YANKES BEATEN; HIGGINS WORRIED

Mighty New York Team Gets Only Three Wins Out of 11 Starts

By Robert W. Walker
 Associated Press Staff Writer
 The Yankees, who were expected to win the pennant, were beaten by the Athletics in a 10-3 rout today at New York. The Yankees' record now stands at 10-11, while the Athletics are 11-10.

Burned valves - engine strain - power loss
 all from hard, flinty carbon

CARBON that builds up in layers inside your motor—you know the trouble it causes. What you may not know is where it comes from.

Burned oil forms it. And in modern motors this tendency of otherwise good oils is really serious. Abrasive bits of carbon break off, grind endlessly through the motor. "Clips" hold valves open, burn the stems, waste power, red hot "hobs" cause knocking.

So oils are no longer judged solely on lubricating quality. You must also know how much and what kind of carbon they form. Let us tell you of one particular oil.

Less carbon—soft carbon
 Shell Motor Oil forms only 1/3 to 1/5 the carbon of even the costliest oils! The little it forms is soft, soap-like, it blows away.

Unique low-pressure stills refine Shell Motor Oil carefully. All its sturdy body is contained in its striking contrast old style shells "search" and waikar oils in the heat of refining.

Not only has Shell Motor Oil overcome carbon. The new process produces a finer lubricant with astounding heat resistance. Truly Shell Motor Oil can "add thousands of miles to the life of your car." It will, if you use it. Start now—even with the next extra quart!

SHELL MOTOR OIL

Shell 400, the "stew" oil, is the best running motor oil for Shell Motor Oil. When Shell Motor Oil is burned by "finishing" with a "stew" oil.
