PETUNIAS FOR COLOR MASSES

Petunias are general-purpose flowers for every home. They are indispensable for masses of color in the garden, for window boxes, for the porch and for the sunny window in winter. The small flowered sorts are now popular for cutting, using long sprays in bouquets. The development of the petunia has given us several distinct types with distinct uses. These are the large flowered singles with marvelous blooms fringed and ruffled, with exquisite veining and markings, fine exhibition flowers; double sorts for bedding and house decorations; balcony types, ideal for window and porch boxes because of their long drooping stems and freedom of bloom; and the bedding type, small flowered and giving great masses of brilliant color. Of this last type the Rosy Morn petunia has become one of the best known and best loved annuals in the garden.

The seed of petunias is very fine. It should be sown in a box or frame where it can be protected from heavy rains as the tiny plants are destroyed by the wash. If planted outdoors protection against driving rains must be provided. The seed should be sprinkled thinly upon the soil and pressed into it with a brick or smooth block of wood.

As soon as the tiny plants are large enough to be handled they should be transplanted an inch apart into other boxes to grow until ready to set into the open ground. If grown in the open ground, they should be transplanted as early as possible. Crowding makes them spindly so badly that they are practically worthless and will never make good plants.

Petunias are not particular as to soil but they will not do their best unless they have rich fare in which case a single plant will cover a space of two feet by midsummer with myriads of blossoms almost hiding the foliage. They are good heat resistors. The best sorts for the garden are the small flowered bedding kinds planted in masses of separate colors. The whites, roses, violets and crimsons give the finest effects. The variegated sorts are interesting and attractive.

Evening Bustles Call For Jackets

By Hazel Heavis
(Associated Press Fashion Editor)

PARIS (AP)—Spring styles in evening dresses often make the wearing of wraps difficult if not almost impossible.

Stiff taffeta made with gigantic "choux" cabbage in the back or on the side is sure to "hump" when coat or cape is draped over it.

But as Paris will have its bustles and bouffants nearly every dressmaker shows some form of short jacket or cape, suitable for midsummer wear over dresses with elaborate skirts.

The shoulder capes, plus the new evening skirts, elaborately ruffled or draped, give a mid-Victorian touch to evening fashions and set them apart from the straight lines and simple clothes most women wear in the daytime.

Nearly every creative dressmaker uses stiff taffeta in some form, usually draping it to a point on the side, or a bustle in back. These drapes fall in pointed panels, or form small trains. Printed chiffons are frequently treated in the same manner, or combined with stiff silks. Paris makes many duplicate designs this season, repeating patterns on taffeta, chiffon and satin.

Some of the new evening gowns have skirts that nearly trail the floor but are made of narrow panels which hang from the waist. With every step these gowns reveal an extremely short skirt beneath, or perhaps equally short trousers. Jeanne Lanvin makes such dresses of taffeta, Louise Boulanger uses several thicknesses of net or chiffon.

The net dresses have light bodices, embroidered all over with beads and the same beading is repeated on the foundation skirt or trousers.

Mrs. Michel Weill, San Francisco society woman, and Miss Hallie Stiles, Metropolitan opera singer, have examples of the new evening fashions in their wardrobes. Mrs. Weill ordered a red and green flowered taffeta dress with two large puffs in back, extending into long draperies which just clear the floor. Miss Stiles purchased a short jet jacket with jet bell sleeves, for wear over a black chiffon dinner dress.

Blindfolded . . . in scientific test of leading Cigarettes, Princess Paul Chavchavadze selects OLD GOLD

"I was much intrigued by the invitation to make a blindfold test of your leading brands of American cigarettes, to see how they compared with each other and with those I had smoked abroad. Could one really taste the difference? I wondered.

"But when I was handed these cigarettes, one by one, I realized at once that there was a difference and that the test was conclusive. One cigarette was so much more appealing, so much more delicate in flavor. Oh, and so much smoother!

"When the test was over and I was told that the cigarette of my choice was OLD GOLD I understood at once why this cigarette is so popular among my American friends."

Nina Chavchavadze

PRINCESS PAUL CHAVCHAVADZE, Sister of Mrs. Wm. B. Leeds

How Test Was Made

Subject was blindfolded, and, in the presence of two responsible witnesses, was given one each of the four leading cigarettes to smoke. To clear the taste, coffee was served before each cigarette. The Princess was entirely unaware of the identity of these cigarettes during test. After smoking the four cigarettes, the Princess was asked to designate by number her choice. Without hesitation she replied, "No. 3" . . . which was OLD GOLD.

BREAKFAST—Grapefruit Juice, cereal, cream, waffles with new maple syrup, milk, coffee.

LUNCHEON — Stew of mixed vegetables, bread and butter and jelly, chocolate rice pudding, milk, tea.

DINNER—Baked stuffed whitefish, dandelion greens, stuffed quoniam salad, sponge cake and peach sandwiches with whipped cream, milk, coffee.

Any fish weighing between two and three pounds can be chosen for the dinner fish. Small, small haddock, bass, bluefish, Spanish mackerel or weakfish might be selected in place of the whitefish suggested. In the following recipe the fish was baked on a glass platter and sent directly to the table from the oven.

Baked Stuffed Whitefish
One 2 or 3-pound fish, ½ cup rice, 2 cups canned tomato, 1 onion, ½ cup minced celery, 1 tablespoon sugar, ½ teaspoon salt, ½ teaspoon pepper, 4 slices salt fat pork.

It will pay Contract players to study and grasp the fact that a jumping decision is based on two elements and one principle. The

tail and fins removed. Wipe thoroughly with a damp cloth and rub inside and out lightly with salt. Salt the whole length of the fish, but do not separate along the back. Wash fish through several waters and cook in boiling salted water for ten minutes. Drain and put into double boiler. Rub tomatoes through a colander to remove seeds, forcing pulp through. Add to rice with onion peeled and minced, celery, salt, pepper and sugar. Simmer over hot water until rice is tender and has absorbed tomato juice. Place prepared fish on an oiled platter and stuff with rice mixture, filling the fish very full and not attempting to sew gash together. Cover with slices of salt pork and bake thirty minutes in a hot oven. Remove pork when ready to serve.

Umbrella Pleats
New Style Dodge

PARIS (AP)—The dressmakers' latest disguise for fullness in skirts is the umbrella pleat, a small triangular piece of fabric, inset so that the pleat is small at the top and wide at the bottom. Paris uses it on crepe de chine and chiffon as well as tweed and woolsens. Skirts that are umbrella pleated are smooth and tight at the hips and have the necessary straight-line silhouette when the wearer is standing still. In motion they show a decided flare.

Sometimes a man is so respectful that his neighbors have but little respect for him.

Most of us don't know we're in trouble until we are caught.
