MENUS

By Sister Mary
BREAKFAST—Sliced canned pineapple, cereal, thin cream, whole wheat toast, smoked haddock on toast, milk, coffee.

LUNCHEON—Baked vegetable soup, croquettes, whole wheat lettuce sandwiches, stuffed apples, milk, tea.

DINNER—Veal steak en casserole, potato marbles in pineapple sauce, spinach salad, chocolate bread pudding, whole wheat bread, milk, coffee.

Children under school age should not be served the fish suggested in the breakfast menu. With this exception they may be given any of the dishes planned for the day. Be sure that every child up to ten years of age drinks or receives in one way or another at least three cups—one and one-half pints—of milk daily.

The stuffed apples may be just the dessert you are looking for to serve to your card club in place of ice cream. If you use them for a "party" place each apple on a round foundation of sponge cake.

Stuffed Apples
Pare and core smooth apples of a uniform size. Cook in heavy sirup to which the juice of one lemon to each cup of sugar has been added. Baste apples and cook very slowly and carefully to prevent them from breaking. When the fruit is tender and clear remove from sirup and chill. Cook sirup down until thick enough to jelly. Combine equal parts of chopped nuts, seeded and chopped raisins and orange marmalade

with the jelled sirup and fill cavities of apples with the mixture. Mask each apple with whipped cream slightly sweetened and flavored with vanilla. A cube of bright red jelly or a maraschino cherry can be used to garnish the dessert.

HEALTH

THE TRUTH ABOUT "POISON," OR "INWARD GOTTERS"
By Simon Levin, M. D., Houghton, Mich.

Member Gorkas Memorial Inst.

When people complain of a gradual weak feeling accompanied by loss in weight, palpitation (rapid heart), trembling, loss of nerve, especially if they reside in the so-called goiterous districts, it becomes high time a competent medical examination should be sought. Again, if the necks of these patients contain enlargements, goiters, it is especially imperative to seek medical advice. The eyes may or may not protrude, depending upon the type of disease of which I am speaking.

Furthermore, it is now a known fact in medicine, that the nodular goiter, which was only distinguishing for years, may at any time precipitate poison symptoms that are distinctly manifest, especially at 30 years and above, and in the female during the change. The poison goiter occurs in the male as well as the female, although in the latter more frequently.

These symptoms are, in some poison goiters, called toxic goiters by doctors, accompanied as just stated by the protrusion of the eyes. This type is considered more severe and more acute while the other type is more insidious.

Many of the laymen have friends and neighbors who have

fallen victims to these symptoms and the dangerous disease they signify. The danger of the continuance of the disease too long should be thoroughly understood, because vital organs like the heart, liver, kidneys, and especially the nervous system may become so diseased, so injured, that full recovery is impossible.

It is well to understand that the thyroid gland is the normal gland tissue about the wind pipe or trachea at the base of the neck. Any enlargement of this normal gland, at all, is called a goiter.

Though only a small proportion of people who have goiters develop "poison goiter" condition, it behooves us to be on guard because the results of neglect and postponement are so terrible.

In goiterous districts, goiter hearts are more common than is generally believed. They impart a definite physical deficiency with

all the dangers accompanying heart disease that laymen know. Many a sudden death could be attributed to the "goiter heart."

Instituting early active proper treatment is the only safeguard we have in order to avert the crippling wreckage and death from this "poison," or so called "inward goiter."

GOVERNOR'S DAUGHTER MISTRESS OF MANSION
Mary Fisher, 28-year-old daughter of Pennsylvania's new governor, John S. Fisher, is the youngest mistress of the Harrisburg executive mansion in its history. Her mother died seven years ago. Mrs. Fisher's favorite recreation is riding her horse "Traveler." She did not take the horse to the Pennsylvania capital but was accompanied by her two Scotch terriers, "Nip" and "Tuck."

WOMEN ACTIVE HEAD OF LARGE COMPANY

Miss Helen McCabe is an exhibit of the debate over the question, "Home or Career." At 29, she is president and general manager of a Cincinnati lumber company, operating 40 mills. She is a bachelor of arts, bachelor of law and certified public accountant.

Yet, while attending a Memphis convention of lumber executives, she expressed the opinion that a college education is not an essential of a successful business and men should not have business vocera.

MORE FLOWERS USED BY WOMEN IN BERLIN
Berlin women are using flowers perhaps more freely than ever this winter for household decorations and personal adornment. The somewhat improved economic conditions have helped what might be called the luxury business of the flower merchants as they have the other so-called luxury trades.

WHICH OF THESE THREE PLACES DOES YOUR FUEL DOLLAR GO:

Out of the chimney as smoke; out to the alley as ashes;—or into your home as warmth and comfort.

Now of course you can find out which coal keeps the most of your fuel dollar in the home by experimenting.

but experiments are costly because what doesn't go into the home as heat goes up the chimney as smoke and is carried up the furnace stairs as ash.

BURN ABERDEEN COAL and carry less ashes out and have more heat and less smoke.
