Smith-Conley Sixth Reunion Held Yesterday

The sixth annual reunion of the Smith-Conley family was held at the pavilion in the city park yesterday.

About 100 persons were in attendance. Out-of-town guests present were Mr. and Mrs. W. E. Smith, of Portland, Miss Nellie Smith, of California, Heloise Malloy, of Portland, and Mrs. Bert Watt, of Seattle. The remainder of the guests were from this locality. Mrs. A. B. Conley, of La Grande, was the oldest person present.

At 1 o'clock a basket dinner was enjoyed at the long tables in the pavilion. During the afternoon plans were made for the next reunion which will be held the third Sunday in June, 1928. Dick Smith is president of the next year's reunion and Mrs. James E. Hough is the secretary.

The Osoha campfire girls held a work meeting at Riverside park on Saturday afternoon. The afternoon was spent in making head headbands.

Before returning to their homes the girls roasted marshmallows and waters in the fireplace of the pavilion.

Miss Hansen And Mr. Mortensen Wed

The marriage of Miss Blanche Hansen and Mr. Mortensen was quietly solemnized at the Lutheran church Friday evening, the Rev. Lief H. Axen performing the ceremony.

Mr. and Mrs. Clyde Wilson attended the couple. No other persons were present.

Mrs. Mortensen is the daughter of Mr. and Mrs. H. C. Hansen, who reside at 1027 N. avenue. She attended the La Grande high school and has been employed for the past two years by the Blum Mountain Creamery company. Mr. Mortensen, whose home was formerly in Baker, has lived here for some time and is employed by the Eastern Oregon Light and Power company.

The happy couple spent their honeymoon at Wallawa lake, returning here Sunday evening. They will be at home to their many friends at 1307 Fourth street.

Announcements

The Woman's Christian Temperance union will meet at the Methodist Episcopal church tomorrow afternoon at 2:30 o'clock. All members are urged to be present. There will be election of officers.

The Ladies' society of the Brotherhood of Locomotive Firemen and Engine-men will meet this evening at 7:30 o'clock at the I. C. hall in regular session. There will be initiation followed by a social and refreshments. All members are invited to be there.

DRINK MILK, BUT BE SURE IT IS SAFE

Pasteurization Certain Safeguard Against Infection

By William H. Dieffenbach, M. D., New York City
Member Gorman Memorial Institute

With the advent of warm weather the consumption of cow's milk increases and it is therefore desirable that the public be informed of the many considerations as to the quality of this important beverage and essential food. Milk differs in the quality of its fluid, fat and solid contents depending upon the breed of cow from which it is derived and upon the food supply of the animal.

A discussion of the foreign ingredients of milk is the program in today's article. These extraneous matters sometimes found in milk are dust, hair, particles of manure, secretions of the body, fifth, and microscopic plants called bacteria. All come from outside sources and are to a large extent preventable by cleanliness and care of the dairyman.

Such substances are frequently the cause of septic sore throat, tonsillitis, diphtheria, scarlet fever, tuberculosis, typhoid fever, and other infectious diseases. Pasteurization of milk and cleanliness have reduced infections from these sources to a marked degree in the past 25 years.

The infection carried by the cow itself, the bovine tubercular bacillus, is a more difficult problem to solve but it is being combated by both state and federal authorities.

The bovine tubercular plant or germ or bacillus differs from the human tubercular bacillus and causes special diseases. Its principal victims are infants, children and adolescents. After the tenth or twelfth year relative immunity to this special germ is acquired and adults are less frequently infected by it.

The human tubercular bacillus causes the lung tuberculosis, throat tuberculosis, fistula, and through secondary infection also intestinal tuberculosis.

The bovine tubercular bacillus causes a greater variety of diseases yet seldom does it cause tuberculosis of the lungs, which has greatly reduced in the past quarter century through the active campaign carried on against it. The purification of the milk supply and pasteurization (heating to 145 degrees for 30 minutes), has also had remarkable results in the group of diseases caused by the bovine tubercular bacillus, although it is depressing to see the large number of children and adolescents who are still infected by this germ.

What can be done to meet this situation?

Until the dairy industry has removed all tubercular cattle, pasteurization of milk is the only safe procedure.

In many localities milk is labeled grade A, B, and C; the first supposedly from tubercular tested cows and clean production. Grade B is secured from non-tested cows and good surroundings and it is safe to assume that a percentage of these grade B cows are tubercular. Grade C milk is unsafe for human consumption, being usually produced in unsanitary surroundings and from untested cattle.

