GO OVER FALLS IN RUBBER BALL

(Continued from Page 1) ripped open and the Springfield man hauled from within, smiling. One hundred thousand or more people, lining the shores cheered. His sister, Madame J. P. Cautiers of Sherbrook, Que., kissed him. Many other women tried to do likewise. Not a few succeeded.

Once Is Enough "I have spent more than a year and more than \$7000 on my venture," Lanster explained yesterday. "I've succeeded and I am happy. I have demonstrated that my theory was correct. I could do it again, I am sure. But once was plenty for me."

"As the ball was carried down stream in the rapids it was bumped about quite a bit. Just before I plunged over the falls I received an extra severe bump. It gave me a nasty bruise on my right temple, another on the right cheek and one on the left shoulder blade.

No Time to Think "I had really no sensation when I landed on the water at the bottom. I got a good jarring. The ball struck the water and bounced up and down six times just like a ball being bounced on the sidewalk by a child. I went over the falls head first but straps and pillows saved me from serious injury."

"I got my first idea of going over the falls while working in machine shops at St. Catherine, Ont., at the time Bobby Leach went over in a barrel for the trip and the fact that I did not get injured as badly as did Leach is proof that my theory was correct.

Lanster is of French descent and was born at Concord, N. H., Oct. 27, 1893.
