ABUNDANTLY SATISFIED: O God! the children of men take refuge under the shadow of thy wings. They shall be abundantly satisfied with the goodness of thy house, O Lord.

The fashionable week-end generally has a weak ending.

"Sulphite lye alcohol is mixed with gasoline as a motor fuel in Sweden" says a news dispatch. The Swedes are an unusual people. Gasoline and alcohol are mixed in this country sometimes, too, but it hasn't proved a very safe combination.

Anyone who "says it with flowers" in England has to learn a very extensive language now. There are 3000 more kinds of roses, 10,000 more kinds of gladioli and 6500 more kinds of dahlias than there were 20 years ago. The florist industry needs a Hoover to simplify and standardize it.

Pendleton and La Grande commercial bodies have called the attention of the state highway commission to the immediate need for reconstruction of the Old Oregon Trail between here and Meacham, similar to the improvement made over a year ago on the other side of the hill. The canyon road this side of Kamela is particularly dangerous. It is narrow and not protected by guard rails. Early attention of the commission is needed.

The national budget for the coming year has been completed by Director Lord and has been approved by the president to the extent of \$3,316,000,000, according to the United States Daily. On the basis of this total the director estimated the surplus for the current fiscal year would be \$338,000,000 as compared with \$635,000,000 realized last year. "I expect that next year the surplus will be \$214,000,000," he said, explaining that the public building program, the five-year air program, the army's barracks and cantonment construction program were responsible for the progressive lessening of the surplus. As the president has previously pointed out, it is not to be expected that governmental expense can be reduced each year indefinitely. It's to be less this year than last year but will start the upward swing again in '28-29. Which doesn't indicate, necessarily, that individual tax burdens will increase. The country is growing; population is increasing. New incomes are expected to more than carry any added load. The country refuses to stand still in population and in activity and cost of government will have to keep pace.

PEACE BRIDGES

That "peace bridge" across the Niagara river, from Buffalo to Canada, whose dedication occurred the other day, called forth appropriate utterances from men representing the two foremost military powers in the world. Said the Prince of Wales, speaking for Great Britain, referring to more than a century of continuous peace: "May this bridge be not only a physical and material link between Canada and the United States but may it also be symbolical of the maintenance of their friendly contacts by those who live on both sides of this frontier. May it serve also as a continual reminder to those who use it and to all of us that to seek peace and ensue it is the first and the highest duty of both this generation and those that are yet to come."

Said Vice President Dawes, speaking for our own country: "It is unthinkable that Great Britain and the United States, solemnly pledged to the principle of equality, will again place upon their peoples the burden of competitive naval building because temporarily their experts disagree in the practical interpretation of that principle."

Here is a timely reminder that the failure of the two countries to agree on naval limitation at the Geneva conference is a "disagreement of experts," not a disagreement of the nations they speak for. It is the popular will rather than arguments of naval specialists, playing a competitive game, that will settle this question sooner or later. The experience of these two great North American neighbors points the way. Mutual understanding and confidence of peoples is the true bridge of peace, and that is something of which the naval experts take little account.

Tariff For All Or None, Is Plea Of Dr. H. Taylor

WILLIAMSTOWN, Mass., Aug. 18 (AP)—A plea for an effective tariff for all or a tariff effective for none was voiced at the Institute of Politics today by Dr. H. Taylor, of the department of agriculture, in an address in which he blamed the government's policy as being largely responsible for the ills of the farmer.

"At the base of the disparity between the purchasing power of the farmer's dollar and that of the dollar of industry," said Dr. Taylor, "is the protective tariff whose burden lays on the farmer, to the advantage of industry.

Road Commission Inspects Highway

PORTLAND, Ore., Aug. 18 (AP)—The state highway commission with a number of guests left Portland today for an inspection trip over the southern section of the Roosevelt highway. The party will stop at Drain tonight and early tomorrow will proceed to Medford, thence to Marshfield, thence to the California state line. The section of the highway which will receive special attention on the trip is the 20 mile strip from Pistol river to Hookings which has just been completed.

Among those in the party besides the commissioners are Governor Patterson, Robert A. Booth, Eugene, former highway commissioner; J. C. Ainsworth, president of the U. S. National bank and president of the Roosevelt highway association; C. H. Purrell, district engineer for the U. S. bureau of roads; H. P. Irvine, Horace K. Thomas and W. B. Harris.

GRANTS EXTRADITION

SALEM, Ore., Aug. 18 (AP)—On a requisition from the governor of Washington Governor Patterson today granted the extradition of J. L. Wrayburn, who is wanted in Clark county on a charge of grand larceny. He is alleged to have given a farmer a number of bad checks in return for farm produce.

"SPIKE" LESLIE SAVED

MAHARFIELD, Ore., Aug. 18 (AP)—"Spike" Leslie, of Coquille, former star of the University of Oregon football team, was rescued from drowning while fishing near the mouth of Rogue river. Leslie was caught near the bar and was about to be carried out to sea when rescued by Marion Zumwalt in a power boat.

