you. Frown and the world laughs at you.

Minerva Says---

Why does THE BOOTERY sell so many shoes? There is a reason:

1st—The patterns and styles are the best in town.

2nd—The prices are less than other places, comparing quality, looks and good fit.

3rd—The people want the nicest and latest styles for the least money.

4th—New ones arriving every few days.

5th—We do sell them—that's why we have to buy.

6th—No cobwebs or fly-specks on these.

7th—All colors and all heels.

8th—Lots of sizes now. We know how to fit them.

Priced from \$5.00 to \$7.50 for the noblyst shoes in town.

THE BOOTERY

Pay Cash—that's why they are so cheap. We fired the bookkeeper long ago.

Red'll Get Along Without Her

Rosemary Deering, 17-year-old vaudeville dancer, is peevish at the famous Red Grange. Grange and his manager, C. C. Pyle, she charges, let her announce to the world that she would play opposite Red in his first movie, and then turned her down. She comes from Peoria, Ill., near Red's home town of Wheaton, and is now in Hollywood.

For the Waves

This hand-painted silk beach scarf and hood can be worn as a shoulder scarf or may be raised over the head as a hood.

Announcements

Social announcements may be printed in this column free of charge. Any announcements pertaining to any functions such as cooked food sales, etc., will be refused. Announcements to be printed the same day, must be in society editor's hands by 9:00 o'clock.—News editor's note.

Getting ready for the convention that will be held here in September, the drill team of the Ladies' Auxiliary to the Brotherhood of Railroad Trainmen will practice at the meeting of the auxiliary members at 7:30 p. m., Tuesday.

Sister Mary Says:

(By Sister Mary)

Breakfast—Halves of grapefruit, cereal, thin cream, poached eggs with spinach on toast, crisp rice toast, milk, coffee.

Luncheon—Scalloped asparagus, brown bread and butter sandwiches, graham cherry pudding, milk, tea.

Dinner—Canned salmon loaf, shadow potatoes, new peas in cream, radishes, lemon sponge pie, bran rolls, milk, coffee.

This cherry pudding is a really delicious dessert, but altogether too heavy for dinner. However, it's ideal for luncheon served with sugar and cream and almost a full meal.

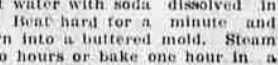

Graham Cherry Pudding

One egg, 1 cup sugar, 4 tablespoons butter, 1/2 cup molasses, one half cup hot water, 1 teaspoon soda, one half cup pastry flour, 1 1/2 cups graham flour, 1/2 teaspoon cinnamon, 1/2 teaspoon salt, 2 cups stoned cherries.

Cream butter and stir in sugar and molasses. Add egg well beaten. Combine flour, graham flour, cinnamon and salt and add to first mixture. Stir in cherries and add hot water with soda dissolved in it. Beat hard for a minute and turn into a buttered mold. Steam two hours or bake one hour in a pan of hot water in a moderate oven. Serve warm with sugar and cream.

Women live longer than men because of the sheltered lives they lead, a London specialist declares. He points out that of a total of 382 deaths of persons over 90 years old, 278 were women.

One Day's Work

Five medals, as many ribbons, and a big silver cup were one day's trophies of Julia Aman at the Washington, D. C., track meet for girls.

Fashion Notes

LONDON, July 3.—One of the ladies of the royal family has started a new fashion for women's evening wear.

She appeared in the Royal box at Covent Garden with a large ruche of rose-tinted tulle on her left shoulder instead of the ordinary posy of flowers.

Worn on the shoulder strap of her gown, the effect was striking and already many society women have ordered similar shoulder puffs for their evening gowns.

Recent revival of the Paisley or Spanish shawl for afternoon and evening wear has induced arbiters of women's fashion to look around for something fresh for the society dame.

They have gone back as far as Queen Anne's time for their ideas and devised a shawl very similar to those worn in Queen Anne's days. It is a small affair triangular in shape made of bright colored crepe de chine with fringes at the side.

Another old world fashion has been revived to enliven the monotony of modern high and low waist lines.

This is the adoption of sashes for evening wear hung from the shoulder to waist and finished

with a big loose bow.

