Voice Students Appear at Church In Song Recital

A large crowd gathered at the First Presbyterian church last evening for the mid-summer song recital in which to voice students of Mrs. Jeanie A. Hopkins were presented. The program was one of interest from the first group, which was given by Miss Jean Williams to the final numbers by Miss Daisy Robble, and each group was received with enthusiasm by the large number in attendance, the main auditorium of the church being filled to capacity besides several in the balcony.

The recital was a decided success, much of which was due to the sympathetic cooperation of the piano accompanists, Mrs. T. H. Maxwell and Miss Helen Williams. Miss Helen Williams also played a piano group in which her talent was clearly brought out. Miss Williams has been studying at the University of Oregon for the past two years and is an accomplished musician. Her numbers last night were "A Can-Can" on Form 2 (E-flat) by Leschetizky, "Nocturne Opus 54 No. 4" by Chopin and "Fantasia Impromptu" by Chopin. Her encore number was also by Chopin.

The recital program was in two parts, Miss Jean Williams opening the first part with "Who Knows" by Hall, "Nocturne" by Chopin and "Ma Lil Hattian" by Strickland. The second student to appear was Miss Mildred Mulholland, who sang "I Know a Lovely Garden" by P. H. D'Arletto, "E'en as the Flower" by Knight-Rogan and "You in a Bonnet" by Clarke. Miss Trillian Ashley sang "Rose in the Bud" by Foster, "I Sing of the Love of Jean" by Wegerlin and "Song of Songs" by Moxa, and Mrs. Edna Halley-Stonebreaker sang "Just Awordin' for You" by C. G. Jacobs. Her encore was "Memory" by Dalton and "The Daisy" by P. H. D'Arletto.

One of the outstanding numbers on the program was "Create Spring Song" by D'Arletto, sung by Miss Betty Cochran, Mrs. Leo Miller playing the violin obligato. Miss Cochran's other numbers were "One Memory" by Ellis and "Spring's a Lovely Lady" by Elliot.

Miss Helen Williams closed the first half of the program with her piano group.

The second part consisted of four numbers, Miss Gertrude Davies, who was scheduled to appear being unable to perform. Tom Bruce was the first to appear and he sang "Fountain" by Hahn, "An Old Fashioned Town" by Squit and "Handkerchief" by Stuart.

Mrs. L. S. Moore sang "Goin' Home" by D'Arletto, "The Birth of the Moon" by Leon and "Felix" by Laurence and Mrs. Leal H. Russell sang "On the Shore" by Noddinger, "Midnight" in the Wood" by Goss and "Florida" by Morgan.

The final group, by Miss Daisy Robble, included "Dream Days" by Ashford, "Mirage" by P. H. D'Arletto, "I Passed by Your Window" by Hahn and "Within and Without" by Wells.

The performance of each of the students was good and received much applause from the audience. The church was prettily decorated with bouquets of summer flowers, forming an attractive setting for the recital. The ushers were Mrs. A. V. Lindgren, Mrs. Floyd S. Shiverswood, and Misses Dorothy Eberhard, Violet Hodgson, Marjorie Reynolds and Lois Nelson.

Country Woman's Club Entertained

FRANKIE HALL, (Special)—Mrs. Charles Spencer, assisted by Mrs. Bert Groul, entertained the Country Woman's club at the Blue Mountain grange hall Friday afternoon.

The usual routine of business, presided over by the president, was followed by a social hour, during which time refreshments were served.

Guests of the club were Mrs. A. E. Huff and Misses Dean Wright and Judith Spencer.

Mrs. Edward Jasper and Mrs. L. P. Wright will have charge of

the next meeting, Aug. 12, at the home of the former.

COVE (Special)—The Ladies' guild spent an enjoyable afternoon at the Ascension grove Thursday. It was a no-hostess party and during the afternoon three tables of bridge were at play. Miss Rosa Kelly made high score.

A similar party has been planned to be held at the grove Thursday, Aug. 4.

The White Rose club will meet at Riverside park Wednesday afternoon. The club members will be joined by their families in the evening and a picnic dinner will be enjoyed at 6:30 o'clock.

The Parkdale club will meet tomorrow afternoon at Riverside park.

COVE (Special)—The Women's club will hold its regular meeting on Thursday, July 28, at the library building.

Announcements

By Sister Mary
BREAKFAST — Inappetites, ready-to-serve cereal, cereals, soft cooked eggs, crisp toast, milk, coffee.

LUNCHEON — Shrimp, lima, toasted crackers, fruit salad, white wheat bread and butter sandwiches, milk, iced tea.

DINNER — Broiled lamb kidney chops, creamed peas, sliced tomatoes, chilled rice and pineapple pudding, milk, coffee.

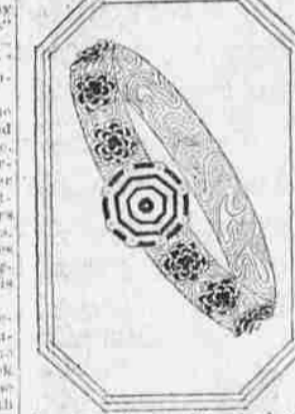

The lamb chops are served with slices or quarters of oranges. If slices are used they should be cut about 1/2 inch thick and sprinkled with minced mint. Wash the fruit well, but do not peel and be sure all seeds are removed.

