

SOCIETY NEWS

Presbyterian Society Meets At Snook Home

Members of the Westminster society of the First Presbyterian church enjoyed an interesting meeting last evening, when Misses Alice and Emily Snook and Mrs. H. L. Stronking were hostesses to the society at the Snook home on M Avenue.

Entertain Members Of Bridge Club

Mrs. Carl J. Doulhan was hostess to the members of the Jolly Bridge club Monday afternoon at her home on M Avenue. Three tables of bridge were enjoyed during the afternoon, high score among the club members going to Mrs. William Wilson, and the guest prize to Mrs. A. M. Smith.

Miss Gertrude Taylor, who has just returned from the United States from China, where she spent 18 years as a missionary, was a guest at the meeting and gave an interesting talk on conditions in China and her experiences while there.

Mrs. L. C. Bowser led in the devotional. The Rev. J. George Watz, new pastor of the Presbyterian church, spoke briefly.

During the business session, which was presided over by the president, Mrs. Richard C. Thomas, plans were made for the next meeting of the society, which will be the last this season. This meeting will be in the form of a picnic and will be held at the home of Mrs. H. G. Avery at Island City.

A sociable followed the business meeting, when the hostesses served refreshments. About 25 persons attended the meeting.

Members of Grande Ronde Circle Neighbors of Woodcraft, No. 47, are making arrangements today for a special meeting this evening, when the Neighbors of Woodcraft circles from Enterprise, Pendleton and Huntington, will be the guests of the local lodge. Between 70 and 80 visitors are expected.

The meeting will be held at the Knights of Pythias hall. Dinner will be served at seven o'clock for the visitors only. A business meeting and sociable will take up the remainder of the evening.

Neighborhood Club To Meet on May 17

Because the date set for the annual meeting of the La Grande Neighborhood club conflicts with the dates of the state convention of the Oregon Federation of Women's Clubs, to be held at Bend, it was decided yesterday by the local club to hold the annual meeting next Tuesday, May 17.

Officers will be elected and installed at that time and committees appointed for the next year.

An interesting program of piano numbers has been arranged for tomorrow evening, May 12, when Miss Gladys E. Miller will present her piano students in recital in the library auditorium.

Seventeen beginner and intermediate music pupils will take part in the program, which will begin at eight o'clock. The public is invited to attend.

Following is the program to be given: "The Hoppy Road" by "Two Little Frogs"; by Cramm; "Wing Foo"; by Burleigh; "Grand-Schaefer and a Sudden Shower"; by Cadman; "Melba Shepherd"; "From A Tama Pow-wow"; by Mokrejs; "Clayton Fox"; "Wooden Shoe Dance"; by Rogers; "Wanda Berry"; "Valse In A Minor"; by Grieg and "Betty's Music Box"; by Bond; "Patricia Jesse"; "Fencing"; by Ewing; "Baby Huron"; "Dance of the Gnomes"; by Polakoff; "Natalie Ebert"; "Summer Reverie"; by Forjussen and "Joyous Peasant"; by Schumann; "Agnes Collins"; "Valse"; by Dennee; "Jaquette O'Brien"; "Fireflies"; by Grant-Schaefer and "Rendezvous"; by Aletter; "March from Faust"; by Gounod-Krug; "Clara Norris"; "Of Strange Lands and People"; by Schuman; "Pay Hamilton"; "Moonlight on the Lagoon"; "Primi; "Mars-Jette Gore"; "To the Rising Sun"; by Torjussen; "Oriental Dance"; by Leth and "Nortune"; by Greig; "Frances Keith Wallace"; "Clocks in the Tea House"; from "In A Chinese Garden"; Grant Schaefer; "Irish Lullaby"; by Barron and "Marche Militaire"; by Schytte; "Thelma Strain"; "Birding"; by Greig; "Curious Story"; by Heller and "Shepherds All and Maiden Fairs"; by Nevin; Jane Ravenscroft.

