

LINDBERGH HAD FIVE SANDWICHES

Started on Trip Like Boy on Picnic—Plans on a Flight to Australia

NEW YORK, May 21 (AP)—Take a boy bound for a day's picnic "Lucky" Lindbergh took five sandwiches to see him through to Paris.

H. T. Mahoney, the 26-year-old president of the Union Air Lines, builders of his plane, the Spirit of St. Louis, today told of the young flyer's food supply.

"He is carrying two ham sandwiches, two roast beef sandwiches and one hard boiled egg sandwich. I had to press the last one on him. He said four would be enough."

Two Canteens of Water

"He carried two canteens of water, about four quarts in all, but no coffee or liquor. I had a thermos bottle filled with coffee, but he refused to take it. He never drinks or smokes."

As resorts ration he took small cakes of highly concentrated food sufficient for one week. The plane had a device for making water out of one's breath.

"We were anxious for him to take more food and we tried to talk him into it before he took off," said Mahoney, "but he insisted and said what he already had would last him a month."

"He carried no life preservers and no parachute, and so far as I know he carried no special insurance. The plane is not insured. He carried two flares which could be used as a signal for aid in the event of a forced landing."

AUDACIOUS AMBITIONS

ST. LOUIS, May 21 (AP)—Ambitions more audacious than the New York-to-Paris flight, are cherished by Captain Chas. A. Lindbergh, who has planned to be the first man to fly from the United States to Australia. It was said here last night by Harry A. Knight, one of the backers of the youthful aviator pilot. First, however, Lindbergh planned to return here and attempt to break the endurance record, Knight said.

The Australian flight, Knight pointed out, would carry the flyer over more than 8500 miles. He would cross the equator and fly over many groups of the south sea islands if the project were attempted.

Plans Two Hops

As Lindbergh planned it, the flight across the broadest of waters, the Pacific ocean, would be made in two hops, the first from the U. S. to the Hawaiian Islands, and the second from Honolulu to the western coast of Australia, slightly above Sydney.

Railroad Workmen Will Start Work

BEND, Ore., May 21 (AP)—Departure of a crew of workmen to establish a construction camp, and arrival of four more cars of railroad construction equipment, marking the first in all, were developments in preparation here for beginning construction of the Oregon Trunk's extension to Klamath Falls. It was believed here that a camp would be located near Lash or Crescent.

Kenneth D. Hauser of the Hauser Construction company, arrived here yesterday and was interviewed when asked whether his company had been awarded contract for construction of the railroad.

Los Angeles Woman Dies of Injuries

ALBANY, Ore., May 21 (AP)—Mrs. P. C. Kenesie, of Los Angeles, died in a hospital here late yesterday from injuries suffered in an automobile accident near Shedd, Ore. Her car skidded and went into a ditch filled with water when she attempted to pass a wagon.

According to a real estate authority, during the past 20 years the individual private dwelling has rapidly disappeared from New York City.