PIONEER DIES

MAHARFIELD, Ore., Aug. 18 (AP)—Anderson Wright, 94, died here today. He crossed the plains of Oregon by ox team, and served in the Rogue River Indian war.

HUGE FLEET IS SEARCHING FOR FLYERS

(Continued from Page 1)

Commander of the fleet, Rear Admiral Ben Wyatt, mentioned an officer who had inspected all entrants in the aerial contest.

Search Intense
Today all the means of communications were thrown into full play in search for the missing planes, neither of which carried radio sending sets. Airplanes were sounding out from the shores of Hawaii and California, scanning the broad expanses of the Pacific where the flyers may be battling the elements hoping to sight a passing ship, in their planes or in rubber inflated life boats which they hope for just such an emergency.

More Hopeful Prospect
The Golden Eagle presented a more hopeful prospect. It was sent into the sea equipped to carry out just such an emergency. Its navigator was considered one of the most skillful and Pilot Frost had a

Brains, Too

Miss Della Gransberg was not only pretty enough to win the title of Miss North Dakota this year, she was intelligent enough not to let the honor carry her off her feet. So she rejected the offer of a free trip to Hollywood, and instead took a \$250 cash prize. With this she will help put herself through normal school. Her home is in Kempton, N. D.

machine performing perfectly at the take off. If it stayed up for ten hours until half the gasoline supply was gone and was then forced into the open sea, the landing gear could be dropped after the plane reached the water and three extremities of the raft—the wing ends and the rear of the fuselage—could be inflated with air carried in a tank in the navigator's cabin. Pipe lines connected with the air tanks by turning a valve. The bottom of the Golden Eagle's fuselage was lined with cork and the sand bags could be placed on the wing tips to prevent the sea from pounding them to pieces.

The doors and all other openings were lined with rubber to make the Golden Eagle seaworthy.

Miss Doran Warned

Lieut. Ben Wyatt who made all the navigation tests for the Golden Eagle, made the following statement concerning the missing planes: "I am of the opinion that the Golden Eagle was forced down by engine trouble. Pedlar, the pilot on his return to the field was warned against taking off again since I did not believe that changing that spark plug would rectify the motor trouble which forced him back. I believe he experienced the same motor trouble that forced the Oklahoma out of the race.

"I am not at all loath to explain the non-arrival of the Golden Eagle since this plane was probably the best equipped of any in the race."

GREAT FLEET SEARCHING

WASHINGTON, Aug. 18 (AP)—Mobilizing the greatest fleet of vessels at its command in the Pacific the navy department today issued orders to search for the missing Hawaiian flight planes.

"The Yellow one with the black band"

"Miss Doran" and "Golden Eagle." Most of the ships were under way early today while the others are awaiting only the stocking up with provisions to speed out into the broad wastes along the 24th mile flight course in hope of finding the five missing flyers alive.

The armada of naval craft, which will be assisted in the wide search by airplanes and commercial craft, includes seven destroyers out of San Francisco, four destroyers en route from Honolulu to Seattle, 23 submarines and three submarine tenders from the Pearl Harbor station, the aircraft carrier Langley and the aircraft tender Annetank.

Submarines Assist
The submarine S-23 was reported speeding to San Francisco while the submarines S-15 and S-16 were being provisioned in Hawaii to join in the quest.

The search is in charge of Admiral R. H. Jackson, commander in chief of the battle fleet, who is on the destroyer McDonough en route to Seattle from Honolulu.

Rear Admiral Dudley M. Lass, commander of the submarine division reported that 22 submarines and three auxiliary tenders which were in Hawaiian waters engaged in practical maneuvers, were now deployed on a scouting line at right angles to the course of the planes, the line extending from the island of Hawaii to a point 50 miles north of the island of Kauai.

Seven Destroyers
Seven destroyers, the Hull, Curry, Sumner, Farenholt, Lavallette, Meyer and Halsewood, under command of Commander R. C. Parker, are conducting the search operations from San Francisco.

The cutter Langley and the tender Annetank sailed at 10 o'clock last night from San Diego for the nearest point on the great circle course between San Francisco and Honolulu.

When the Langley gets in position it will send up airplanes to increase the searching area. Planes from the Annetank also will be used if necessary.

Rear Admiral Thomas Washington, commander of the twelfth naval district at San Francisco, reported to the navy that no reports of the missing planes had been received.

Nos. 1 and 1A Pocket Kodaks Series II

Focusing models are supplied with Kodar lens f. 7.9 and Kodex shutter or Kodak Anastigmat lens f. 7.7, and Diomat shutter.

Open the camera and the front snaps right into picture-making position. Good values at \$12.50 to \$23—see them here.
