Mechanical devices for pulling stumps range from the straight pull of a team to huge machines with immense pulling power.

The simplest stump puller is a chain with a hook on one end and a team of horses on the other. The hook is fastened to, or around, one of the main roots and the chain placed across the top of the stump, thus giving a leverage which increases the pulling power of the team.

Exhibition of the casket of Floyd Collins, Kentucky youth who lost his life in exploring Sand Cave, has stirred a legal fight. Homer Collins (left), brother of Floyd, is protesting "commercialization of his brother's body," by Dr. Harry B. Thomas (right), owner of Crystal Cave, where the casket was placed on exhibition. Dr. Thomas claims he obtained written permission from Lee Collins Sr., father of Floyd, for removal of the body to his cave. The casket, as it was displayed at the mouth of Crystal Cave, is shown above.