Shrimp luncheon
One cup cleaned fresh shrimps, 1 cup cooked fresh peas, 2 tablespoons butter, 1 1/2 tablespoons flour, 2 cups milk, 1/2 teaspoon paprika, 1 egg, 1 hard cooked egg, 1/2 teaspoon salt.

Melt butter, stir in flour and when thoroughly blended slowly add milk, stirring constantly. Season with salt and paprika and bring to the boiling point. Add shrimps and peas and let stand over hot water for 15 minutes to thoroughly heat. Beat egg slightly and stir in when ready to serve. Serve on toasted crackers or toast and garnish with slices of hard cooked egg.

Broiled shrimps are usually very salty and should be freshened in cold water for one hour before using.

Arm Powder Box

A metal and enamel powder box attached to a moire ribbon trimmed with flowers, to be worn on the arm when dancing.

Women's Clubs Follow Survey With Drive on U. S. Illiterates

WASHINGTON (AP)—Ignorance may be considered bliss in some quarters, but as far as the club women of this country are concerned, it is a state of delight not compatible with the highest American standards.

Those who belong to the General Federation of Women's clubs have adopted a working program which will go far, they believe, to hasten the erasure of illiteracy from the United States, and so raise the country from its position of tenth among the literate nations of the world.

Early in the year, the federation inaugurated a "county literacy survey." These states which joined were to prepare a list of persons in a typical county of their state who would neither read nor write. In her preliminary report, Mrs. William E. Blackman of Orlando, Fla., chairman of the committee on education, comments more than a dozen states for prompt action in the campaign. The report says

that school and public officials, women of other organizations and social workers gave great assistance to the listing and the subsequent teaching of the unlettered men, women and children.

North Carolina has the distinction of being the first state to complete its survey. It is enrolling experienced teachers for the 2,822 illiterates of Buncombe county. In some classes three generations of the same family study together. In Alabama, teaching began early in July, as soon as the Covington county list was complete.

Wisconsin's state university surveyed the women in their survey in Dane County. Teachers of the public and vocational schools will teach the illiterate there.

Few white illiterates were found in Washington County, Pa., where there are said to be 11,000 unlettered persons. One prospective pupil is a prosperous farmer who wishes to learn to read enough to obtain a license to drive his new automobile.

This Range Gives You Every Afternoon Off

YOU can stay out of the kitchen all afternoon—every afternoon—if you have this electric range. Meat, vegetables, a dessert, will be perfectly cooked without any attention from you. Just place the food in the oven—set the clock and the thermostat. At the hour set, the clock turns on the current. Then, when the oven reaches the right heat, the thermostat automatically turns off the current. Cooking is finished by stored heat in the most economical way.

The Clock Is The Cook
When you have this electric range, you save time for club meetings, matinees, visiting. And you save food, as well. For this oven retains so much moisture that very little evaporation takes place. The result is that portions are larger, and food goes further than ever before.

Get a Westinghouse Automatic Electric THE RANGE WITH THE CLOCK
FREE! With each Full Automatic Range purchased this month we will give one of the new Kollins beaters, selling regularly for \$20.

HEALTH

"RADIO KNIFE" USEFUL IN CANCER SURGERY
By George A. Wirth, M. D., New York City

It is on record that fifty years ago, when a wealthy New York woman offered to donate funds for the erection of a cancer pavilion as part of one of the leading hospitals, the trustees of that institution refused the offer because no hospital at that time could endure the stigma of having a department for the treatment of cancer.

The years since have brought much knowledge. Cancer is no longer a repellent mystery. We now know many different forms of cancerous growths and are able to grade them according to the degree of severity. Grades 1 and 2, being less severe than grades 3 and 4, are more responsive to treatment and may be reached by a wider range of curative measures.

The modern surgeon with laboratory resources, is able to secure so prompt and so definite a report on this matter of degree of severity, that he is able to plan his operation on this added information. Cancer is a riot of tissue cells. Although what causes the cells to divide is not yet understood, we do know that progress of the disease if un molested by treatment, and are acquainted with the means by which cancer spreads and recurs.

Cancers have their beginning in growths, and if removed early, cancer occurs is more common. Several different forms of attack have been developed. Formerly, there was but one—removal by knife. When this was impossible, on account of the extent of the growth, the case was considered hopeless and nothing further was attempted.

But our knowledge has grown amazingly, and we now find in some cases that the intelligent use of radium and x-ray is a helpful aid to surgery, enabling us to reach more cancer than heretofore.

Electrothermic methods (the use of high frequency currents) also represent a great extension of surgery's usefulness in the fight against cancer, by making it possible to destroy the growth in the tissues it is cut out.

The surgeon and the laboratory man are working in harmony in the study of cancer. They are giving to the general public, as well as to the medical profession, the results of their research work and experience.

Thus, Dr. William J. Mayo, a member of the Gorgas Institute, recently said that bacteria and cancer cells do not pass directly into the capillaries, or small blood vessels, as we used to think; but are carried by the white blood cells

into the lymphatics, which are a closed system of vessels. This is highly valuable as emphasizing the wisdom of using high frequency currents. It encourages, also, a wider use of the endothermic knife, or cutting current.

This is, strictly speaking, not a knife at all. It is an electric current of radio-frequency, operating
