

Refinements In Body of Car Aid To The Tourist

they are demanding comfort, and perfected to almost the nth degree, auto tourists this year are turning their attention somewhat from this feature of their cars to that of their body refinements. This tendency has been brought emphatically before the auto manufacturers by the multitude of reports from the dealer organization as to what the buying public is asking when it approaches the point of signing on the dotted line.

Especially is this true as the vacation season opens. More and

more vacationists are turning to auto travel and more and more the year demanding comfort and refinement in the bodies of their cars as well as sturdiness and quite in what is under the hood. The demands of the motoring public have been impressed on the factory and from them the manufacturers have evolved cars that incorporate comfort, beauty, safety and engine dependability. The engineering and sales departments of the Oakland Motor Car company have worked tirelessly in co-operation with the Fisher Body corporation to bring about this co-ordination of utility and comfort so that in the Oakland or Pontiac cars of today the tourist has an automobile which stands every test.

Month-Old Baby Is Found Among Ferns

OREGON CITY, Ore., July 21 (AP)—A tiny baby boy, 4 weeks old, was found Thursday utterly naked in some ferns along the south end road near Twilight by A. M. Pierce and his son. They were attracted by the lusty cries of the infant, which was taken to the Oregon City hospital.

Clears His Name After Two Decades

EDINBURGH, Scotland, July 21 (AP)—Oscar Slater, convicted of the murder of Miss Mary Gilchrist, an aged woman, 20 years ago, Friday won his fight to clear his name of the conviction.

Slater, who originally was sentenced to death and then served more than 18 years of a commuted life sentence, before he was released, began a fight to prove his innocence soon after he was released from prison. His case had attracted wide notice and interested many prominent people including Sir Conan Doyle, noted writer.

Ancillon, Joe's new speedster is awfully cute.
Betty: Yes, you ought to see it play dead on a lonely road.—Life.

Farmers Asking Fair Treatment From Motorists

Many rural residents are protesting because destructive actions of some city motorists who, upon their excursions into the country, tear down fences, destroy scenic sites and encroach upon private property, according to the Oregon State Motor association which issues a plea for fairness in this regard.

The most vicious protest regards those who camp upon a well-kept plot of ground, strow their debris about carelessly and, upon leaving, often drive over tilled land, thus damaging crops and causing financial losses to owners.

Another protest is against motorists who displace, or run through fences into private fields. Another is against those who disregard the state law prohibiting plucking flowers from private lands and devastate regions which have been preserved for their scenic attractiveness.

"Many rural residents are glad to have their city neighbors visit them but they do expect consideration, fair treatment," says A. E. Shearer, manager of the touring department of the Oregon State Motor association. "Most of the land outside of the city limits is private property and common courtesy requires that the intruder ask permission of the owner before entering."

"Those who do ask for permission to picnic or camp generally are welcomed and often are given special courtesies. However, if permission is refused, the city dweller can be reasonably sure that past actions by him and his fellows have made the farmer wary of all motorists."

OLDS CLOSED BODIES HAVE SEVERE TEST

Take a fine piece of furniture, the exterior finished to rival platinum with soft fabric upholstery; wrack and twist this piece of furniture for hours at a time, day after day; leave it out in the sun, rain and snow subjected to constantly changing temperatures, and then expect it to last for years and retain its fine appearance.

That is exactly what is expected of closed automobile bodies—and it is exactly what the better ones do. An automobile body is essentially a piece of furniture, providing the comfort and luxury of the pieces of a living room suite. Yet it must be so constructed as to withstand thousands upon thousands of road shocks over years of driving and be able to stand the burning sun or zero cold without showing noticeable effect.

A trip through the Fisher plant at the Oldsmobile factories in Lansing, Mich., where all Oldsmobile closed bodies are constructed reveals the secret of this uncanny strength and ability to withstand and occasionally "haul usages." The secret is selection of the best materials procurable, fine design, constant inspection and the use of precision manufacturing methods which rival those required in the manufacture of an engine.

Every "Body by Fisher" placed on an Oldsmobile chassis undergoes constant inspection and must finally pass the rigid requirements of both Fisher and Oldsmobile inspectors. These inspections run through the 1875 different operations required to make an Oldsmobile body exclusive of painting and finishing.

A NEW SPORT
"Let's go to the movies."
"No, let's stay here on the front porch. We can read better subtitles on the flippers."—Life.

She: I see in the paper that three persons were killed in a feud.
He: Those little cheap cars are dangerous.

WHERE 22 DIED IN BRITISH WRECK

This extraordinary photo, taken shortly after one of the most serious railroad accidents in English history, shows rescue workers cutting their way through sides and top of the telescoped coaches. A crowded night excursion train collided with a freight train at Darlington, killing 22 persons and injuring scores.

HEALTH

HOT WEATHER HINTS

By Dr. Frederick Stricker
"Hot weather being with us it is worth while considering some of the things we can do to keep comfortable and happy in spite of the heat. Some of the things which may help are:

1. Don't over-eat. Heavy meals during hot weather are not only unnecessary but are actually harmful. The diet during hot weather may well consist chiefly of fruits, salads and vegetables. Drink plenty of cool water. Cool water is preferable to ice water. There is no satisfactory substitute for water. Wear loose, light clothing. Protect the head from the direct rays of the sun. Minimize the number of heavy curtains, portieres, pieces of overstuffed furniture and other such things as will retain heat. Their presence makes the house much hotter than it otherwise would be. Green vegetation, such as trees, grass, shrubbery and flowers help to keep the premises cooler. Short of a pavement there is nothing which will make a yard hotter than the lack of any trees or grass. Swimming is fine but care should be taken to expose the body for short periods of time only until a protective coat of tan has been developed. Cool or tepid baths are usually more comforting than ice cold ones.

