PARIS—The midwife of Paris and the factory girl of New York have never been closer, admit their ideas than they are today, for the little French working girls have even taken to chewing gum. The midwife's idea of pinching each of her boob has brought much criticism from the anti-furor element in France. But the worn harlot her way does not bother Miss Midwife who enjoys being taken for an American whose freedom and economic independence she envies.

PUPPY LOVE RESULTS IN ELOPEMENT

Miss Peggy Green (pardon us, Mrs. Norval Terrell), age 19, is sure that her elopement with Mr. Terrell, age 21, is not a "puppy love" affair, even though Peggy does play with puppies, as shown in the picture above. Miss Green, daughter of Governor Fred W. Green, of Michigan, became Mrs. Terrell after a four-month courtship. The couple eloped from Michigan State college at Lansing, to Bowling Green, O., where they were married. Parents of both have blessed them. Terrell, who is a M. E. C. student, is the son of a Detroit investment broker. —NEA, Detroit Bureau

THE SPICY NASTURTIUMS
A bowl of flaming nasturtiums on an outdoor table is in contrast with the furniture. It is an unobtrusive, but a favorite thing back to the great-grandmother of the present generation. Its gorgeous coloring and mild taste of its soft, delicate shades, together with the spicy fragrance and the most adapted leaves with the stem in the middle, make a handsome bouquet without the addition of other flowers or greenery.

It is a fine plant for poor soil. In fact, only moderate fertility should be furnished. The nasturtium or it is prone to run largely to leaves. Stop it must have, and it reveals in the form of dark, bluish, bluish with frost blanches the foliage. The color runs from almost white black through to dark blue and purple, with yellow, orange, red, scarlet and other shades. With many handsomely colored varieties.

The spicy nasturtium for beds and edgings and the tall, upright variety to sprays over fences or to be trained on poles or to drop from window boxes are ideal subjects. The nasturtium has been described as "not children, but very long plants." This is accurate. They certainly strike home as a fountain of foliage, but the stem reaches to southern end, and it is a slender, it is wanted, it must be cut in a regular time to time. It is by nature a tender and a sprayer.

There are five leaves and variegated leaves types, as well as types with fringed leaves. The leafy stems of nasturtium plants are in demand for the brilliancy of its flowers, which are found what smaller than the standard type. The main stems are well better than the others and responds with extra length of stem.

The dwarf Nasturtium is unique in having no two flowers on a plant having no two, all being clustered and grouped. Clusters of gold, with brilliant yellow foliage, are often used as a foliage plant. The intense scarlet flowers with the brilliant yellow foliage, with an intense red color in the garden.
