Cures biliousness, indigestion and constipation. Fifty and 100 cent packets sold at drug stores. For free sample, write Chamberlain, Medicine Co., 288 1/2 Ave., Des Moines, Iowa.

CHAMBERLAIN'S TABLETS "Help You Stay Well"

AUTO RUNS 39 MILES ON GALLON OF GAS

Automobile engineers who worked for years in an effort to reduce gasoline consumption have found the solution in a marvelous invention that fits all cars. An actual test made by one of the engineers showed 39 miles on a gallon of gas. Thousands of car owners have already installed this new invention. They not only report amazing gas savings but are also surprised to find quicker start-up, instant starting, smoother running motors and longer life of carbon, E. Oliver, 505-144 E. Third st., Minneapolis, Minn. for a limited time is offering a free device to those who will help introduce it. He also needs men everywhere to make over \$100 weekly in their own territory taking orders of local business. Write him at once for free sample and his money making offer.—Ad.

Yesterday evening just as we were closing our business, we sold a \$27.50 order of Monarch paint and handed it to people who lived in one of our neighboring towns. I wish every man and boy, woman and girl in this entire Grande Ronde valley could know the difference between Monarch 100 per cent pure paint and just common ordinary adulterated mixed paint.

If you are really good in imagining things, please move your chair right up close to my desk and watch carefully what I am doing. We are going to give you a little demonstration and show you the ingredients that Monarch 100 per cent pure paint is made of. This first little bottle contains pure carbonate of lead in the powdered form. We take our little paint spatula and take a little of the white lead and place it on our mixing board. Next we take a little zinc oxide and place it in a pile close to the white lead. Now we will take a few drops of pure linseed oil and mix these two ingredients together. You notice as we mix them how they form themselves into a pure, velvet-like white paste that covers about half of our mixing board.

In the second demonstration we are going to give you this: The first little bottle contains silica, a chemical name for white ground sand. It looks just as white as the white lead. The second little bottle contains whiting—the kind they make chalk for school out of and also putty for windows. The third little bottle contains barites, just the chemical name for white ground rock. We will place three little piles of this earth and paint side by side, then we will place a few drops of linseed oil at each pile of sand, whiting and rock. Now we take our little paint spatula and mix this so-called paint material up until it almost loses its identity in the oil until you wouldn't have enough white paint material to cover a mosquito's wings. It looks like a dirty mess. Keep in mind the white lead and zinc oxide that we have already mixed up before your eyes. And now we take our paint spatula and mix the sand, whiting and rock into the pure lead and zinc and you can see how that the zinc and lead being so white cover up this earth and dirt, but we don't cover any more lead surface. There is only one reason why that sand, whiting and rock are put into paint, and that is for profit. You carry more weight home and you pay big money for it—in fact about 20 times what it is really worth, but you don't cover only about half the surface with ordinary adulterated mixed paint as you do with the Monarch 100 per cent pure. People that have tried our Monarch paint just go wild over it. Our trade is increasing daily. A man came clear down from Baker yesterday in order to get in touch with Monarch paint. Trust on the best.

are tips on economical
home decorating from a few
enthusiastic users of
PABCO LACQUER

THE past few months have brought a regular deluge of letters from people who have used Pabco Lacquer and who are so enthusiastic about it that they wanted to write and tell us how they used it.

Read them—and see where this remarkable finish can add attractiveness and charm to your home, at small cost and with minimum work.

LETTERS FROM USERS:

3 Coats in One Day!

"Best of all, I put on three coats in one day. It turned out wonderfully. I am more than pleased."

Repaints Wooden Toys

"I used it on wooden toys, in comparison with three other kinds of paint. It dried quickest, went on the smoothest and looked the nicest of all."

Flower Pots and Boxes

"I used Pabco Lacquer on flower pots and boxes. It was very easy to apply and dried very quickly and evenly."

Sewing Cabinet, Washing Machine

"I used blue 1619 to finish a sewing cabinet and was so well pleased with the quick drying and ease of application that I purchased a can of light grey and gave the washing machine one coat. It looks like a new machine. Another thing, there is no sickening odor as when paint is used. After the holidays I intend to brighten up several pieces of furniture."

You, too, can make your home a more beautiful place in which to live. A little touch here and a little touch there, just as these people have done, will accomplish wonders. And you'll enjoy doing it.

THERE'S A PABCO PAINT FOR EVERY PURPOSE

The Pabco Paint Line includes paints, enamels and varnishes for every possible use. Each, for its own purpose, is as fine in quality as Pabco Lacquer. No finer praise is possible! Insist upon Pabco when you are buying paints. PABCO PAINTS, VARNISHES, ENAMELS, LACQUERS

STUDEBAKER
The Great Independent
Offers World's Champion Performance at no premium in first cost or upkeep!
COMMANDER
\$1495 f. o. b. factory

25,000 MILES in less than 23,000 MINUTES

YOU may have wanted to own The Commander, but felt you could not afford it. You may not know that, due to Studebaker's One-Profit facilities of manufacture, you can now buy this World's Champion car at the exceptional price of \$1495, f. o. b. factory.

At this low, One-Profit price The Commander not only represents a value unequalled in automobile history, but its upkeep is equally economical.

In 61 tests conducted in 61 cities the country over, The Commander averaged 17 1/4 miles to the gallon of gas—economical to operate! And factory repair parts sales for Studebaker cars during 1927 were less than \$8 per car

in operation—low maintenance! The world champion stamina of The Commander was spectacularly proved when two stock Commanders each traveled 25,000 miles in less than 23,000 consecutive minutes. Nothing else on earth ever ran so far so fast!

Remember—you pay no premium for this Championship performance in this Studebaker quality car. The Commander at \$1495, f. o. b. factory, is not only the greatest achievement of post war automotive engineering, but motordom's biggest value!
