State to Develop Land Settlement

EGGENE, Ore., Mar. 21 (AP)—Land settlement in all sections of the state will form a much larger part of development programs during 1928 than ever before in the state's history. It was brought out at the third session, Wednesday, of the state Association of Chamber of Commerce Secretaries, who are meeting at the University of Oregon this week, for their eighth annual short course.

Progress of the land settlement program now being followed in the state was told the secretaries by W. G. Ide, of the Oregon state chamber of commerce, and H. E. Culley, of Roseburg. "Every local chamber is ambitious for industrial development, but this must come through agricultural development," declared Mr. Ide. "Our great need is for expanded, organized, efficient factories, poultry and meat plants, cold storage facilities and warehouses, but these cannot be obtained without sufficient volume of quality production to support them."

Restful Ease After Coughing

"The result of using Foley's Honey and Tar for a dreadful cough, daytime and at night, was a restful one for me," says Mrs. Anne Davidson, Long Beach, Calif. "The hard cough that follows bronchitis and 'flu' is weakening, and when it 'hangs on' very debilitating. Foley's Honey and Tar Compound puts a healing, soothing coating on a rough, inflamed throat and immediately eases the irritation that causes the hard cough. Dependable. Ask for it. Hen Breaks Maine Egg Mark With 303

ORONO, Me. (AP)—A plain Rhode Island Red hen without a name—but with something better: a total production of 303 eggs in a year—has disrupted all Maine egg-laying records.

"C-253" is the number on her aluminum band and she lives in the poultry houses of the University of Maine. She might have done even better, the specialists at the college say, but they decided that she had earned a rest and a change of feed. By further breeding it is hoped that among her daughters and granddaughters there will be descendants who will exceed her record.

The college bred birdie comes from blue-blooded ancestry on both sides of her family. She was hatched in 1926. In September of that year she laid 25 eggs; chalked up a "monthly" total of 31; then struck a steady gait of 22 to 26 eggs a month.

Prevent Flu—Check All Colds the Modern Way

Families in La Grande Urged to Be Careful
While grip and influenza are so prevalent local people are urged to use this modern way of checking little colds before they become big.

Have a jar of Vicks VapoRub on hand ready for instant use at the first sign of every cold. When rubbed on throat and chest, or sniffed up the nose, Vicks releases its ingredients in the form of medicated vapors which are breathed in direct to the infected parts.

In addition Vicks acts like a poultice and thus helps the vapors inhaled to break up the congestion. To prevent colds lowering the vitality and thus paving the way for flu and pneumonia, the throat should be treated directly and instantly as you would an infected finger.

When Loren J. Jones (lower) of Kansas City, Kan., took the family car the other night and failed to return at a "respectable hour," she was punished by her mother, Mrs. Christine Woodside, pictured at the top. The 18-year-old girl took refuge with a school teacher and the mother was haled into court on an assault charge. The mother denies she beat the girl, she says she simply gave her a good spanking.

How can you sell so down-right cheap?
The goods we do not keep.
Wallpaper goes like an old greyhound.
The paint just makes a big quick brand.
Rustling bits and splatters out.
And oil is soon all poured out.
Glass, he break, we replace—
The lumber makes just first base.
It sure is lots of down-right fun
To see the stuff get up and run.
If you want to save the dough
Come here now, not somewhere else.

People often ask, "How in the world do you sell such a great quantity of stuff?" We do not take credit for selling anything. Price is what talks. You cannot blame people for saving every nickel and penny they possibly can, especially in these days. Most of the time people express themselves in general in general is mighty dull and at the same time we are doing a healthy and rushing business as fast as the hand can get.
