NORTON'S KIDDY SHOP Better Merchandise --- Lower Prices

Here's the unique feature revolutionary—but so simple!

GENERAL ELECTRIC Refrigerator

The hermetically sealed steel casing, indicated by the arrows, houses all the machinery of the General Electric Refrigerator. It also contains all the oil this machinery, and the tiny motor which operates it, will ever need to protect them from wear.

The engineers and scientists of General Electric worked for fifteen years to develop a refrigerator that would be thoroughly efficient and virtually trouble-proof.

By the very nature of the design, the entire responsibility for satisfactory performance rests with the manufacturer. Every part of the machinery is built, tested and retested in the General Electric factory. The assembled mechanism is sealed in this electrically welded casing. It is then put through a final test. You never see the machinery—we never see it. No one is responsible for it except General Electric and they guarantee its absolute efficiency.

When the refrigerator is delivered, all you need do is plug the cord into any electric outlet—just as you do your fan. Automatically, quietly, economically, this mechanism which you never see and need never think about, gives you perfect refrigeration.
