A Favorite Kipling Story

It is recorded of this well-known British author that he once remonstrated with a friend for having sent him a publication from which the advertising pages had been cut. "Why, you have thrown away the most interesting section!" Mr. Kipling said.

Advertisements are more interesting today than at any time since the invention of movable type. Merchants and manufacturers realize that their announcements must compete for interest with the work of the high-priced authors and illustrators.

If you are not a regular reader of the advertisements in this paper, this is a good time to cultivate their acquaintance. You will find them interesting. You will find them friendly. They show you where to stop and take considerable strain off both shoe-leather and pocketbooks.

Read the advertisements because they are interesting. Believe them because they are true. Act upon their suggestions because it will pay you in many ways. Before you pick up the telephone, you usually consult the phone-book. Before you start out to shop, consult the advertising columns of this paper. They consult the advertising columns of this paper. They you want.

Don't stop with reading the news and editorials. The advertising columns are equally important
