## Mothers Look

for the Quaker's picture when buying oats.

That means richer flavor

When children say they don't like oats, it's usually because rich Quaker flavor is missing.

Children who ordinarily don't take to oats are often quickly won to this important food, simply by giving them "Quaker."

The flavor is uniquely different; toasty, rich and creamy. Quaker Oats alone has it. Some 50 years were spent in perfecting it.

Quaker milling, too, retains much of the "bulk" of oats. And that makes laxatives less often needed. Thus protein, carbohydrates and vitamins and "bulk" combine in making Quaker Oats an excellently balanced ration.
