Continue with layer for layer until all is used, making the last layer of potato. Put into a hot oven to brown the top and serve from baking dish.

A NEW FLAT BAG is of navy blue calf with bands of beige and red set to one side. The single strap attached to a large ring of gold metal is very smart.

With 56 in attendance, representing all three Pacific coast states, the annual meeting of the Haynes clan was held at Union yesterday honoring the 88th birthday anniversary of Sam Haynes, Civil war veteran and Oregon pioneer.

Bridge Pointers

By Milton C. Work

As a result of the almost entire absence of doubles of original bids of one, as was described last Monday, the informatory double was invented and Auction Bridge was made much more interesting. All doubles were divided into "business" and "informatory"; the business doubles retain the literal and obvious meaning which originally attached to all doubles, the informatory doubles became purely conventional and their meanings had to be learned.

After considerable experimenting, an almost unanimous agreement was reached by the experts that a double of two No Trumps, or four of a suit should be considered business; and that doubles of one No Trump, or one, two or three of a suit should be business or informatory, depending (with certain variations) upon two other features of the auction. These features have to do with the previous declarations of the doubler and his partner, and may be summarized as follows:

A bid or double previously made by a player makes any double by his partner business; but a bid or double previously made by the doubler does not necessarily have that effect. The logic of this lies in the fact that an informatory double is made with the expectation that partner will name his best suit in answer to it. When he already has indicated his strong suit, it does not have to be asked for. But a player may have bid himself, have been overcalled by an adversary and may want to ask his partner to select from three suits (the one the doubler has bid and the two unbid suits); so in that case the double may be classed as informatory even after a bid by the doubler.

For practical purposes, the following definitions cover doubling:
 A double is informatory if made of one No Trump, or of one, two or three of a suit; provided the partner of the doubler has not previously bid or doubled.
 A double is business if made of two or more No Trumps, or four or more of a suit; or of any smaller declaration if the partner of the doubler has previously bid or doubled.

There is another requirement, so comparatively unimportant that I have not complicated the definitions by including it. A double may be made at the first opportunity to double that declaration in order that it be considered informatory.

Next Monday we shall have some illustrations.
