Japan Plans New Royal Wedding

Another royal wedding is being planned in Japan, the engagement between Prince Takamatsu, brother of the emperor, and Miss Kikuko Tokugawa having been announced. The ceremony is expected to take place in the fall. The young couple is shown above.

NINE DIE IN HOMES FLATTENED BY TORNADO

Flattened to the ground as if by a gigantic sledge-hammer were a group of houses that once stood here in the little town of 8 1/2 miles S. C., before a tornado struck. Nine were killed and 12 badly injured when the twister laid bare a three-mile area. Nelson Garrett, deputy sheriff, his wife and three children met death in one of the wrecked homes pictured above. Of the four others killed in the storm, three were relatives of the Garretts.

Tru-Bake Crackers

In Orange Cartons, Wax Wrapt

With Tru-Blu master bakers, the production of Tru-Bake Crackers is a religion. "Good enough" won't do. Tru-Bakes must be best. From setting the sponge to the final baking, every step is regulated to a nicety. Resulting in a cracker that's distinctive in shape and flavor, perfect in bake... Tru-Blu in quality. Ask for Tru-Bakes.

Baked and Guaranteed First Quality by the
TRU-BLU BISCUIT CO., Spokane, Portland, Seattle
Originators of Tru-Bakes and Tru-Blu Honey-Sweetened Grahams

Farm Pointers

The rather common belief that so-called silage corn varieties yielded greater tonnage than the standard grain varieties is being dispelled by observations of both farmers and experiment stations. The standard corn produces more grain which makes for weight and high quality silage, and enables the farmer to maintain one pure strain of good seed corn on his farm, says the Oregon experiment station.

Shade for bees is not recommended in Oregon, says the experiment station. Equipment remains wet unless it has shelter. If a shed is used for protection it is best built high enough to allow the sun to penetrate. The double telescope cover usually gives enough protection and shade.

Ashes are good for gardens, but too much ashes will have a toxic effect. The application of 10 pounds to 100 square feet is the equivalent of two tons an acre, which is sufficient.