Plaid sashes are very much in vogue, and mostly hang from the left shoulder to the right side of the waist line. Plaids also are being used in material for evening gowns but usually the plaid sash is worn over a simple flock of white or light colored material.

Artificial silk experts will earn the thanks of the modern miss by putting a new shower-proof stock on the market.

In this rainy climate city, girls either have to change their stockings after a journey to town or go the rest of the day with mud splashes showing on their flesh colored hosiery.

The new invention, it is claimed prevents mud and water from adhering and can be dyed any color.

HUBBY CATCHES WIFE

SAN FRANCISCO—Mrs. John Hunter plunged from a second story window supposedly in a suicide attempt. Her husband observing her act from the sidewalk below caught her in his arms. She was uninjured, but Hunter sustained cranial injuries and a broken shoulder.

Lifboats are now being fitted with small cabins, in which are installed wireless transmitting and receiving sets.

HEALTH

THE IMPORTANCE OF CLEAN MILK FOR BABIES

(By John Lovett Morse, M. D., Boston) Member Gorgas Memorial Institute

A marked decrease in the infant mortality has occurred during the last twenty-five years. It is due more to the decrease in the number of infant deaths from the diarrheal diseases, most prevalent in summer, than to any other factor.

The diminution in the number of deaths from the diarrheal diseases, while due, to a small extent, to better methods of feeding, is almost entirely the result of the improvement in the milk supply during this period. Evidence in favor of this statement is that the lowering in the mortality from the diarrheal diseases in infancy has been greatest in those parts of the country in which improvement in the milk supply has been most marked.

Not only has there been a marked diminution in the number of deaths from the diarrheal diseases coincident with the improvement in the milk supply, but also a tremendous decrease in the number of babies ill with these diseases. This lowering of the death and sickness rates from diarrheal diseases in infancy is so largely dependent on improvement in the milk supply that it is safe to assert that, if the milk supply is above reproach, few babies will be ill with acute diarrheal diseases and very few of these die.

The Gorgas Memorial Institute wishes to emphasize the fact that milk that is above reproach and safe for babies should come from cows which are free from tuberculosis and other diseases. The cows should be properly fed, kept in clean stables, be clean themselves, and be milked into clean utensils by healthy, clean individuals. The milk should be cooled at once and kept cool until it is delivered. It is up to the parents to take care of it then until it is given to the babies. Unless the milk is of the

"certified" grade, it should be pasteurized or boiled. Clean milk, suitable for feeding infants, is now obtainable in almost all of the large cities and in many of the smaller ones. The public health authorities and the physicians have done their part. They cannot, however, compel the parents of the babies to buy it for them. It is hard to understand why they do not. The charitable explanation is that they do not appreciate the importance.

Strange as it may seem, it is often more difficult to get clean milk in the country than in the city. Some of the reasons are, probably, that the health authorities are less active in the country, the demand smaller and the mortality and morbidity from an unsatisfactory milk less, because of the nearness of the consumer to the producer. Parents should demand, even in the country, however, that the cows from which the milk comes are free from tuberculosis and that the milk is taken in a reasonably clean

Light

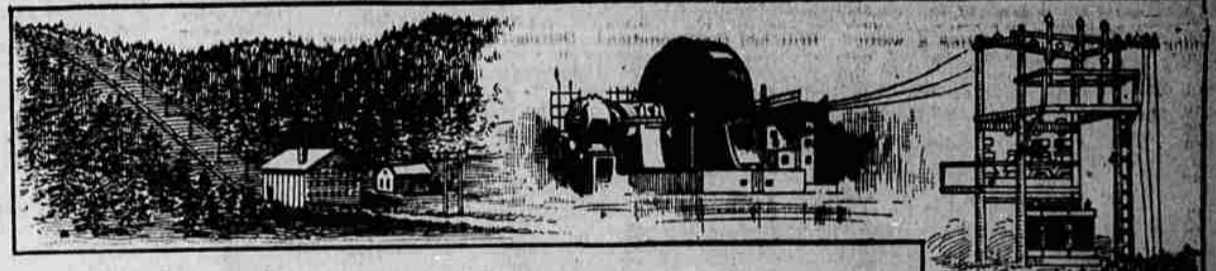

—have plenty of it. Extra outlets are inexpensive. Let us give you a figure.