For the sake of our health it is quite apparent that pasteurization is our only safeguard against infection until clean herds are uniformly secured.

Matches Sandal

The Owl's THEATRICAL COLD CREAM is prepared especially as a cleansing and soothing cream for removing dust, face powder or rouge from the pores. It helps wonderfully to round out your comfort after a day's travel in wind, dust and sunshine. Supremely good for massaging. Put in well and wipe off with soft towel.

HEADQUARTERS NOW RESIDENCE

Soldier Barracks During World War; Will Greet Legion in September

GONDRECOURT, France (AP)—Lucien Patheir, who learned from a soldier's bullet that the American troops had arrived, will be here, where the first headquarters of the A. E. F. in the field was located, to greet the American Legion in September.

Besides the chateau and its lodge with the American Legion still in place, he will be about the only reminder of the place as it was when General Pershing and his staff lived here.

The chateau on the hill and the barracks where the art of war was taught to young officers have disappeared.

"Oh, monsieur," said Lucien, "you shall all be glad to see them, but because they know how to do things. They had everything, monsieur, everything, even to a bath room."

Lucien declared that he had no grudge against the army who fired on him one chilly autumn evening when he was returning home from a German prison camp. "It was this way," he said. "I was crossing the park in the direction of the cottage where my mother always lived. Suddenly I heard someone cry out in a foreign language. I never felt until then that a poor peasant like me needed to know a foreign language. I couldn't reply. Then there was the crack of a rifle and I threw myself on the ground. Two pairs of strong hands held hold of me and dragged me before the officers of the guard. That's how I learned the Americans were here. I would have been shot in the morning if they hadn't found my mother who had moved to another part of the park."

The chateau has changed hands since Pershing left it. The new owners take pride, however, in the fact that it was the first general headquarters of the American army. Madame Huet, the mistress of the chateau, says she is always glad to welcome men from the A. E. F., especially those who come to show their brides what they did "in the great war."

HILGARD PERSONALS

HILGARD (Special)—Among those that attended the dance here Saturday night were Mr. and Mrs. Jean Bonham from Medical Springs, Mr. and Mrs. Arch Stevenson from Perry and Fred Graham from La Grande.

Ben Young was a Hilgard visitor Sunday.

Mr. and Mrs. K. W. Smith and children from Perry were visitors of Mr. and Mrs. Frank Sanford Sunday.

Miss Donna Scott, Miss Eva Thornbrum, Winfield Scott and John Thornbrum went to Cove to the swimming pool Sunday.

Ilex Brown and Carl Saling were visitors Sunday evening.

Miss Ivy Saling was at Hilgard recently.

Mr. and Mrs. Claude C. Pratt and children, of La Grande, were visitors of Mr. and Mrs. Matheson Sunday.

D. H. Proctor was at Hilgard Monday on business. He lives in La Grande.

Mrs. Mary G. Young was a La Grande visitor Monday.

Lester Huff, of La Grande, was at Hilgard Tuesday.

E. A. Williams was at Hilgard on business Tuesday evening.

Mr. Skidstrom was a Hilgard visitor. He has a ranch near Starkey.

Mrs. Pete Patrice and daughters, Edna and Mae, are spending a few

LOSTINE PERSONALS

LOSTINE (Special)—Miss Zelma Kell went to Enterprise Wednesday to visit her sister, Mrs. Dale Spry.

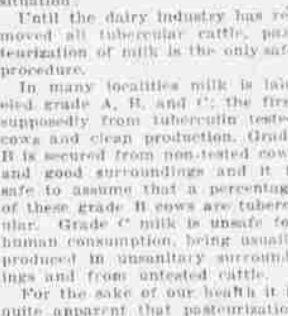

The Rev. James Painter, evangelist of the Christian church, visited friends here Thursday while en route to Promie.

Mrs. Ella MacKinnon returned home Wednesday after a week's visit with her new grandson at the home of Mr. and Mrs. Ann Craig, of Enterprise.

Mr. and Mrs. Harry Thibodeau, who have been visiting at the home of Mr. and Mrs. Harley Plesner for several weeks, left Thursday for Kinnath Falls where they will make their home.

