HEALTH

CATARHIT By L. W. Oaks, M. D., Provo, Utah

Member Gorgas Memorial In former days, when dawn of medical knowledge had merely announced its approach, the name of the medical profession. Today the word is rarely employed by physicians trained in disease of the nose, throat, and ears; because they have learned it is only a term used to cover a lack of exact knowledge.

People in general have come to regard catarrh as meaning some stubborn disease of the nose or its associated structures, which is attended by more or less discomfort, and some dropping of secretion from behind the palate into the throat. They also frequently consider interference with proper breathing through the nose as being due to this condition.

As a matter of fact, these symptoms may come from any one or more of nearly a dozen different diseases of the nose and throat. This list includes widely varying troubles, from stopping up of the nose by new growths to shrinking away of soft tissues there, which leaves abnormally great space with marinating and very foul breath. Deformities within the nose are usually responsible; and they, in combination with infection, account for nearly all troubles inside the nose.

One way to make an unwelcome guest take an early departure: Treat him like one of the family.

"How is it that you, who are so lucky with cards, always lose at horse racing?"

"Well, I can't shuffle the horses."

Manchuria grows

WASHINGTON—Reports to the department of commerce credit Manchuria with having had the greatest colonization movement in history in an area of such size and in so brief a length of time. Due largely to railroad development, Manchuria in 30 years has grown from a population of 2,000,000 with no railroads to a population of 27,000,000 and 4,000 miles of railroads, or about as much as in all the rest of China. Although Manchuria has only six per cent of the population of China, its total trade is 30 per cent that of the whole country.

Many Christians are daily extracting money from innocent victims for the treatment of "catarrh," without any more knowledge of what they are trying to treat than their patrons themselves have. In most instances, the proper treatment for these various diseases are as different from each other as are the correct measures for appendicitis and a broken leg. It is obvious then, that no one who really desires to be of service to his patient will even prescribe for such trouble, without first making a proper examination of the sufferer's nose, sinuses, cavities, and throat, at least. Guessing is not a scientific means of investigation; and he who accepts anyone's guess in matters pertaining to that most precious of possessions—his health—is certainly to suffer in consequence.

Consult your physician and give him a chance to see what is wrong, so he may help you to right it.

Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creosolulion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth of the germs.

Creosolulion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, laryngitis and other forms of respiratory diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold is not relieved after taking according to directions. Ask your druggist. (adv.)
