The state chemist found traces of poison in the young woman's viscera. James Hayes, younger son of the couple, died on June 15, 1927, and his death was believed due to natural causes. Amos came home from Detroit to attend his brother's funeral and remained a few days to visit. He was taken ill and on July 9 died in a Dothan, Ala., hospital.

It is a fundamental principle of our institutions that freedom, education and wealth are not to be reserved for the few but are to be reached through equal opportunity which is open to all. We have staked America on the potential capacity of the average citizen."

Lauding the progress made by the city of Pittsburg, the president called particular attention to Andrew Mellon, his secretary of treasury and Richard B. Mellon, of Pittsburg, whose generosity made possible the art exhibition. "They stand out as men who are devoting themselves to the service of humanity," he declared, "one remaining as a leader in great financial and industrial enterprises and the other by turning his great talents to the administration of public finance as secretary of the treasury of the United States, where his leadership in the last six years has been greatly instrumental in restoring the economic equilibrium of the world."
