THE FOOL. The fool hath said in his heart, There is no God. Corrupt are they, and have done abominable iniquity: God looked down from heaven to see if there were any that did understand. Psalm 53:1, 2.

Nobody but naval experts and statesmen gets excited about warships nowadays.

The Marshfield circuit judge who resigned because the pay was inadequate has helped focus attention on our judiciary and the compensation we offer. Patterson vetoed salary increases on the theory that it was good state economy. Economy that results from low salaries to capable public officials is doubtful economy. It frequently can become gross extravagance. It's natural that officials should seek increases; equally natural that the paying public should refuse them. But discretion in the refusal is a necessity that will become more obvious as time goes on. The present system makes for politicians; an improved salary schedule intelligently designed would make for good public servants.

Pondosa, applied to a community, is a new name in Oregon but it is in reality just the transformation of one that is old. The old Perry—a lumber town for more than a generation—has become the new Pondosa—a lumber town that will, we trust, remain for generations to come. Although the locations of the two communities are thirty-odd miles apart, and a new name comes into existence, they are, nevertheless, identical since communities are but people and the people of Perry are now the people of Pondosa. For many, many years La Grande and Perry lived close, intimate neighbors—one community, in fact, because of similar interests, similar ambitions. No longer can we say that the communities are close neighbors, but we are confident that they continue to be intimate ones. The ties of friendship that have been strengthened between Perry people and La Grande people during the life of the mill at its old site are not easily broken. We regret that manufacturing expediency required the change of location, the placing of such an interval between two such old friends, but La Grande congratulates Pondosa on its birth, on its bright future. We extend best wishes to its founders to its people and express the hope that the pleasant relations enjoyed with La Grande in the days that are gone will continue in the days that are to be.

SUPPORT FOR AVIATION

Lindbergh's air tour has begun. In the coming weeks, the young flier will visit 75 cities in the 48 states. His tour, under the auspices of the Daniel Cuggenheim Fund for the promotion of aeronautics, is planned to interest the general public in giving its support to the development of aviation.

It is quite obvious that standing on the sidelines to cheer a parade in honor of heroic aviators, or to crowd a flying field when non-stop fliers take off, or to read every word that is printed about them, or even to do all of these things, will not advance aviation a great deal. The thing that is needed to advance aviation is support, which means using facilities that we have to their fullest extent and creating a demand for more.

"If we in the air mail could have 50 per cent more postage than you people pay, the air mail would be a tremendous success today and with that success would come the ability of the air mail contractors, engineers and followers to devote their time to improving that service," Lindbergh said in one of his first speeches of the tour. "Passenger service will follow the air mail, and the number of lines that we have depends entirely on the amount of use that you can give them. Transatlantic flying will not come in a short time. It will not come until the continent is crossed and recrossed by passenger, mail and express air lines."

Lindbergh cares tremendously about the development of aviation. He speaks sincerely. He also speaks wisely, from his own experience and from thoughtful discussion of the situation with other experienced air men. It is the American way to expect any such enterprise to pay for itself as it goes along. Subsidies are not popular. But the only way aviation, or any other transportation development, can pay its way is through widespread use.

BACTERIA FILMS AID TO SCIENCE

Motion Pictures Show Germs Developing on Head of Common Pin

ROCHESTER, N. Y., July 27 (AP)—The motion picture camera and the microscope got together here today to disclose to man the performance of a troupe of bacteria whose stage might have been the head of a pin. The plot dealt with the growth of disease germs and other microscopic organisms, but speed to nature's process, showing on the screen in three minutes a development of life forms that actually requires 44 hours.

The motion pictures were produced by an apparatus perfected by Dr. Stanhope Bayne-Jones, of the department of bacteriology of the University of Rochester's school of medicine, and Clifford M. Tuttle, of the Eastman Kodak company's research laboratory, and announced today after three years of experimentation.

The inventors declared that the apparatus, which is a combination of a stock motion picture camera and a stock microscope, provides for the first time a means of teaching bacteriology and conducting scientific research without prohibitive expense or great difficulty, and gives a continuous record of every phase of development of bacteriological specimens at a minimum expenditure of time by research workers.

In the demonstration today, pictures were shown of germs which were only 1-25,000 of an inch wide and 2-25,000 of an inch long, magnified on the screen to two thousand times their natural size; they were in appearance not unlike animated sausages which unfolded as they grew and multiplied.

Another film showed the development of the rotifer, an organism too small to be seen with the naked eye, which infests stagnant water.