COVE (Special)—Mr. and Mrs. T. C. Hefty entertained at a dinner party Friday evening, complimenting Miss Ruth Jones, of Manila, Philippine Islands, who has been visiting here with her sister, Mrs. J. E. Mills. Covers were laid for six and after dinner the evening was spent visiting.

Bouquets of apple blossoms, carnations and snap dragons were used to decorate the room. Following the afternoon's play the hostess served a two-course luncheon.

Bouquets of apple blossoms, carnations and snap dragons were used to decorate the room. Following the afternoon's play the hostess served a two-course luncheon.

The club will meet again Monday, May 22 when Mrs. L. H. Bramwell will be hostess at a one o'clock luncheon.

Mrs. L. M. Hoyt and Mrs. Nate Zocoffel were hostesses at an attractive bridge party Monday evening at the home of Mrs. Hoyt on Main Avenue.

Four tables were at play during the evening. Mrs. E. H. Boyten making high score among the women players. The men's prize went to L. H. Bramwell and the consolation prize to Mrs. Ward Fowler.

The rooms of the Hoyt home were decorated with bouquets of apple blossoms. A two-course luncheon was served following the card games.

COVE (Special)—Mrs. A. H. Orton was hostess to the Young Matrons' Bridge club Saturday afternoon. Bridge was played at three tables. Miss Bess Kelly making high score. After the games luncheon was served.

NATURALIST'S WIDOW CARRIES ON HIS FIGHT

ESTES PARK, Colo.—The title of "militant crusader" has been conferred upon Mrs. Enos Mills, wife of the famous naturalist for carrying on her late husband's fight with the Colorado assembly. Years ago, Enos Mills, known as a lover of nature, started his struggle against governmental supervision over Estes Park of which he was one of the developers. The question of the state ceding exclusive jurisdiction over the park to the federal government was one of the paramount issues at the recent session of the Colorado general assembly. Mrs. Mills, continuing her husband's activity, appeared before joint sessions of the assembly and before various committee meetings.

When the bill finally was killed in the closing days of the session, many of the legislators who voted against it praised Mrs. Mills for her successful efforts.

Sweet corn, string and lima beans, tomatoes, carrots, turnips, beets, onions and cucumbers are easy possibilities if the garden doesn't get started till the fourth of July in any except the northern tiers of states. Even August 1 will produce some good vegetables, so inability to get an early start is no reason for not having a vegetable garden.

The late started garden will need better cultivation at the start than a garden started in April because the warmer weather will make the soil dry out faster and the finely pulverized surface will retain moisture which was more plentiful

EARLY START—The Duchess of Abercorn, wife of the governor of Northern Ireland, heads the girl guide movement in Ulster. Her interest in the movement brings her to frequent functions and she often inspects girl guide troops in Ulster.

Like Mrs. Herbert Hoover in the United States, she feels that the girl scout and girl guide movements are responsible for making better wives and mothers.

Stuffed Tripe
One and one-half pounds tripe, 1 small onion, 2 teaspoons butter, 1/2 pound bulk sausage, 2 tablespoons chili sauce, 1 teaspoon salt, sifted cracker crumbs, egg.

Wash tripe through at least three waters. One teaspoon baking soda and be added to the last washing. Put tripe into stew pan, add boiling water to cover and simmer at the boiling point for one hour. Drain. Dry as thoroughly as possible. Melt butter and add onion finely minced. Cook onion until a straw color. Add to sausage with chili sauce and salt and work until a smooth paste is formed. Cut tripe into oblong pieces about 3 inches wide and five inches long. Spread with sausage mixture and roll tightly. Fasten with wooden tooth-picks. Roll in cracker crumbs, dip in egg slightly beaten and roll again in crumbs. Drop into deep hot fat and fry until rolls are a golden brown on all sides. The fat should be hot enough to brown an inch cube of bread from the soft part of the loaf in sixty seconds.

Serve tripe with shredded cabbage and pimientos dressed with French dressing.

Pocketed

The quaint charm of this new chemise of lowered white glove silk is in its two little pockets. It is trimmed with bands of apricot silk.

