Chop onion that was scooped out and combine with crumbs, meat, milk and seasoning. Fill onion cups with this mixture, piling up well above tops. Cover with fine dry crumbs and bake in a moderate oven until very tender. The onions can be baked and served in individual looking cups if convenient.

HEALTH

LET'S STOP THE SPREAD OF INFANTILE PARALYSIS—IF IT COMES

By Dr. Frederick Stricker
"The occurrence of a single case of poliomyelitis or infantile paralysis as it is more often referred to, should be a matter of concern to the entire community."

"The appearance of the first case in a community will give concern to the physicians and the local health officer. The appearance of several cases should be the occasion for greater community action. A single case may have been imported or gotten the infection from an outside source. Several cases in different families mean that the disease has gained a foothold and that in all probability the source of infection is in the community."

"It is difficult to prevent the spread of poliomyelitis due to the fact that this disease is transmitted chiefly by mild cases, cases which do not develop paralysis and which may indeed be so mild as to make it difficult for the physician to make a definite diagnosis. This disease may also be transmitted by healthy non-susceptible persons who have within a day or so been exposed to some probably unrecognized cases."

Bridge Pointers

By Milton C. Work

Continuing for another three days (today, tomorrow and Thursday) the comparison of Auction Bridge hands which have apparently but a slight variation and yet really a very material one, we add Nos. 7 and 8 to the series. The contrast is No Trumps; South is the Declarer; and West's lead is the Jack of Spades in both cases.

The Difference in Management of The Two Hands

The material difference between Nos. 7 and 8 is that in No. 7 Dummy has Q-6-4 of Hearts; and in No. 8, 7-6-4. Closed Hand has two high Hearts in No. 7; only one in No. 8. Winning the first trick in both cases. Declarer sees a very different picture in No. 7 from that displayed in No. 8. In No. 7 he is sure of two Spade tricks, three Heart tricks, two Diamond tricks and four or five Club tricks, depending upon whether the Club finesse succeeds. He also has a chance of making one more Heart trick. If the Club finesse win and the Hearts run, he has a Grand Slam; so his obvious play is to put Dummy in with a Diamond on trick 2 (not giving away to the adversaries that the Queen of Hearts is a winner), and then to lead the Jack of Clubs from Dummy to try the finesse. It is perfectly safe to do this because he has the Queen of Hearts left as an entry to make Dummy's long Clubs.

But in No. 8 a very different situation presents itself. There Dummy has one entry to make Dummy's long Clubs.

But in No. 8 a very different situation presents itself. There Dummy has but one entry—the Ace of Diamonds—and if he uses it to get in to finesse Clubs, he would have none left to enter to run Clubs. Declarer hits two Spade tricks one Heart and two Diamonds; he needs four Clubs for game. Making five Clubs, which he might do if the finesse succeeded and the King dropped on the first or second round, would only increase his total from the nine assured tricks to ten—an immaterial trick when playing a No Trump; but if trying the finesse enabled the adversaries to block the Club suit (it probably would), then Dummy's long Clubs would not be run. To trick 2 Declarer should lead the Ace of Clubs from Closed Hand, following with the Queen of Clubs to trick 3; and if that win, the Four of Clubs to trick 4.

"The prevention of infantile paralysis means the avoidance of much unnecessary expense and worry; the prevention of much crippling of children and all that such means to the individual concerned and the state."
