NEW YORK—A Russian engineer who makes music by moving his hands through the air is visiting us. Leo Theremin, 31, is here to demonstrate a machine which has caused a sensation abroad. It looks like a home made radio set. When he moves his hands over something that looks like antennae notes like those from a cello or a flute come from the machine; the nearer the hands to the machine the higher the pitch.

Highway Board To Check Road Work in Linn Co.

SALEM, Ore., Dec. 22 (AP)—The state highway department holds a certified check of [illegible] presented yesterday by H. A. Biggs. As a result the highway department will retard construction of the Santiam highway through a strategic railroad a short distance west of Sweethome, Linn county, where unidentified railroad interests represented by Biggs will build through the point on the right of way of the Santiam highway and beyond into the heavy timber district of Eastern Linn county.

At the strategic point in question the highway department will move to a higher elevation the right of way for the Santiam highway now under construction.

A competing railroad party represented by H. P. Byers did not post a check with the highway department yesterday, hence the Biggs people have the upper hand in building through the strategic point. The Byers people explained that they were without authority to post a check for the reason that one of their principals was in the east.

Neither side would reveal the identity of the interests represented. It is known that a large part of the heavy timber to be tapped in Eastern Linn county is owned by Louise F. Hill.
