ABE MARTIN

Conventional jest seems to me to vote on a place for the next one. "Oh, I'm going to a breakfast, dance, an'—how I dread it," said Miss Tawney Apple, when somebody asked her what she was going to do tonight.

PROFESSOR BLOWS GLASS
PITTSBURGH (AP)—Fred Wagner blows bubbles for a living—but they're glass bubbles. He is said to be the only professor of glass blowing in America. At the University of Pittsburgh, Professor Wagner blows glass for the instruction of chemistry students, who hope to acquire that art for use in research.

Doctors Warn against undereating
Too little fat in the body makes us a prey to disease

EMINENT medical authorities are amazed and alarmed that so many girls and adults of both sexes are dieting themselves to a dangerous loss of weight.

A famous doctor says: "The most delicate parts of the body are always the ones to suffer first. A woman who is naturally sweet-tempered, good-natured, competent... becomes petulant, unreasonable, hard to get along with. A man who is thus starving himself becomes irritable and inefficient in the office and grouchy at home."

He begins to fall off in judgment and mental ability. This doctor goes on to show that nature stores up fat in the body as a reserve and that it is dangerous to destroy this reserve by dieting. Such an individual, he says, "becomes an easy prey for all manner of chronic ailments—kidney and liver diseases, and degeneration of the brain, spinal cord and nerves... typhoid fever, pneumonia, influenza and colds."

How much more intelligent it is to eat varied, nourishing foods, rather than eliminating the one ingredient that adds flavor and enjoyment to all other foods. Sweetness is the ideal flavor. What is so useful and refreshing as a salad of fresh grapes—sweetened with powdered sugar—and lettuce? Eat enough fruits and cereals. The best cooks are generous with sugar. The Sugar Institute.