Asks Appointment As Congressman

SALEM, Ore., July 27 (AP)—Tyson Kinell, who has been in Washington, D. C., for 29 years and is now connected with the United States shipping board, yesterday telegraphed Governor Patterson urging that he be appointed congressman to fill the vacancy caused by the death of Representative Crumpler.

Kinell is apparently unaware that vacancies in this office must be filled by special election. Governor Patterson had no statement to make this morning as to the time of special election. He said that he had received no word from Multnomah county on the subject.

BANK BOARD DISCUSSES PROBLEM IN SECRECY

SALEM, Ore., July 27 (AP)—The members of the liquidation of the French and company bank at The Dalles which closed its doors in 1922 was discussed by the state banking board today behind closed doors. Frank R. Braunwell, state superintendent of banks, against whom criticism has been made concerning the liquidation proceedings, was not present, but was represented by Senator H. R. Butcher, of The Dalles, as his attorney.

FOILING DAVY JONES—A RESCUE AT SEA

Here photos of a rescue at sea. They illustrate the saving of 25 men from the sinking freighter Sagaland, rammed by the liner Veendam off Nantucket Island. Taken just at dawn, from the Veendam's decks, the pictures show the Sagaland's lifeboats returning to the line with members of the Sagaland's crew. The ships collided in a dense fog, and the Sagaland went to the bottom in 15 minutes. But all except one of her crew were saved.

(NEA, New York Bureau) Here photos of a rescue at sea. They illustrate the saving of 25 men from the sinking freighter Sagaland, rammed by the liner Veendam off Nantucket Island. Taken just at dawn, from the Veendam's decks, the pictures show the Sagaland's lifeboats returning to the line with members of the Sagaland's crew. The ships collided in a dense fog, and the Sagaland went to the bottom in 15 minutes. But all except one of her crew were saved.

IMBLER PERSONALS

IMBLER (Special)—The Unity Helpers held a very successful meeting at the home of Mrs. Homer Greene last Tuesday. A short program was given and a two-course luncheon was served by the hostess assisted by Mrs. Frank Martin. The next social meeting will be held at the home of Ella M. Walker, Aug. 7.

Hilda McCoy will lead the young people's meeting next Sunday night at the Union hall. Mr. and Mrs. George Marshall and daughter, Janet, left for Yakima Tuesday.

Ella M. Walker made a business trip to La Grande Tuesday morning.

Mr. and Mrs. Don Buckman, Mr. and Mrs. Tom Buckman, Grandson Murray and H. E. Hubbard were the dinner guests of Mr. and Mrs. T. M. Buckman Sunday.

Mrs. Alice Gordon is visiting at the home of Mrs. Lucy Allen this week.

Born to Mr. and Mrs. H. B. Voetsberg a seven and three-quarter pound boy Monday, July 25. Mrs. Voetsberg and baby are getting along nicely. They are at Hot Lakes.

Mr. and Mrs. John Birchfield went to Hot Lake Monday to visit their daughter, Mrs. Voetsberg and their new grandson.

"MAMA" STILLMAN HURLS CROCKERY AT NEWSPAPERMEN

(Continued from Page One) After had been erected on the wide lawn fronting the Stillman home and about it assembled several hundred guests including the country people for miles around.

First in the wedding procession came Father Ephraim Laimy, who had known both bride and bridegroom since childhood. He was accompanied by Father Normand and Delesta, all attired in their church robes.

The P.O. Regiment Royal Highlanders band of 30 pieces from Montreal broke into the strains of "Lobengrin" as Mrs. Stillman and Mrs. John Wilson, mother of the bride, walked down a line of ribbons. James A. Stillman Sr., the bridegroom's father, followed, and then came "Bud" with his best man, Fowler McVernick, of Chicago.

Then came Miss Belle Wilson, sister of the bride, followed by the bride on the arm of her brother, James Wilson, who gave her in marriage. Both girls wore Fifth Avenue creations.

Chiffon Gown The bride appeared sweetly charming in a gown of white chiffon. She wore a pearl and crystal ornament in her hair, and as her

only jewelry, wore a platinum chain, the gift of the bridegroom. The marriage ceremony was that of the Roman Catholic church. Prayers in English were intoned by Father Normand.

Several times a year, or when ever the waste water runs away slowly from the kitchen sink, wash-tubs, or other plumbing, the pipes should be flushed with boiling water, to cut the grease. That should be followed by a strong solution of caustic potash, lye, or caustic soda. Half an hour later the pipes should be flushed again with clear, boiling water.

