

FOUR KILLED IN PISTOL BATTLE

Armistice Day Tragedy
Breaks Calm of Opp,
Ala., Observance

OPP, Ala., Nov. 12 (AP)—Armistice day in this small southern Alabama town left in its wake four dead from participation in a spectacular gun battle and two witnesses suffering from bullet wounds.

Policeman Ed Nix, 36, and Lee Clark, 45, were fatally wounded last night but not before they had brought down Cleve Dauphin, 40, and O. C. Dauphin, 18, his son.

Earlier in the night, the two officers had attempted to stop a car driven by young Dauphin, who was said to have been making a disturbance. Firing at his automobile failed to stop him, and the youth returned soon afterward with his father.

Reports of the trouble had attracted a large crowd, which dispersed as firing started with the approach of the policemen. No words were passed by any of the participants as they advanced slowly in the open firing and reloading their weapons until they fell. When the firing ceased, only Nix was found alive and he died at a hospital a few minutes later.

Miss Effie Davis, an Andalusia school supervisor, and Grady Baul, 17, both were wounded by stray bullets. Miss Davis was carrying her sister's baby which was unharmed.

Opp police declared both Dauphins bore records as liquor law violators.

INDIANAPOLIS MIGHT WORK MAYORS IN SHIFTS

With two men claiming the mayoralty following the ousting of Mayor John Duvall, Indianapolis might solve the problem by working its chief executive in two shifts. Here are the claimants, Claude E. Negley (left) and Ira L. Holmes. Holmes claims the office by reason of appointment from Duvall as city controller, while Negley, president of the city council, has been chosen mayor pro tem by that body. Here they are shown seated at the executive desk while the courts are trying to decide who's who.

This is the Claude C. Pratt Lumber company speaking and I have some news to tell you about Martin's Full-Gloss White Enamel that has no peer. No better enamel has ever been made. This Martin's Full-Gloss White Enamel is used on some of the most particular jobs in the United States. Palaces, mansions, large public buildings, in the kitchen, on the interior, and on the exterior. Nine dollars a gallon seems like a tremendous price, but when you consider how many years this wonderful piece of enamel will wear it is cheap at any price. We have given the painters a chance to try it for themselves and so that there is no "guess so" proposition with them. They will tell you it's about the easiest enamel applied and looks like it ought to wear extremely well. And now in regard to the wearing quality, let me brush every doubt from your mind. If just Claude C. Pratt was the only one back of the enamel, there might be such a thing as we would pass away some of these nights and all you would have left would be just an empty can and a receipt for your money that you had paid out. We want to say this, that the Martin's enamel company, the largest manufacturers of absolutely 100% pure paint in America, is back of the Martin's Full-Gloss White Enamel. We took money out of our own pocket in order that the painters would have a chance to try this enamel. Now we are willing to still give you a liberal discount on this Martin's Full-Gloss White Enamel. But it is no more than fair that we should have a reasonable profit for handling it, since the people know exactly what it is. Don't need to take our word for it—ask your painter.

ZENITH —LONG DISTANCE—RADIO

Why does not Zenith build a radio receiver to sell for less than \$100.00?

Zenith has the laboratory, the engineers, the organization and the financial resources to build any kind of radio. Then why not go below the \$100.00 price?

Zenith Model 14

A sensitive, highly selective 6-tube receiver of remarkable tone quality and range. The cabinet is of walnut veneer with ornamental overlays and panels of beautifully figured maple. The doors do not stand open like wings, but fold back against the sides of the cabinet, out of view. Model 14 will bring you all that is fine in radio.

For Battery Operation—\$180
Completely Electrical—\$255

The answer is that the Zenith standard of quality cannot be built into a receiver of lower price. Zenith will not put its name to a receiver that is not highly selective, powerful, faithful to the entire tone scale and wrought with surpassing skill and durability.

Performance comes first in Zenith—there is no compromise. The 6-tube set has six working tubes instead of five working tubes and one balancing tube. Instead of three condensers the 6-tube set has four—the 8 and 10-tube sets have five and six condensers respectively.

In every detail the same exacting standards are carried out. Zenith costs more but it does more. Hear Zenith and you will agree that Zenith is unsurpassed.