"Remember that babies are far more apt to become ill as a result of hot weather than are older children or adults. Babies improperly cared for during hot weather suffer greatly and often die from diarrhea and enteritis. Every mother should remember at least these things concerning the care of the baby during hot weather:

1. Nurse Your Baby. Do not wean without consulting your doctor. If bottle fed keep food covered and on ice. Do not give unripe or too ripe fruit to young children, and do not allow them to eat between meals. Children require only three-fourths as much food

in hot weather as in cool weather.
2. Water. Give the baby all he will take between feedings. Do not give water for three-quarters of an hour before feeding time. Use cool boiled water.
3. Clothing. In hot weather a diaper and thin shirt are enough. If very hot leave off the shirt. Dress baby according to temperature. Don't use enough clothes to make the baby perspire. Use white clothes.
4. Bathing. Bathe the baby once a day. In hot weather give the baby a cool sponge bath two or three times a day. If he has prickly heat include baking soda and corn starch in the bath water (one teaspoon of baking soda and one dessert spoon of corn starch to one quart of water). Clean hands and face help keep the food clean.
5. Sleeping. Have the baby sleep out of doors as much as possible, protecting him from the direct sun and extreme heat. Do not use heavy materials as curtains, etc., to cover or shade the baby—they exclude air. Protect him from flies by covering the carriage or crib with mosquito netting. Don't pile on extra covers unless the weather turns cold—the baby's covers should be no warmer than yours.
"Ask your doctor for advice—he is your responsible advisor."

AUSTRIANS COLONIZE BRAZIL

RIO DE JANEIRO (AP)—The Austrian minister has completed arrangements to establish three colonies of Austrian immigrants near the city of Theophile Ottom, land from the state of Pernambuco situated on the railway that runs inland from the Port of Caravelas. The region is sparsely populated, but said to be well suited for production of coffee and cocoa.

MINING IN AUSTRALIA

SYDNEY (AP)—A syndicate has begun lead and silver mining operations at Braeside, northwestern Australia, with government aid.

JAILED FOR WRECKLESS DRIVING

SANTA CRUZ (AP)—Mrs. Charles Teague of Oakland, formerly prominent in Fresno, was sentenced to 60 days in jail and fined \$200 for reckless driving. A felony charge of driving an automobile while intoxicated was dismissed.

TORNADO HITS RUSSIA

SMOLENSK, Russia, July 20

(AP)—Several persons were killed, the crops sown on 25,000 acres were wiped out and much livestock was destroyed by a fierce tornado which hit the counties of Asenjak, Artemovsk and Trossovsk last night. First reports did not give any definite number of casualties.

BUILD BIG PLANE
HAMBURG (AP)—A gigantic seaplane, equipped with 12 motors having a total of 5000 horsepower and a fuselage built to withstand

the buffeting of ocean waves, is under construction at Altonheim on the Swiss shore of Lake Constance. The plane which will accommodate 30 passengers, freight and mail, is designed for transatlantic service.

BUILD SEAPLANE FLOAT
BUENOS AIRES (AP)—A float for seaplanes, recently authorized by the government, will be moored in the outer harbor here.

Wide open ~ ~ ~ mile after mile

Hour after hour, the Pontiac Six reels off the miles with safety, both for its passengers and for itself.

Its sturdy Fisher bodies—its rugged construction—its big, four-wheel brakes . . . these are features which contribute to the safety and comfort of passengers at all times.

As for the car itself, a full-pressure oiling system lubricates moving engine parts. And such advancements as crankcase ventilation and the thermostatically controlled crossflow radiator protect it from the wear and tear imposed by sustained high speeds.

Today's Pontiac is one low-priced six which needs no pampering. Its record proves its ability to travel wide open mile after mile!

COME DRIVE in the fine car luxury of 'SILENCED PERFORMANCE'

1. 55-H. P. High-Compression Engine
2. Silenced Interior
3. Cushioned universal joint system

SILENCED CHASSIS • • SILENCED INTERIOR

When you start the great new 55-horsepower engine of this New Oldsmobile . . . when you accelerate smoothly from 5 to 25 m. p. h. in 8 1/2 seconds . . . when you drive at touring speeds, even on untraveled roads . . . you will experience the fine-car luxury of silenced performance!

And a silenced interior! The result of a sound-deadening material which insulates the body from the chassis.

In tune with this restfulness, four Lovejoy hydraulic shock absorbers provide supreme riding comfort over even the roughest road.

A rubber-core clutch . . . a new type of rubber engine-mountings . . . a new double-cushioned universal-joint system. These in addition to non-squeak spring shackles and rubber-cushioned bumpers. A silenced chassis!

Come in today. Drive this New Oldsmobile. Know why thousands of motor car buyers in all sections of America are hailing it as an outstanding engineering achievement and choosing it as the Fine Car of Low Price.

Announcement

TO MY FRIENDS: 1

For seven years, as you know, I have been the resident manager of the Fletcher Oil Co., the first independent oil company to serve the people of Eastern Oregon. I have now purchased the company and will have complete personal charge. Under the new arrangement I will be in a position to give my patrons even better service than in the past, and I sincerely hope that the friends I have made in the capacity of manager will continue to allow me to serve them now that I have become the owner. I will continue to handle the Veltex Products, Oil and Gas for Automobiles, Tractors and Farm Machinery.

Oilways Yours,

T. R. MAXWELL, Distributor of Veltex Products
