**BUTTER PRICES
A CENT HIGHER**

Print Butter on 53-cent Basis in Portland; Eggs Continue Firm

PORTLAND, Ore., Sept. 21.—(A.P.)—Invaluable swapped print butter was a cent higher on local markets today, reflecting another half cent rise in quotation on outside markets to 20c. Today's top rate print butter up to a 50c mark.

Butterfat buying prices were also a cent higher today with most Portland creameries paying 52c delivered milk a few were offering a cent more.

Egg values continued firm at prevailing quotations. Receipts of fresh eggs continue light with both local and outside demand active. Production continued to prevail on the country, dressed meat, milk, etc. will be a few cents higher around 25c for the best light. Lard was in fairly good demand with receipts comparatively light. Pork and beef moved slowly but prices were not notably lower.

Wholesale fruit and vegetable markets were decidedly more active in the early hours today than have been during the last part of the week. Prices were generally steady.

WALL STREET BULLETIN

NEW YORK, Sept. 21.—(A.P.)—The stock market resumed its upward price movement today after an early period of irregularity. Lowering of the call money rate from the general rate of 3 per cent to 2 1/2, coupled with lankish intentions under rates next week, helped to revive bullish sentiment which had been dampened by the stiff money rates of the past few days.

PORTLAND LIVESTOCK

PORTLAND, Ore., Sept. 21.—(A.P.)—Cattle and calves—No receipts steady.
