

Pensions Report Shows Decrease In G. A. R. Ranks

WASHINGTON, Dec. 6 (AP)—The news that the union armies of the states had been cut 15,000 in a year by the toll of time is placed in a mass of statistics alongside the material fact that there are 20,000,000 acres of coal lands in the United States and Alaska, capable of producing 200,000,000,000 tons in the annual report of Secretary West of the interior department.

Humane and material considerations both find space in the bulky volume which contains information sufficient to give many a member of congress enough work to keep him busy for the short session, with its reports on Indian affairs, reclamation, national parks and a myriad of other subjects with which this busy branch of the government must deal.

Speaking in figures going up to the hundreds of millions involved in its multitude of activities, the department's bureau of pensions shows that it distributed from the government's chest last fiscal year the sum of \$244,222,970, of which \$228,965,672 was paid in pensions to veterans and their dependents, while \$15,257,298 went to retired government employees.

Reckless these figures which certainly show the passing of an old order, the report shows that 164,708 Spanish war veterans, whose membership as a whole still is robust, have been taken under the government's protective wing, but the largest army of American veterans—those of the world war—is being looked out for by the independent veterans bureau.

DUKE HELPS ENGINEER

CAPE TOWN, South Africa, Dec. 6 (AP)—The Duke of Gloucester, third son of King George, took off his coat and helped repair a badly locomotive which was drawing the

OUT OUR WAY

By Williams

train on which he is hurrying to the coast to take ship for England.

Hair dressers say that bobbed hair is going out. Parents interviewed on the subject say that it is not only going out but not coming in at anything like a reasonable hour.
