After praising the south for its wonderful industrial expansion since the world war, Hoover said he knew the people of the south would agree with him "that these results could never have been attained but for the helpful cooperation and sound policies in the national government and the vital changes in these policies can bring only distress and disaster."

"I realize that I came here as the candidate of a political party with whose policies many of you within my sight and many within the sound of my voice have often differed," he added, "I respect your views regarding that difference. Yet so closely welded in common interest are the pressing issues of our nation today that it should be the honor, essential for a citizen of any region to vote for a president who represents the principles which corresponds with his convictions."
