## The Garden

### NARCISSI FOR THE LIVING ROOM

There is only one precaution to be observed in growing narcissi indoors and that is to see to it that they are not placed in too hot and dry an atmosphere. Under these conditions the buds may blast.

The Paper White narcissus is the most popular plant for house decoration in the winter and one of the easiest grown. It thrives in soil, wet sand, water and pebbles, or fibre. It need not be set away to make roots but it is

better to do so if planted in earth. It should not at the start be placed in full light as this forces top growth too fast, while root growth is the main factor to be established at the start. As soon as the roots are well developed, bring to the light and close to the glass.

Other varieties of the polyanthus or cluster-flowered narcissus are as easily grown as Paper White and give beautiful yellow and whites with yellow cups. The popular Chinese Lily is a polyanthus narcissus.

The trumpets are the most easily handled of the other classes of narcissus and one may have daffodils very easily, providing the warning against hot, dry air is heeded. The old Emperor is an excellent plant for the purpose and King Alfred and other giants sometimes give finer bloom indoors than they do in the garden. It must be borne in mind that they are hardy bulbs, like to grow cool, and need no coddling. Grow them in the coolest room in the house until they bloom.

The trumpets and the polyanthus are the best types for use in the ordinary dwelling. The flat cups and Leedals are more likely to blast than these types and the poetical cannot be grown except under perfect conditions to any good advantage. A cool greenhouse is the best for them.

There is, however, the polyanthus and trumpets, material for a succession of beautiful pots or bowls of flowers for a long period during the winter season by starting the bulbs a week or so apart. The soil is a minor consideration, provided good drainage is given. No fertilizer, except bone meal should be used and a teaspoon of this in a five-inch pot is sufficient. Set a pan of water near the plants to give them the moist atmosphere that they need. The

# Now Read What 11,105\* Doctors say About Lucky Strike Cigarettes Because "It's toasted"

**Paul Whiteman, Noted Orchestra Leader, writes:**

"It was but recently, when I started to act as master of ceremonies with my band at the Paramount Theatre, that I realized how vital perfect voice condition was to a performer. I have always been a consistent smoker and, fortunately, Lucky Strikes were my favorite brand. I like their toasted flavor and, best of all, I can smoke as often as I like, without fear of irritating my voice, which is becoming a great asset in my work."

*Paul Whiteman*

WHAT is the quality that Giacomo Rimini, Margaret D'Alvarez, Cesare Formichi, Armand Tokatyan, Emma Trentini, William Faversham, Florence Reed, Paul Whiteman, and other famous singers, actors, broadcasters and public speakers have found that makes LUCKY STRIKES delightful and of no possible injury to their voices?

For the answer we turned to medical men and asked them this question:

Do you think from your experience with LUCKY STRIKE cigarettes that they are less irritating to sensitive or tender throats than other cigarettes, whatever the reason?

11,105\* doctors answered this question "YES."

Consider what these figures mean; consider that they represent the opinion and experience of doctors, those whose business it is to know.
