

ELGIN TEACHERS NAMED BY BOARD

E. E. Arant, of Freewater, Will Head Schools in Coming Term

ELGIN, Ore., Apr. 22—At the meeting of the Elgin school board held recently, the list of teachers for the Elgin schools was practically completed. The tentative line-up for the grade teachers is as follows: First grade—Miss Stella Mayfield. Second grade—Miss Glea Slav. Third grade—Mrs. Nellie Cruikshank. Fourth grade—Miss Mildred Schorn. Fifth grade—Miss Dorothy Maxwell. Sixth grade—Miss Flora Cruikshank. Seventh grade—Miss Louisa Bixby. Eighth grade—Walter Darron. The high school teachers employed are: E. E. Arant, superintendent; Mrs. Charles Cross and Miss Gertrude Dawes.

Miss Flora Cruikshank is an Elgin girl, but has been teaching at Merrill, Oregon, during the past year. Miss Dorothy Maxwell is the daughter of Postmaster and Mrs. O. C. Maxwell. She was graduated from the Elgin high school in the class of 1925. During the past two years she has been attending the Oregon Agricultural college and, later, the state normal at Monmouth. Miss Louisa Bixby has been teaching at Freewater during the past term. Walter Darron, of Cove, has been attending school during the last year.

Miss Gertrude Dawes will come to Elgin from Bozeman, Montana, where she has been attending the Montana State college. E. E. Arant, the superintendent for next year, comes to Elgin from the Ferndale union schools, of Unadilla county. This district is located near Freewater. Mr. Arant is a native of Baker county.

Mastodon Tusk Is Found Near Nampa

NAMPA, Ida., Apr. 22 — Employees of the Nampa highway district unearthed a portion of a huge tusk believed to have been that of an ancient mastodon, while working in the Warren gravel pit near Nampa, about 15 miles from this city. The find was made by Paul Mouser of Melba, a foreman.

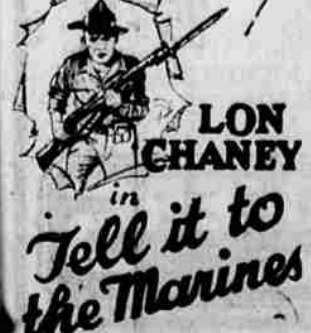

The relic measures four inches in diameter and is 22 inches long, and is only a portion of the original tusk, a clean fracture showing where machinery used in excavating had broken the tusk. Workmen believe that possibly a complete skeleton lies under the lava gravel but a cavern has covered the point at which the find was made. This pit has been prolific in bones of ancient animals, large and small. Usually they are dumped into trucks and form part of the material used to surface roads. Other finds in this pit include horns of what are believed to have been small horses, not more than three feet high, the bones indicate, and huge leg bones from prehistoric giants.

Mountain of Salt Will Be Mined

SALT LAKE CITY, Apr. 22 (AP)—Utah's mountain of salt, out of which was quarried its famous salt palace many years ago, is soon to be marketed. Owners of the mountain, who say it contains more than fifteen million tons of salt, have applied for a permit to build a two-mile railroad for the transportation of the mined products. Father Escalante, Jesuit priest, who, history says, was the first man to set foot in the territory that is now Utah, visited the mountain on his journeys, and General Fremont in his frontier campaigning made frequent journeys there to replenish the salt supplies for his troops.

U. S. Department Studies Radio Needs of Farm

WASHINGTON, Apr. 22. (AP)—If the farmer is not getting enough variety in his daily radio programs, the department of agriculture will soon find out. It has addressed a questionnaire to about 3,000 farm owners in a scattered area to determine whether a more diversified radio service is desired, and if so, just what is wanted to make the dawn to dusk chores a little less monotonous. Latest reports compiled by the department's radio service show that nearly 100 radio stations in 35 states are now broadcasting government crop estimates and market reports and that between one and two million farmers benefit by these programs, which usually are transmitted in the daytime. That the man behind the plow is a strong advocate of further development of this service is indicated by the fact that one station in a recent six months' period received more than 5,000 letters of commendation on the market programs from farmers, country

House Wrens Like Larger Doorways

WASHINGTON, Apr. 22 (AP)—The idea that the entrance to a nest box for house wrens mothered by the farmer's wife should be only the size of a quarter has been proved a bad one by the federal biological survey. The tiny bird, it says, prefers homes having from 1 1/4 to 1 1/2 inch doors.

Rejected sulfur tries to commit suicide, but swallows quinine instead of poison. Proving that it is bitter to have loved and lost. Now that the coal miners have gone on strike, would it be too much to ask the gold diggers to follow suit?

Pair Devise Technique For Deep Sea Natural Color Photography

WASHINGTON, Apr. 22 (AP)—Natural color photography beneath the surface of the sea is the achievement of Dr. W. H. Longley, ichthyologist of Goucher College, and Charles Martin of the National Geographic society. Finding that the ordinary autochrome plate would not register the moving life under water, off Dry Tortugas, of the Florida Keys, the scientist and the photographer developed a special technique. After hypersensitizing plates, to reduce the exposures to one-twenty-

tieth of a second, they were able to make photographs in shallow waters. That left the gorgeous parade of color that lies deeper still a baffling problem, for after going down 15 feet or more, even the hypersensitized plates did not give satisfactory results. A raft was rigged up to support a heavy charge of flash-light powder, to add its brilliance to the sunlight. The problem of synchronizing the flash with the camera shutter was solved, and it

was discovered that autochromes could be made by that method without the necessity of hypersensitizing the plates. A scheme had to be devised to enable the diver with the camera to pull the powder raft along as he hunted for the right subjects and to set off the explosion at the right moment. A dry-cell electric storage battery was used, but the setting of the electrical connections within a few feet of the pound of magnesium powder was a hazardous undertaking. On one occasion, Dr. Longley was badly burned and incapacitated for six days by a premature explosion.

Almost time for the spring port to see his shadow.

World's Quickest Hot Breakfast!

QUICK QUAKER

Quick-cooking oats with that wonderful QUAKER flavor—quicker than toast! Ready in 2 1/2 to 5 minutes!

Advertisement for Schilling Tea. Features an illustration of a woman in a dress and a child. Text includes 'The only tea whose flavor is completely protected - kept fresh and fragrant from tea-garden to tea table. Five kinds of protection - all exclusively Schilling - for the true tea flavors known only in the Orient: (1) Twice-toasted - the only way to unmask rich hidden flavors of a tea leaf. (2) Then the leaves sealed in vacuum (like your coffee) - but sealed HOT at its most aromatic moment. (3) The world's only key-wind vacuum tin for tea... with a Snug Cover... to protect it even after you open it. (4) Of the many grades of Orange Pekoe, only the choicest, most fragrant, are blended with Pekoe in Schilling's. (5) Your grocer protects you - he returns your money instantly if you don't like Schilling's best. You keep the tea. Orange Pekoe. Also Green Tea (Japan)'

Advertisement for Tru-Blu Graham's. Features a cartoon character with rosy cheeks and a speech bubble that says 'You say my cheeks are rosy red, I'll tell you how that came. My mother always made me eat Honey-sweetened'. Text includes 'Tru-Blu Graham's For Smiling, Red-Cheeked Girls and Boys who are full of pep and fun and noise, there is one food that brings them joys—in health and strength and vigor and poise. That cracker is Graham's from Tru-Blu. They're good for kiddies and they're good for you. They build up muscle, bone and sinew—and make you feel the strength that's in you.' Includes an illustration of a box of Tru-Blu Graham's and a glass of milk. At the bottom: 'TRU-BLU BISCUIT CO.—Spokane, Portland, Seattle'
