Why not start the day right? Healthful breakfasts can and should be the most appetizing

Advertisement for fiber foods. Text: If THE fiber foods are so important in our diet—and food authorities impress upon us that they are—why not start the day right by eating them for breakfast? They can be made into the most delicious and satisfying breakfasts imaginable. Just think for a moment what foods it that furnish the bulk and fiber that our bodies need so badly. They are: bran and cereals, and fruits and vegetables, all but the last and beneficial, for example, than cereal with milk and sugar? What is more delicious for breakfast than grapefruit, sweetened to taste, or apples or pears sweetened or baked? Nearly everyone enjoys apple sauce or stewed prunes or other dried fruit with the morning toast and coffee. Note that sugar is mentioned in connection with each one of these healthful foods. Sugar is the ideal flavor that Nature has provided, thus enabling people to enjoy the kinds of foods that are best for them. One fact cannot be stressed too much. All growing children should eat hearty breakfasts of bone and teeth building, body developing foods such as the cereals, milk and fruits. Proper sweetening makes children relish the foods that their growing bodies need so badly. Eat varied healthful foods, so sweetened that they are delicious and enjoyable. The Sugar Institute.
