Profit Taking Brings Reaction In Wall Street

NEW YORK, Jan. 3 (AP)—Heavy profit taking which brought about sharp reactions of 5 to 15 points in some of the high priced specialties unsettled today's stock market after an opening outburst of strength had carried more than a score issues into new high ground. While most observers regarded the set-back as a natural correction of a temporarily top-heavy speculative position, some selling also is believed to have been influenced by fears of a large increase in loans, and a possible advance in the federal reserve discount rate.

Intellectual efforts were made to halt the large volume of selling in the final hour by pushing up individual shares. Radio rallied to above 400 again, when call money softened to seven per cent. Western Union moved up six points and Gillette Safety Razor (45) some of the other representative issues met, fresh selling on the rallies. The closing was irregular. Sales approximated 5,300,000 shares.
