## Mesdames Holmes, Stoddard Given Farewell Party

Complimenting Mrs. Earl Stoddard and Mrs. E. L. Holmes, who will leave La Grande soon, Mrs. A. L. Richardson and Mrs. Hal Bohlen-entertained at an attractively appointed bridge-luncheon Saturday afternoon at the Richardson home on O avenue.

Covers were laid for 52 at 12 tables. A color scheme of pink and white was daintily carried out in the table decorations, and pink organdy covers being used over the white linen. Centerpieces were of orchids, roses in crystal and silver. Place cards were in pink and white and the same colors were carried out in the menu. Bouquets of roses and tulips were also used in other parts of the home.

Mrs. H. A. Zurbirk and Miss Helen Baker, who is visiting here from Medford with her mother and her sister, Mrs. Hal Bohlen-kamp, assisted in serving.

During the afternoon Mrs. Ray Fuller sang three selections, "A Morning" by Lloyd, "The Owl" by Frank Meyer and "Spring" by Brahms. Mrs. E. L. Holmes accompanied her at the piano.

Rejoice was enjoyed following luncheon at 12 tables. Mrs. W. G. Sawyer made high score and the second prize went to Mrs. H. M. Ray. Guest prizes were presented to the two honor guests, Mrs. Holmes and Mrs. Stoddard.

Mr. and Mrs. Stoddard and family will leave La Grande Thursday of this week to make their home in Kansas City. Mr. and Mrs. Holmes and family plan to leave about the first of July for Tacoma, Wash., to make their home.

## Benefit Tea To Be Given by N. O. W.

A tea for the benefit of the Neighbors of Woodcraft Lodge will take place Friday afternoon, June 10, at the home of Mrs. A. M. Dahl, 2764 North Second street.

Mrs. Frank Anderson, Mrs. J. Barhoff, Mrs. Jack Hillary, Mrs. Frank Tall, Mrs. Lewis and Mrs. Dahl will be hostesses.

## HEALTH

"INDIGESTION"—A SMOKE SCREEN TO DISEASE.

By Earl Duggan Carr, M. D., Lansing, Mich. Moulton Gorman Memorial Institute

Indigestion is one of the most common explanations of symptoms of abdominal disease and one of the most indefatigable forms that can be chosen.

The time has passed when anyone accepts fever, a rise in temperature, as the explanation of an illness and even rheumatism is not so necessarily a diagnosis as formerly. The cause of the fever and the cause of the rheumatism is demanded. Likewise the cause of indigestion should be determined. Without knowing the cause, proper treatment cannot be prescribed.

To say that you are ill with indigestion merely means that there is a disturbance of digestion, but this may come about with the existence of almost any disease of the abdominal organs.

After acute indigestion is commonly referred to by laymen, exactly what do they mean? What is the disturbance? If it is something which has disappeared with the patient, it means food poisoning from spoiled foods; then the situation is definitely poisonous poisoning.

And certainly it does not mean the peculiar behavior of indigestion which certain individuals exhibit against certain foods, such as bread, butter, fish, white of eggs, etc., etc.

If it is clearly recognized that food has poisoned an individual in one instance or another, proper management may be instituted and no harm is done in calling the trouble acute indigestion.

To distinguish symptoms of digestive disturbance as acute or chronic indigestion, without careful examination and study, is as simple as to distinguish smoke in the house. Smoke is not fire; it is a by-product of the fire. Disturbances of digestion may keep many from seeking medical aid early enough, and

naming the condition is the cause of many unnecessary deaths.

What chance has the patient with acute appendicitis, gall bladder, kidney or pancreatic disease, influenza ulcer of the stomach, if it is to be called indigestion?

The first symptoms of abdominal cancer are almost invariably disturbances of digestion. The cure of cancer is possible only when discovered early.

Never, without careful examination, accept indigestion as the explanation of abdominal disease, acute or chronic. Competent attention must be given the cause of your life-span is apt to be cut short many years.

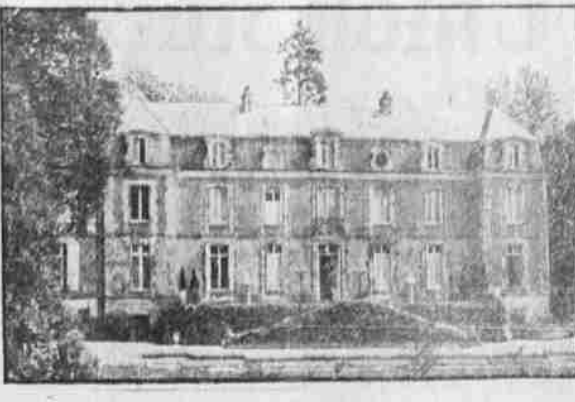

When covering jelly with paraffin the inner rim of the glass must be absolutely free from drops of jelly and the jelly must be set. Melt the paraffin over low heat, pour it while hot over each glassful of jelly to cover the top completely. Tilt the glass so that the paraffin will run up on the sides. This will make a perfect seal around the edge. When the paraffin is cool place tin tags on the glasses or paste paper over them. Label neatly and store in a cool, dry, dark place.

## MOVIE QUEEN IS A PRINCESS NOW

Here are Pola Negri and her boy friend, Prince Medved, the Georgian prince, on wedding "location." Pola keeps her best movie composure, but the camera seems to irritate the prince. The picture was taken at Pola's Parisian chateau at Suresnes, near Paris, just after the wedding. With the couple is the bridegroom's father, Prince Gregory, said to be a former general in the czar's army. Others of the prince's family, including Prince David, husband of Mae Murray, were unable to be present. At the reception at the chateau, cameramen and reporters predominated. Pola wore an ermine cloak and many costly jewels—pearls, diamond rings and diamond and emerald bracelets.

Here is a front view of Pola's beautiful chateau at Suresnes, 20 miles from Paris.

## Mice Enroach On Range Land In Wallowa Co.

ENTERPRISE, June 6—Field mice are numerous on grazing lands on the Imnaha river. This surprising discovery was made by County Agent N. C. Donaldson and Roy Page, of the U. S. Biological survey, who went to the canyon last Friday and came out here today night. They went up the river 15 miles or so and, with the help of ranchers, made an investigation.

In some places where the old grass seemed to have lodged or fallen, it was found to have been cut off by the mice, which had numerous runways along the ground. Forest rangers estimated that half the grass had been cut off in some areas. Poison was put out and

the next morning many dead mice were found.

The animals do not burrow, except as they dig holes under rocks or other shelter where they live and have their nests. They feed above ground and do not hibernate but live under the snow when the earth is covered. They reproduce at a marvellous rate, having several large litters every year, and present a considerable problem as they are scattered over a large area of open range.
