

"AGRICULTURE HOLDS THE SECRET OF UNION COUNTY'S FUTURE PROGRESS."

The Choicest Grain Of This Wonderful Valley

SELECTED EACH YEAR FOR THE MAKING OF FEDERATION FLOUR

Progress is movement toward perfection. The Pioneer Flouring Mill company has been buying grain from Grande Ronde valley growers and manufacturing flour for nearly half a century. It has milled grain which came from the first harvest off virgin land. It has watched the change to new varieties, the production of better and more abundant crops—has had a constant part in the agricultural progress of the most wonderful valley in the Northwest.

As Union county has gone forward, new methods in milling, new knowledge of food values, new tests for baking qualities have permitted us to match the progress of the community and of the industry.

The choicest grain of the entire valley is selected from the thousands of bushels bought by us each year for our milling. Expert millers, with years of experience and the advantage of most modern laboratory tests, supervise the making of the prime product of the valley—Federation Flour.

Buy Federation, not only because it's a Grande Ronde valley product and a means to greater valley progress—but buy it for Federation quality.
