Physicians and his manager believe he will not start and probably would not be available for duty during the series.

By HERBERT W. BARKER (Associated Press Sports Writer) NEW YORK, Oct. 2.—(AP)—A crowd of 10,000 packed the Polo Grounds today to witness the first game of the world series between the Yankees and the Cardinals. The odds were 5 to 3 against the Yankees. The game was a close one, with the Yankees leading 2-0 in the seventh inning, but the Cardinals rallied to win 3-2 in the bottom of the ninth.

Apparently the Cardinals' center fielder, in their practice sessions at the Yankee stadium where the series opens at 1:30 Eastern Standard time tomorrow, they have had no time for jokes. They are about their business in grim earnest. The actual conflict is to begin.

MONTAG COLONIAL Ranges

Why's—and baking-wise The "why" of many a good Western cook's good baking will be given as "her Montag." And the "why" of the good Montag oven is its scientific sensible design and construction. The oven of the Montag Range has for two generations been an outstanding feature. Commodious, the oven is so set in the range as to allow maximum heat circulation practically all around it. As a result, even heat—top, bottom, back or sides. Outer walls of Montag steel ranges are thoroughly insulated with a thick layer of asbestos—the heat is retained inside where it is wanted. As a result, more heat from less fuel, maintained for a longer period.

And now, still further improvement in the steel Ranges. The new oven bottom of French construction doesn't warp—retains the heat still better. Top and sides are electrically welded, making them practically seamless and permanently tight; they are made of Toncan rust-resisting iron. All Montag Ranges are equipped with improved oven thermometers. —Baking why's for the baking wise!

Step into our Range Department and learn the many other desirable features of Montag Ranges. We have an interesting "new-stoves-for-old" plan to tell you about.
