**High Money Rate Restricts Trade In Stock Market**

NEW YORK, Aug. 12 (AP)—High money rates continued to have a restrictive effect on trading in today's stock market. Marking up of the gold money market was to 7 1/2 per cent, the highest since the first of the month, brought a flurry of selling which carried a heavy volume down to 6 points, but buying support was quickly regained, and the market was headed upward again by early afternoon.

Outside the stock and money markets, chief speculative interest centered in a further break at 42.30 a lot in cotton, part of which was returned.