The Joseph and McAllister road construction crew have moved their

Leading the banners of the daisy club at the club day reception at Vander College, Poughkeepsie, N. Y., were the pretty sophomores Margaret Thompson, of Hechler, N. Y. (left), and Virginia Herrick, of Osoha, N. Y.

OUT OUR WAY

By Williams MODERN CO-EDS CAN EAT CHEAPLY

High Cost of Living Need Hold No Terror; Cost for Week Is \$2.50

TIERRA, N. Y., June 20 (AP)—The high cost of living need hold no terror for the modern college girl. A class studying foods at the New York State College of Home Economics at Cornell university found that she can feed herself on \$2.50 a week.

This cost figure was declared by the smallest man which would supply the 2,200 calories required by a girl of average size carrying an "every-day" college studies and activities. In order to do it, however, she must be her own cook and literally know her vegetables. She must also know the cheapest produce markets.

No mention is made of the free meals she may have, as it is expected that the ultra-economical co-ed following this "food prescription" will have 21 meals at her regular eating place.

Students who planned the week's menu first kept records of the way they spent their time. Then they computed the calories such energy required each day. They added food necessary to furnish protein, phosphorus, iron, vitamins and iodine.

Twelve years ago a student at Cornell declared he could live for 82 cents a day. His diet, however, was not approved by the authorities in home economics. Besides a food was much cheaper then.

Here is a list of the food consumed on the low cost in a week:

Four eggs; five meat servings, one being liver and one salt water fish; a daily pint of milk; one-half pound of potatoes; one serving of whole wheat or branflour food; four tablespoonful of refined cereals or flour to thicken soups and puddings; one and half ounces of sugar; part molasses; five thick slices of whole wheat bread; two and one-half ounces of fat, one-half of which was butter; one serving of fruit; and one teaspoonful of cod liver oil.

The allowance for protein and iron in this diet is a health minimum. That for calcium and phosphorus the college says, is a little above the minimum.

PUTMAN'S La Grande's Exclusive Ready-to-Wear and Millinery

although there was a shower of rain.

A bumper 30 years old, worn by 250 million boys, was found recently. We are wondering if they finally got that picture hung just where friend wife wanted it.

SUMMERVILLE PERSONALS

SUMMERVILLE (Special)—Miss Inez Woodell left Thursday night for Ashland, Ore., where she will enter the state normal. Miss Woodell has taught the primary grades at the Summerville school for the past two years.

The Bethel lodge of Summerville had a social time after their regular lodge meeting Wednesday evening. The social was a farewell surprise to Miss Inez Woodell, who is leaving for Ashland to enter the state normal.

Miss Leona Fries left Thursday night for Ashland, Ore., to enroll in the state normal. Miss Fries has just completed two years as teacher in the Pleasant Grove school.

Clyde McKenzie is building a modern cow barn on his farm near Summerville. This will be quite an addition to his place as he already has a fine barn which he will use for the horses.

Summerville was fortunate in escaping the hail storm which did much damage at Imbler and vicinity. Very little hail fell here.

MOST NURSES USE NEW FACE POWDER

MELLO-GLO, the new wonderful French Process Face Powder, is preferred by nurses because of its purity, and they say it does not make the skin dry and drawn. Stays on longer, keeps shine away, and is very beneficial to the complexion. You, too, will love MELLO-GLO when you use it. Glass Drug, Inc. Adv.

CLOROX bleaches wood drainboards

Discolored drainboards can be made whiter in a few minutes with Clorox than by hours of scrubbing. Clorox quickly bleaches wood drainboards and removes stains from composition, tile and enameled drainboards with scarcely any labor. See directions on the label of the Clorox bottle.

At Your Grocers!

A Banker's Job is a Friendly Job

We are all human—we like friends and friendly understanding. And it would be a rather sorry way to live if we had no one with whom we could discuss our good fortunes and our misfortunes, our experiences and our ambitions.

And since money affairs are personal affairs, the banker's job should be a friendly one. If a widow, discussing her investments, wants to buy doubtful-looking oil stock, the banker can advise her against it and still be friendly. As a matter of fact, he would not be a friend if he didn't.

And if a man wants a loan that would involve his future and jeopardize depositors' and stockholders' money, the banker who shows the error of such a request is doing the only friendly thing he can do. Your permanent welcome is the concern of every good banker. He must be of substantial service, a counsellor who guards your interests in both a helpful and friendly way.

We are equipped and anxious to give friendly service to your financial problems. We are glad to talk them over with you.