OUT OUR WAY

MOMENTS WE'D LIKE TO LIVE OVER. THE INTELLECTUAL.

The Garden

Beans and tomatoes are the small patch and a late start. Beans and tomatoes, theoretically, will bear until frost, but the first plantings will be found wanting along with the first of September, when the beans will dwindle in output and the tomatoes will be small and few. Later plantings will be necessary in the garden started early, and the late plantings will be in full bearing at this period.

Tomato plants can be set out in July from seed planted in early June, and give good fall crops when older vines have ceased to be at their best.

HEALTH

WOMEN MUST BE ON GUARD AGAINST CANCER

By Simon Levin, M. D., Houghton, Mich. Member Gorgas Memorial Institute

In the past it has been customary to blame to the "change of life" all the irregularities of the menses. In fact, this "change" received the blame for any alteration in health or actions that the women of the past suffered during that important period beyond 40 years of age, when nature wished only to end their reproductive life. No other fallacy or error in the judgment of health and disease has caused so much sadness, suffering, and untimely death as this one. This article deals only with one important sign—i. e., excessive or irregular flow.

When any woman, whose age is above 30 and whose menses have been regular, has any interruption or disturbance of any sort, a proper medical investigation should immediately be demanded. This applies as well to the unmarried women as to the married ones.

Of late it is becoming no uncommon experience for the surgeon to find unusual numbers of unmarried women subject to tumors of the uterus. We grant that these tumors many times are benign in nature, not always cancerous, but let me impress upon you very strongly that they may at any time become so, and there are many fatal complications that may arise at any time to make them very dangerous as they attain great size and irregularity.

Degeneration like turning into cancer, the growth existing itself, becoming infected and causing adhesions to important abdominal organs are dangers that may arise in the life of any growth. We cannot tell, until it occurs, just when a benign growth becomes cancerous—or becomes mechanically dangerous when it still rests within the patient.

Again, fast growing cancers of the body of the womb may attain great size and be beyond surgical or medical care if delayed. Just remember, size is no method of judging the danger of a growth; it is the degree of malignancy, its degree of power to grow locally or

WALLOWA PERSONALS

WALLOWA, Ore. (Special)—P. A. Downing who is milking a herd of 17 cows at his farm in the Leap section, has ordered a new milking machine and expects to have it installed during the next few weeks.

Ted Maxwell, for many years a resident at this end of the valley, but now raising stock on Crowe creek, was a recent visitor in town. A number of farmers from this end of the valley have been called to Enterprise for jury duty during the coming week.

Jim Bright, who is working for Oscar Maxwell, experienced a thrilling time for a few minutes Monday morning when an eight-horse team hitched to a gang plow took fright and ran away with him. The runaway continued for a couple of hundred yards until part of the horses in the team were thrown down. The plow was turned over several times and damaged.

Charles Klinghammer and wife, of Leap, were visitors here the first of the week.

P. A. Downing and wife were visiting here recently.

A few farmers have commenced plowing summer fallow at this time. Weeds have made a good growth despite backward weather and much of the foul stuff is being killed by the plowing. The soil is too wet in most of the fields yet to plow good.

Mrs. Ed Bell and daughters, of Whiskey creek, were visitors here Saturday.

Quinten Lathrop, who attended high school here during the winter, was busy the last of the week moving his hatching outfit home.

Mrs. J. B. Gastin and son Roy, were visitors in town the last of the week.

H. O. Anderson and family spent

the rest of the body.

You can readily see how desperately important is proper examination by a competent medical man early in the disease. Furthermore, the earlier these conditions are cared for, the more your chances of a good result. Complete removal surgically, and treatment by radium or X-ray are your only assurance of cure.

New Wonderful Face Powder

Thursday evening visiting at Mrs. Gastin's. A number of children were in town here. The weather here is a very mild form.

L. V. Lathrop, who attended high school here during the winter, was busy the last of the week moving his hatching outfit home.

Mrs. J. B. Gastin and son Roy, were visitors in town the last of the week.

H. O. Anderson and family spent

the rest of the body.