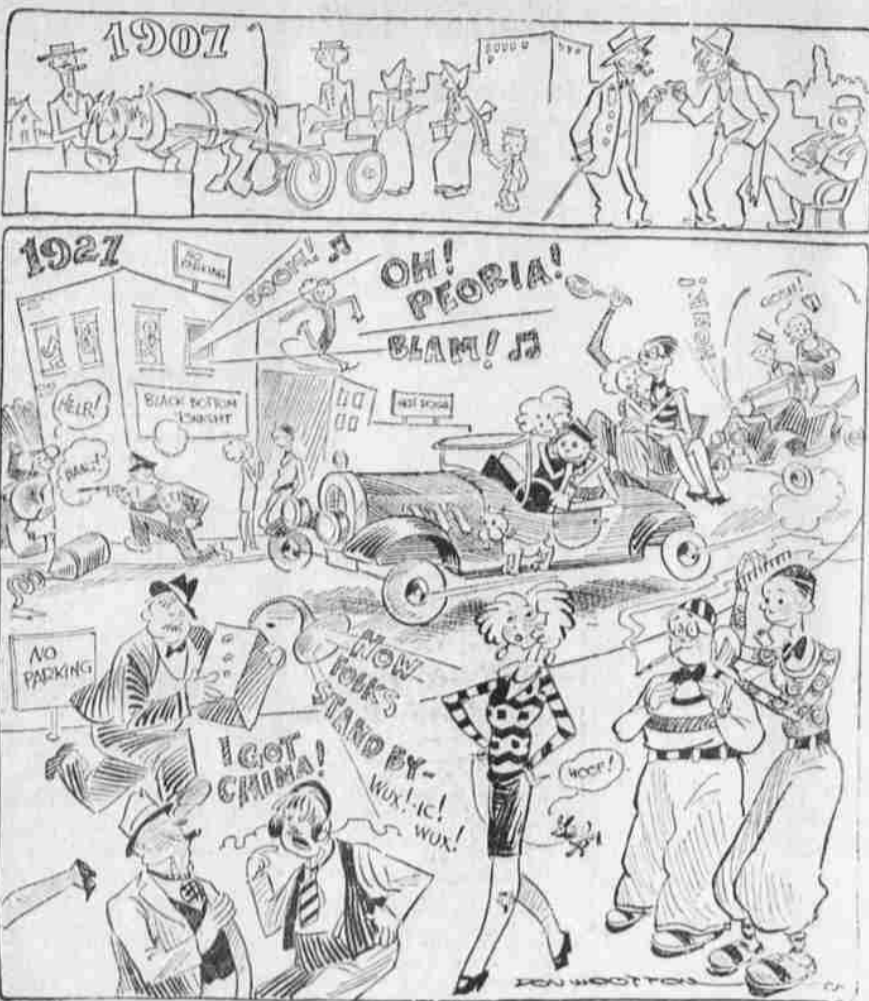

Our business is insurance service

Our business is not a matter merely of delivering insurance policies to order. We are organized to render a complete insurance service. That includes property inspection, advice on the control of loss hazards, and information regarding the best forms of coverage available for every risk. We do not charge for our advice and assistance. If you have an insurance problem, let us help you solve it.

Prompt, Personal Attention to your needs.

OUR LITTLE MAIN STREET SURE HAS CHANGED

Mr. Tourist Shy of Green Tables At Monte Carlo—"Kitty" Is Thin

MONTE CARLO (AP)—The "kitty" of the Monte Carlo casino is getting thin. It is some \$50,000 underweight.

It is not because the crowd of visitors is smaller that the stakes are smaller. It is rather because the chance of beating the game are extremely small. The gamblers' money pays all municipal taxes, finances all local improvements and subsidizes the attractions for the tourists. After these charges have been met the stockholders are paid a large dividend.

American especially are becoming shy of the green tables. A casino employee has figured that the average American does not spend \$5 for the opportunity of saying that he has gambled at Monte Carlo. He values his heavy income in the number of non-gambling visitors the entry price to the gaming rooms has been doubled.

But Monte Carlo is not going broke. This year it is estimated that nearly 200,000,000 francs will be left in the casino by the gamblers of the world.

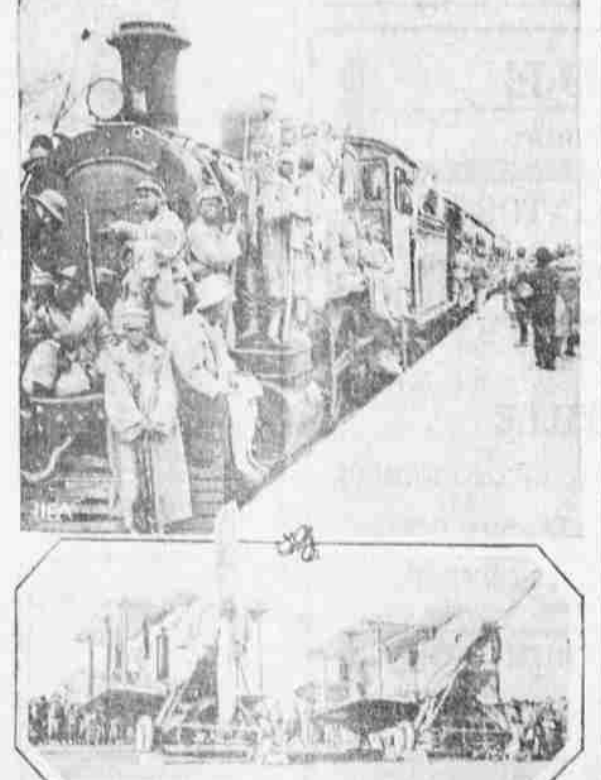

The rapid increase in the number of successful gamblers in France is partly responsible for the dearth of heavy gamblers in Monte Carlo.

The days of the bank-breaking gamblers apparently have passed, but the searchers for an unbeatable system are more numerous than ever. The local papers that print the result of each turn of the wheel are sent to every corner of the world where system-seekers study the play in an effort to discover some scheme to out-guess chance.

The report goes out that some player has won millions, but the serene and placid directors never worry about their losses.

"Our only worry comes when a heavy winner dies shortly after making it hitting," one director said. "Then we have no chance at getting the money back."

