Aaron Sapiro Is Happy At Apology

CHICAGO, July 11. (AP)—Aaron Sapiro—just an accident of destiny in the vindication of the Jewish people—is he described himself —is completely satisfied with Henry Ford's published apology for what Ford's Dearborn Independent has said about the Jews.

So satisfied is he, in fact, that he said after returning home from Canada last night that he believed his million dollar libel suit against Mr. Ford and the Dearborn Independent would be settled out of court—possibly today.

"The retraction, apology and reparation have fulfilled the purpose of the suit, as far as the main intention is concerned," he said.

That the father has the absolute right to choose what schools his children shall attend and what religion they shall adopt, is the decree handed down by a London magistrate.

Record Breaking Crops Forecast In Powder Area

NORTH POWDER, July 11—The North Powder district at this time bids fair to yield the biggest wheat crop in the history of a succession of never-failing crops. At the present time much of the wheat crop for the local valley is made. Nothing but extreme weather conditions or disasterous fires will prevent the harvest of a big crop.

Not in the past several years has the dry-land crop gave such promise as at the present time. Some of the dryland acreage—in fact most of the dry-land grain at this time gives promise of exceeding much of the irrigated acres. Especially is this true of the irrigated lands seeded this spring.

W. T. Lampkin in the Clover Creek district has about 800 acres of dry-land grain now maturing. Six hundred of this is fall planted and the remainder of the land was seeded this spring. In the opinion of Mr. Lampkin the land seeded last fall has by far the better chance to exceed the usual yield. There will be more than the usual amount of wheat grown to the acre on both seedings, but the fall sowing has made the greater progress.

W. A. Hudkson, also has considerable acreage of both fall and spring wheat maturing on dry land. Samples of his product brought to town during the past few days indicate that his lands east of the city are also going to bring record yields of a superior quality of wheat.

Larger growers throughout the valley are encouraged that the harvest this year will be one of the largest in the history of the valley and preparations are now going on for the care of the grain which will tax the capacity of local storage at threshing time.

O. A. C. BOARD IS GUEST AT UNION PICNIC

(Continued from Page 1)

he had been done by.

Yates Speaks

Mr. Yates, of Corvallis, another member of the regent board, was next introduced and spoke briefly, expressing his belief in the experiment station and his willingness to do all in his power to further the interests of the work.

Senator Elliott, the latest appointed to the board, who was elected to the legislature as a farmers' candidate, introduced himself in a short talk and gave way to E. A. Aldrich, of Pendleton, editor of the East Oregonian. Mr. Aldrich spoke of the station as a source of information which should be consistently utilized by the agricultural element—holding it to be an avenue of usefulness which was not of its greatest value unless used by the people. He classed the station as a dictionary or encyclopedia to the farmers of this section of the station, and said he has noticed a pronounced increase of contact between the people and the station of late.

History of Grange

Mr. Palmiter, who is a member of the board of regents by virtue of his state grange office, spoke briefly on the history of the grange, stating that this organization had been perfected principally to put into effect those things guaranteed when land was set aside in 1862 to specific education purposes. He closed with the plea that the people avail themselves of the privileges guaranteed them by the declaration of independence which gives them the right of self government, and yet at the last election less than one-third of them took advantage of it and went to the polls.

Several farmers were called upon to give their ideas of the station work and many responded.

Hyslop Praises Station

The last speaker was G. R. Hyslop, of Corvallis, who is here looking at potato crops in the Grande Ronde. He spoke of the work being done through the experiment station, such as eliminating the varieties of crops which do not do best here—by the process of retaining only those which yield the greatest. He mentioned specifically certain varieties of wheat found best for sowing during the different seasons in this valley and of the alfalfa which was best adapted to the soil and climate of this locality. His speech, while brief, was very practical.

Those who attended the picnic were unanimous in their praise of Mr. and Mrs. Withycombe, classing them as 100 per cent host and hostess.
