The guests, accompanied by Mrs. B. M. Durland, left the Durland home in La Grande at 7 o'clock in the evening. A number of the boys of the party, dressed in hiking clothes and armed with snow-shoes, went ahead of the cars to make a way through the snow-drifts. It was 10 o'clock before they reached the Wallsinger home and telephoned their anxious parents to tell of their arrival.

All was silent, except the muffled sound of a phonograph, which Jack Durland, feeling his responsibility as joint host, kept going until daylight, when Mrs. Wallsinger and Mrs. Durland served breakfast, consisting of baked potatoes, sausage cakes, hot biscuits and grape marmalade.

After breakfast the shovelling gang went out again and about noon the happy crowd was on its way to La Grande.

You take the deadening felt that is manufactured by the Paraffine Company, known by most people as the Rubberoid as they also manufacture the Rubberoid roofing, this deadening felt that I mentioned is very soft and pliable. If you seal a house inside with some kind of dry material that is narrow in width you can be assured of a good job by pasting the deadening felt on and not having it crack all to pieces. Quite a number of people in town have even put No. 2 pine batts tight together and pasted the deadening felt over the batts with good results. Your Uncle Claude did the same with his house.

People in ordering coal now call up and say, "Send up a ton of the Royal at \$10.50 or a ton of the big lump Royal at \$12.50." We haven't had any complaints about the coal being clean and hot. One lady did call up and said she found too much fine coal in the big lump. We told her that it was no doubt caused when he had 2 deliveries going at once, but we would make it right. Anyone else that has any complaints tell us about it. If you like us tell others; if you don't like us tell us.