Fight With Planes—and Spears

Every form of weapon—from spears—such as were used in the armies of Caesar, to twentieth century airplanes—is being used now on the battlefields of China. Above is shown a group of newly enlisted privates of the army of Marshal Chang Tso-lin, the northern warlord. The giant planes below are British machines landed at Shanghai to be used against Chiang Kai-shek's southern forces in protection of foreign lives and property. The wings of the planes have not been attached, the shipmen just having arrived.

Americans Manage Village Of French Cigaret-Paper Makers

QUIMPELLE, France, May 20 (AP)—Two Americans run a model village here, built for the French workers in the factories which furnish half of the paper for the 100,000,000,000 cigarettes which the United States gufles each year.

Ernest H. Harris, of Brockport, N. Y., and his assistant, Franklin M. Stafford, of Pittsburg, Pa., Princeton graduates of 1916, employ 600 men and women. Model dwellings fitted with baths, hot and cold water, electric light, and gas are furnished to the workers rent free.

The houses cluster about parked rows. Each family has its own garden plot for which the company provides seeds and fertilizer. There also is a large sports field with a rugby ground, tennis courts, locker room and shower baths, all at the disposal of employees. As a consequence labor trouble is unknown among the workers.

Language troubles do exist, however. About half of the staff speaks the Breton dialect in place of French. The plant manager, therefore has to carry a specification slip in one hand and a Breton dialect grammar in the other.

The general offices of the American managers of the de Mandat Corporation, a French concern, are situated in a wing of an old monastery.

Labor Needs Will Be Given Publicity

SALEM, May 21 (AP)—Bulletin giving complete information about labor needs in berry yards and orchards of the state are to be distributed by the seasonal employment commission of the state, the object being to distribute labor with the least possible expense to employer and worker. This was announced yesterday by state labor commissioner C. H. Grant after a conference at his office with the commission. The delayed picking season has left a large number of workers unemployed. It is said.

The famous Stradivarius made about one thousand violins, half of which were lost or destroyed. Of the five hundred still in existence, about one-third are in the United States, the others being scattered over the rest of the world.

John Collins and of the law college of Columbia university. He is a son and law partner of James A. Lee Sr., of Pendleton.

Pendleton Man Is Appointed Judge

SALEM, May 21 (AP)—James Alger Fox, of Pendleton, was yesterday appointed by Gov. Patterson as circuit judge for the sixth district to succeed the late Judge Gilbert W. Phelps. Fox had the endorsement of the bar associations of Donnell and Morrow counties. Judge Fox is a graduate of Whit-

Taxicab Caruso

Saul Silverman is a taxicab driver in Chicago, but that's only incidental. Ever since he was 12 years old in Detroit, he has had ambitions to sing in opera, and now, at 25, he is to have his great opportunity in Handel's oratorio "Messiah" at Orchestra Hall, Chicago. Silverman will sing the title role.

A SWORD THAT HANGS BY A HAIR

Damocles was really a piker, for the hair that held the sword over his head was a horse hair—a pretty strong article.

A far more threatening sword hangs over the worldly goods and happiness of every man who owns a home or store or who occupies one owned by someone else.

That sword is a lawsuit.

There are a host of dangers one never thinks about. Why take a chance when a PUBLIC LIABILITY POLICY is such a small item in the budget?

In Fairness To Yourself and Your Community--

Investigate Your Own La Grande Building & Loan Before You Buy a Contract

If you have ever read over two different contracts issued by two different companies, you know that there is a wide difference in rules and requirements under which your certificate is brought to maturity, even though the payments and the maturity itself may be exactly the same.

The La Grande Building & Loan contract has the most liberal and the fairest conditions that you can find—there are no catch clauses, no hidden provision to cause you later embarrassment and difficulty.

Let somebody you know explain Building & Loan contracts—talk to your local banker, to your local business man about the La Grande Building & Loan. It is directed by MEN YOU KNOW. Your investment in its certificate is on their business judgment and their reputation for fair, liberal dealing.

You can start with as little as five or seven dollars a month—and there is no penalty for missed payments, and we guarantee both the maturity of your contract and the interest on your money. We'll be glad to explain every detail to you without the least obligation on your part. Come into the office or phone us at Main 250 for an appointment to suit your convenience.

afterwards."

To another woman, barely 20, who complained that her husband would not work and that she was living against her will, with her parents-in-law, Judge Cairns remarked:

"You women—you young women particularly—go and make a mess of your marriage by picking the wrong man at a dance or some other place, and then you come here and expect me to clear it all up for you in a few moments."

NOMINATE TWO

EUGENE, May 21 (AP)—Ray Nash, Portland, and Philip Berg, Roseburg, were nominated yesterday for the editorship of the Daily Emerald, student publication at the University of Oregon, to be voted on May 23 at the special election. This election became necessary when Harold Mangum, Portland, editor-elect, was drowned in the Willamette river last Monday.
