

NOW! *The* NEW MEADOWS

THE WORLD'S GREATEST WASHING MACHINE

The Reasons Why

THE WORLD'S SPEEDIEST WASHER

Wide, smooth curves of the 6 vane agitator force the greatest action of water currents. The Bakelite Agitator needs no replacement in a life-time. Unlike aluminum, water has no wearing effect upon it.

THE WORLD'S HANDSOMEST MACHINE

The graceful Udylite rust-proof tub with a rich Ebony Bakelite lid has an individual grace and beauty that at once sets it apart from all other machines.

THE WORLD'S EASIEST OPERATING MACHINE

Easiest on the operator—this machine adjusts with amazing ease to your height of the tub. All controls are instantly accessible and are immediately responsive.

THE WORLD'S GREATEST CAPACITY

Cleanses a 23-gallon tub of clothes in 4 minutes, 60 lbs. of family wash per hour. This amazing machine literally cuts in half the allotted time for washing.

THE WORLD'S SIMPLEST CONSTRUCTION

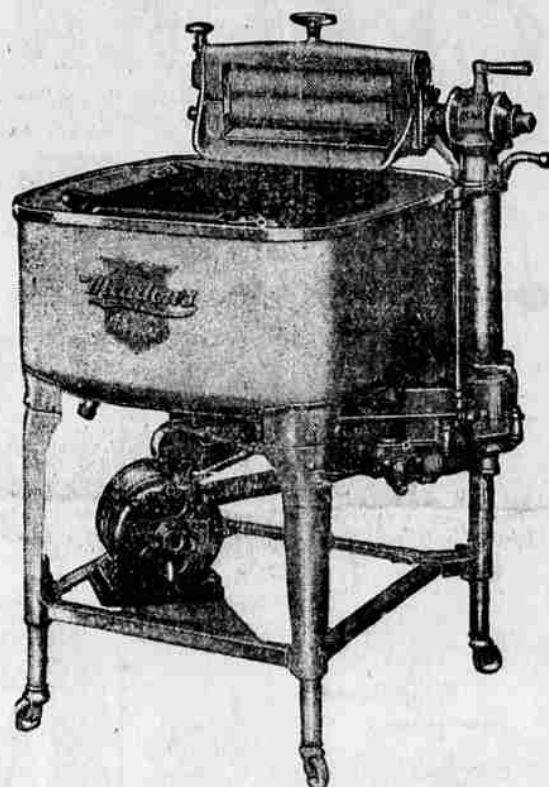

It is at once apparent that the more simple the construction—the more effective its operation. Any housewife will be delighted with its simplicity of operation.

THE WORLD'S ONLY FOOL-PROOF MACHINE

No oiling is ever required. All moving parts are enclosed. The wringer automatically stops when moved from position. There are no instruction books—they are not needed.

It is significant that the fastest washing machine in the world is the easiest on clothes. It is more significant that the one washing machine to combine both safety for the flimsiest materials, and speed in washing is also the handsomest mechanical washer ever offered.

Once you have washed with the Meadows Hydromatik you will be impatient with any other washing machine. From the moment you place clothes in the rust-proof Udylite tub until, barely five minutes later, you run them through the Meadows Automatic Safety Wringer, every stitch flimsy or coarse gets the quickest wash possible with a washing machine. At the same time, no mechanism has ever been found to be as easy on even the daintiest clothes as the 6 vane Bakelite Agitator used in the Hydromatik.

DO A WEEK'S WASHING *FREE*

We cordially invite you to do a week's wash FREE with the new MEADOWS.

Our demonstrator can show you in three minutes everything you'll ever need to know about the MEADOWS.

You have the guarantee not only of the Meadows Manufacturing Company, one of the largest concerns in the industry, but the guarantee of us, the local distributors for the new MEADOWS. Our personal integrity and reputation is behind it.

Phone us today. A week's wash-washing FREE. And liberal terms for those who wish to add the new MEADOWS to their homes.

Mechanically Perfect

THE TUB

The tub and frame is made of Udylite—a non-corrosive metal, absolutely rust-proof, that holds the heat of water 4 times as long as the aluminum tub and 7 times as long as the copper tub.

THE WRINGER

Metal parts rust-proof with attractive Udylite finish. Fool-proof 100 per cent. The operation ceases when changing position. Semi-soft roll wringers adjustable to any roll pressure from delicate lace to blankets. Easy on buttons.

THE AGITATOR

This lightweight, scientifically constructed, 6 vane agitator is the secret of this machine's speed in washing. Gets the maximum pressure of water through clothes without tearing the flimsiest garment. The agitator is made of Bakelite which makes it absolutely impervious to wear. Its smooth surface eliminates any wear in clothing.

THE BEARINGS

Oil-Less! Constructed with graphite impregnated Bakelite bearings which insure life-time smooth operation without a drop of oil.

THE FRAME

Made of Udylite—non-corrosive, rust-proof metal. The strongest and safest construction known. Adjustable legs that make the tub at once just the right height. Mounted on easy rolling casters—the machine can be moved with a hand.

THE CAPACITY

The tub is 4 gallons bigger—The washing action is speedier—The agitator is larger and has two more vanes—and yet this machine takes up but 24 inches of space.

Water has no wearing effect on Bakelite. The wide curved vanes in the Hydromatik whirl water at phenomenal force for a life-time. Yet unlike aluminum agitators whose blades are often worn to a knife-like edge, daily service for 20 years would not effect a split-hair's difference of the Hydromatik Bakelite Agitator.

The attractive Bakelite lid, as well as the Agitator, is of rich ebony color. The steel tub is in delightful dull grey finish with polished fittings.

No washing machine you would seriously consider buying costs less than Hydromatik. Very liberal time payments can be arranged, too.

We will be glad to leave a Hydromatik at your home. Wash with it yourself and if it fulfills our promise of a service, liberal terms will be extended if you decide to keep it.
