

"HEALTH IS ESSENTIAL TO ALL PROGRESS"

A MODERN HOSPITAL EQUIPPED FOR ALL EMERGENCIES

The Grande Ronde Hospital is distinctively an institution typical of La Grande's growth, development, and notable progress. The comfort, care and security provided today is in sharp contrast to the meager and inadequate facilities for hospitalization not very many years ago.

This institution is glad to have the privilege of maintaining a high and enviable level of service for the La Grande community. It is justly proud of its equipment and its facilities. Visitors are always welcome and will be shown through the hospital gladly.

Community Progress

Progress deserves to be recorded. The La Grande community has made great forward strides in recent years.

Buildings have been built. Others have been improved. Seldom is there seen a more attractive business district than here.

Industries have grown. New industries have come in. The city's annual payroll is well envied by neighboring towns.

Beautiful homes have been added. Lovely yards have been cultivated and have thus urged others toward greater community pride.

An Accredited Nurses Training School of High Standing

Applications may be made for admittance to this hospital's School of Nursing. It offers an opportunity for thorough training, active medical and surgical services, X-ray, laboratory, and it is also connected with a fully-equipped physiotherapy laboratory.

Pleasant training surroundings and the assurance that the resulting certificate will command high respect wherever work is engaged in—these commend this School of Nursing to any prospective applicants.

Community Growth

There is much to be proud of, in the city and throughout the valley—much that has been accomplished.

And it indicates how much greater progress the future may hold—emphasizes greater possibilities.

Every community institution and citizen can have a definite and helpful part—a pleasurable duty.

This particular institution is glad to be able to aid and cooperate with their early realization.