Mock duck is a palatable, inexpensive, baked meat. It really is a flank steak stuffed with a bread-crumbs dressing, rolled, tied and baked. The meat is rolled lengthwise so that in carving it is cut across the muscle.

Schilling Tea
Iced fragrance

sealed
HOT
in vacuum

The only tea whose flavor is completely protected - kept fresh and fragrant from tea-garden to tea table. Five kinds of protection - all exclusively Schilling's - for the true tea flavors known only in the Orient: (1) Twice-toasted - the only way to unmask rich hidden flavors of a tea leaf. (2) Then the leaves sealed in vacuum (like your coffee) - - - but sealed HOT at its most aromatic moment.

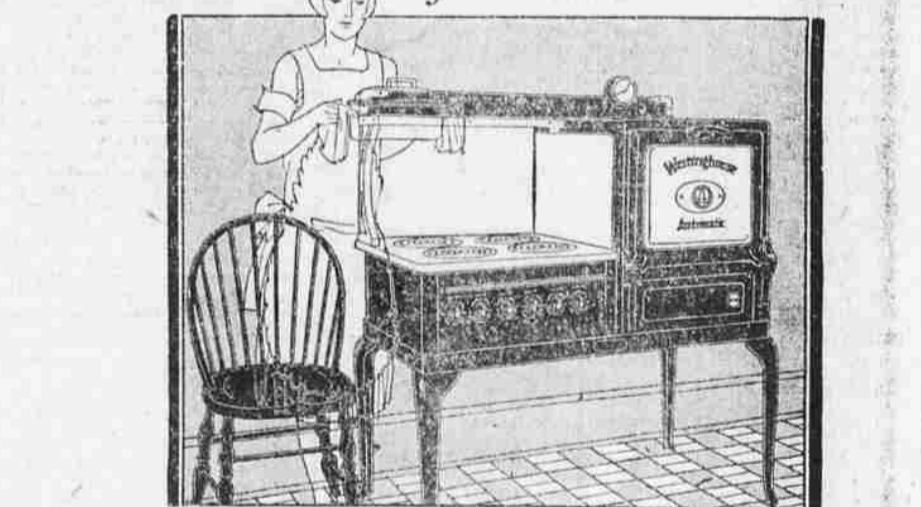

(3) The world's only key-wind vacuum tin for tea - - - with a Snug Cover - - - to protect it even after you open it. (4) Of the many grades of Orange Pekoe, only the choicest, most fragrant, are blended with Pekoe in Schilling's. (5) Your grocer protects you - - - he returns your money instantly if you don't like Schilling's best. You keep the tea.

Orange Pekoe
Your money back if you don't like Schilling's best

Also Green Tea (Japan)

The MODERN WAY for the MODERN DAY

It Goes On Cooking When The Current Goes Off!

THIS electric range saves current by turning itself off, automatically, just as soon as it reaches the right temperature. The oven is so perfectly insulated that very little heat escapes. As a result, cooking is finished by stored heat exactly as it would be finished in a fireless cooker.

All you have to do is place the food in the oven—set the clock and the thermostat. By dinner time everything is cooked deliciously without any attention from you.

The Clock Is The Cook

The clock turns on the current at the hour set. The thermostat turns it off so no current is wasted. And you have the whole afternoon free for household duties, shopping, or a club meeting.

Get a Westinghouse Automatic Electric

THE RANGE WITH THE CLOCK
FREE! With each Full Automatic Range purchased this month we will give one of the new Kollins beaters, selling regularly for \$20.

Eastern Oregon Light & Power Company

\$1.00 DAY!

NOT to indulge in "trick mathematics," folks—but for four quarters, ten dimes or twenty nickels you'll be able to pick up TWO DOLLARS worth of merchandise here tomorrow, Friday and Saturday! 'Sfact. For One Dollar you can get:

- 2 Pair Summer Kute Kat Play Suits
- 5 Pair Children's Half Sox
- 1 Khaki Outing Suit, age 2 to 11
- 1 Voile Dress, age 2 to 6
- 1 Stamped ready-made Dress, age 2 to 6
- 2 Ladies' Silk Step-ins, worth \$1.75 each
- 2 Boys' Waist Overalls, age 4 to 10
- 2 Pair First Step Shoes, size 2 to 5
- 3 Yards Figured Voile
- 5 Yards Colored Cretonne
- 2 Yards Colored Linen
- 1 Stamped Bed Spread

And several other items valued to \$4.00 will be sold at Special Price of \$1.00 Each.
