Speaking of Tourists—

Florida is a fine country, but home's best, mused "Chink," handsome feline, after getting lost from his owner, George Shumard of Marietta, Ga., at Hollywood, Fla., last May. "Chink" struck out for Marietta on foot—and the other day, lean and weary, he got there. He's pictured with his mistress.

HEALTH

KEEP YOUR NOSE, THROAT AND EARS HEALTHY
By Frank Albert Burton, M. D., San Diego, Cal.

Member Gorgas Memorial Inst. Your nose, throat and ear are among the most important organs of your body.

Through statistics of reliable clinics, it has been determined that over 80 per cent of the points of chronic infection of the whole body are in the head. Even headache, toxemia and stomach symptoms are often caused by some head infection. This shows the importance of keeping these organs in a healthy condition.

The nose prepares the air for its passage to the lungs; is necessary to the senses of smell, and taste; a cavity of drainage for the bone pockets (sinuses), and the tears; provides ventilation and drainage of the middle ear; is useful in swallowing and important in voice resonance; is defensive against harmful gases and vapors.

In the nose there is special provision for purifying, moistening and warming the inhaled air. Germs of tuberculosis are frequently found trapped in the front part of the nose.

To protect the ears when swimming, or from nose or throat infection, do not close either nostril in blowing the nose. To use hankerchief, simply hold in contact and hold wetting hat.

White Is Again Favored by the Charming Bride

By the Associated Press

All-white wedding again are fashionable. One was chosen by Miss Joan Southey for her marriage to the Master of Falkland. Her dress was of "moyen age" white satin with a beautiful train embroidered in madonna lilies. She wore orange blossoms in her hair. Her nine young bridesmaids were attired in white frocks and wore wreaths of jasmine in their hair.

NOSE THINNER
Feminine whimsy again asserts itself in the sudden return to winter fashion of the thinness of thin black and gun metal silk hose. Men have a look and a shrug for the rather exposure of the expensively fur coated young ladies on New York's Fifth Avenue, whose legs shiver in a covering of goose-fat and a 44-degree sublimar that is lighter than a chiffon veil.

HAT'S GOLDEN CROWN
Woman has found a new golden crown in this year's vogue for a bit of gold metal that is banding many of the smart winter hats. This recent crown of fashion is in the form of a closely woven strap, of fine mesh gold metal, with a buckle fastening in the front or on the side of the hat that wears it.

with the nose. A child, until wrongly taught by some adult, always blows its nose correctly. Pain in the ear should have prompt, expert attention. Delay is dangerous. Chronic running ears, even in the absence of pain, should not be neglected. Sinusitis as well as tonsillitis sometimes contain the germs of diphtheria or meningitis. In such a case the individual is known as a carrier. A carrier may spread disease yet be immune to it himself. In the interest of your general health and efficiency, remember that your nose, throat, and ear are among the most important organs of your body, and as such, are entitled to your serious consideration, protection, and care.
