Today we give Nos. 5 and 6 of the series of hands started up Tuesday of this week in which a slight difference between the cards held makes a great difference in the method which Declarer should use in the development of his 28 cards. In both South is the Declarer; the contract is No Trump, and West's lead is the Six of Clubs.

The Difference in Management of The Two Hands

The important difference between Nos. 5 and 6 is that No. 5 Declarer holds the Nine of Clubs and in No. 6 the Ten and that he should play Dummy's Queen in No. 5, but the Deuce in No. 6. With Queen-x in Dummy and Ace-Nine-x in Closed Hand, Declarer's best chance for two tricks in the suit is to play the Queen from Dummy, but with Queens in Dummy and Ace-Ten-x in closed hand, Declarer has a certainty of two tricks in the suit by playing small from Dummy, and may make only one by playing the Queen. Should the Queen of Clubs win in No. 5, Declarer should attempt the Spade finesse, leading the Jack and the King of Hearts, playing the King, the Ten from Closed Hand, if the Spade finesse succeeds, Declarer, with two club tricks and four Spade tricks assured and needing three more, should try the Heart finesse, putting Dummy in with the King (being careful to lead the Queen, not the Jack). If the King of Hearts captures the Queen, the fourth round of Hearts will be won with Dummy's Five and Diamonds could be led toward the King.

Pioneer Dies

What with Mr. Timney leaping off into matrimony, he begins to look as if Colonel Lindbergh is just about the only really distinguished bachelor this country has left.

With about 50 persons in attendance a supper picnic of the Spanish-American War veterans and the auxiliary took place at the home of Mr. and Mrs. H. H. Anderson in North La Grande last evening. The meeting was one of the outstanding in the year's program of the two organizations. Shortly after 6 o'clock the families spread their picnic supper on the beautiful lawn about the Anderson home. Mr. and Mrs. Anderson served coffee.

Speakers during the picnic were T. D. Hantz, commander, Ralph Huron and Harry Warrington. The organizations sang several patriotic songs. THE NORMAL WAISTLINE and the gathered circular skirt recently seen at a fashionable gathering show the new fashion trends.

Different ones are asking me what we are going to do when we turn our yard over to the Home Lumber and Coal Company. The farmers want to know if we are going to put in a cannery. I have been willing all the time to help with the cannery along with a lot of other things, but there doesn't seem to be anybody sufficiently interested at this time to go ahead with the cannery. We have the old Harding estate that we would be glad to turn in for a cannery site, and retain an interest in the establishment.

Our plans now are not all developed for the future. However, we are thinking very seriously of locating in the outskirts of Denver, Colorado and opening up a cash and carry building material station. However, we don't know what the future may bring forth so we don't figure on anything very strong until we get nearly to it. I don't know what to do about myself being a candidate for representative as there is nothing holding us in La Grande at this time. At the time I was nominated, I didn't realize that I might sell out. So I may not ever have a chance to become a politician in all my life.

We are meeting lots of customers and selling lots of material for which we are glad.

Drip Drip Drip "wet" gasoline into your oil!

An example of what a thousand miles of ordinary driving can do — oil 5% "gasoline" — thinning caused by incomplete burning of "wet" gas.

You choke your motor to start it — shoot in a mixture with heavy wet particles of gasoline that don't burn cleanly. Where do those wet particles go? Down the cylinder walls, to thin your oil! Thrust open the throttle for a quick getaway. What happens to the overload of fuel? Forced past the piston rings, much of it, into the crankcase! And in a thousand miles of driving half your oil is likely gasoline. Gasoline you bought for power, for mileage — wasted. The lubricant body of your oil gone; for hundreds of miles back it has been seriously damaged by dilution with "wet" gasoline. But there is a way to prevent oil thinning. Not by more careful driving; you can't change traffic conditions or "nurse" your car at the expense of driving pleasure. But you can avoid using "wet" gasoline. Shell 400 is a gasoline from which exact refining has eliminated the heavy wet fractions. It goes completely vaporized, a "dry" gas, into your motor. It burns completely, cleanly. Going into use and not into your oil, Shell 400 has a real claim to more mileage, greater power. Yet it costs you no more. Select a convenient yellow and red Shell pump. Buy Shell 400 the next few times and you'll never go back to "wet" gasoline. You can tell Shell 400 in the starting. Pull your choke out only half way. Push it back in a few seconds after the motor starts. Shell 400 requires less choke than "wet" gas, but can stand more without causing thinning.

Shell Motor Oil, a new lubricant that forms less carbon, soft carbon is the ideal running mate for Shell 400. Don't offset the good effects of Shell 400 by using an oil less fine than improved Shell Motor Oil
